ISLAM

A SHORT HISTORY

Modern Library No religion in the modern world is as feared and misunderstood as Islam. It haunts the popular imagination as an extreme faith that promotes terrorism, authoritarian government, female oppression, and civil war. In a vital revision of this narrow view of Islam and a distillation of years of thinking and writing about the subject, Karen Armstrong's short history demonstrates that the world's fastest-growing faith is a much more complex phenomenon than its modern fundamentalist strain might suggest.

ORIENTALISM

Vintage More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our divided world.
