Principles of Management Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. Medical Diagnosis; a Manual for Students and Practitioners Serious Leisure A Perspective for Our Time *Routledge* Serious Leisure offers a comprehensive view and analysis of the current state of the sociology of leisure. Defining and differentiating the way people use their free time, Stebbins divides such activity into categories of serious, casual, and project-based leisure

that he further separates into a variety of types and subtypes. Together they comprise what he calls serious leisure. In this perspective, serious leisure constitutes systematic pursuit of an amateur, hobbyist, or volunteer activity sufficiently substantial and interesting in nature and requiring special skills, knowledge, and experience. Casual leisure, though immediately, intrinsically rewarding, is by contrast a relatively short-lived pleasurable activity, requiring little or no special training to enjoy it. Project-based leisure is a short-term, reasonably complicated, occasional creative undertaking carried out in free time. Stebbins sets out the basic concepts and propositions that make up the three forms, focusing on their essential elements. He takes stock of the serious leisure literature as well as that for casual and project-based leisure. Stebbins sees serious leisure realized by way of a set of foundational concepts--organization, community, history, lifestyle, and culture--and several of their component areas. He reviews the history and background of the concept of serious leisure and then adds historical commentary on, first, casual leisure and, then, project-based leisure. Finally, he examines the future and the importance of the serious leisure perspective in a globalizing world, and some of its critical links with other fields of knowledge and practice, notably the nonprofit sector and preventive medicine. Together with its original insights, *Serious Leisure* offers a single, handy, coherent, comprehensive resource. It will be of interest to sociologists, labor studies specialists, and economists.

Ninety to ninety-five per cent of bank transactions are executed electronically today. The Internet, ATMs, call centres and smartphones have become mainstream for customers. But banks still classify these as alternative channels and maintain an organisation structure where Branch dominates thinking. Continued technology innovations, Web 2.0, social networking, app phones and mobility are also stretching traditional banking models to the limit. **BANK 2.0** reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet all within the next 10 years.

Radar Instruction Manual Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.
