Edible Insects

Future Prospects for Food and Feed Security

Food & Agriculture Org **Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.**

Plastic Legacies

Pollution, Persistence, and Politics

Athabasca University Press There is virtually nowhere on earth that remains untouched by plastics and the situation presents a serious threat to our natural world. Despite the magnitude of the problem, the interventions most often put in place are consumer-led and market-based and only nominally capable of addressing the issue. As the problem worsens and neoliberal ideologies limit the world's responses to this crisis, there is a growing need for legislative frameworks that attend to the complex social and ecological issues associated with plastics. The contributors to this volume bring expertise from across academic disciplines to illustrate how plastics are produced, consumed, and discarded and to find holistic and integrated approaches that demonstrate an understanding of the wide-ranging problem. From the plasticization of earth's oceans to the endocrine disrupting chemicals that have the potential to seriously harm life as we know it, these essays beg the question that we all must answer: what is our plastic legacy? With contributions by: Imogen E. Napper, Sabine Pahl, Richard C. Thompson, Sasha Adkins, Stephanie B. Borrelle, Jennifer Provencher, Tina Ngata, Sven Bergmann, Christina Gerhardt, Elyse Stanes, Tridibesh Dey, Mike Michael, Laura McLauchlan, Johanne Tarpgaard, Deirdre McKay, Padmapani Perez, Lei Xiaoyu, and John Holland.

Emotionomics

Leveraging Emotions for Business Success

Kogan Page Publishers 'I believe that 'emotion' is where it's at' Tom Peters For far too long, emotions have been ignored in favour of rationality and efficiency, but breakthroughs in brain science have revealed that people are primarily emotional decision-makers. Many companies have not yet accepted that fact, much less acted on it. In this fully revised edition, Emotionomics will help you to understand emotions in terms of business opportunities - both in the marketplace and in the workplace. In today's highly competitive marketplace where many products look alike, it is the emotional benefit that can make the difference. At the same time, companies with engaged, productive work forces will undoubtedly achieve competitive advantage. Dan Hill's book draws on insights gathered through facial coding, the single best viable means of measuring and managing the emotional response of customers and employees, to help you to leverage emotions for business success in terms of branding, product design, advertising, sales, customer satisfaction, leadership and employee management. Emotions matter and Emotionomics will help you to step closer to customers and employees, but step ahead of your competitors.

Granada

A Novel

Syracuse University Press **Radwa Ashour skillfully weaves a history of Granadan rule and an Arabic world into a novel that evokes cultural loss and the disappearance of a vanquished population. The novel follows the family of Abu Jaafar, the bookbinder his wife, widowed daughter-in-law, her two children, and his two apprentices as they witness Christopher Columbus and his entourage in a triumphant parade featuring exotic plants and animals and human captives from the New World. Embedded in the narrative is the preparation for the marriage of Saad, one of the apprentices, and Saleema, Abu Jaafar's granddaughter a scenario that is elegantly revealed in a number of parallel scenes. As the new rulers of Granada confiscate books and officials burn the collected volumes, Abu Jaafur quietly moves his rich library out of town. Persecuted Muslims fight to form an independent government, but increasing economic and cultural pressures on the Arabs of Spain and Christian rulers culminate in Christian conversions and Muslim uprisings. A tale that is both vigorous and heartbreaking, this novel will appeal to general readers of Spanish and Arabic literature as well as anyone interested in Christian-Muslim relations.**

Deterring Democracy

Hill and Wang From World War II until the 1980s, the United States reigned supreme as both the economic and the military leader of the world. The major shifts in global politics that came about with the dismantling of the Eastern bloc have left the United States unchallenged as the preeminent military power, but American economic might has declined drastically in the face of competition, first from Germany and Japan and more recently from newly prosperous countries elsewhere. In *Deterring Democracy*, the impassioned dissident intellectual Noam Chomsky points to the potentially catastrophic consequences of this new imbalance. Chomsky reveals a world in which the United States exploits its advantage ruthlessly to enforce its national interests--and in the process destroys weaker nations. The new world order (in which the New World give the orders) has arrived.

His Life and His Lusiads

Non-Representational Theory

Space, Politics, Affect

Routledge This astonishing book presents a distinctive approach to the politics of everyday life. Ranging across a variety of spaces in which politics and the political unfold, it questions what is meant by perception, representation and practice, with the aim of valuing the fugitive practices that exist on the margins of the known. It revolves around three key functions. It: introduces the rather dispersed discussion of non-representational theory to a wider audience provides the basis for an experimental rather than a representational approach to the social sciences and humanities begins the task of constructing a different kind of political genre. A groundbreaking and comprehensive introduction to this key topic, Thrift's outstanding work brings together further writings from a body of work that has come to be known as non-representational theory. This noteworthy book makes a significant contribution to the literature in this area and is essential reading for researchers and postgraduates in the fields of social theory, sociology, geography, anthropology and cultural studies.

Neurology and Psychiatry of Women

A Guide to Gender-based Issues in Evaluation, Diagnosis, and Treatment

Springer This comprehensive resource covers a range of women's health issues and their intersection with neurologic and psychiatric disease. Chapters feature high quality, integrated information based on leading-edge research on gender-specific care and are grouped by reproductive years, pregnancy and health, and aging. Emerging science regarding sex differences in neurological and psychiatric illnesses, including anxiety, reproductive health, conversion disorders, depression and ethical issues in pregnancy, stroke risk factors, and successful aging strategies are covered along with clinical application of this knowledge to the delivery of care. In addition, in those medical problems that afflict both men and women, authors will point out the different risks, prevalence, presentations, and responses to treatments or outcomes in women. Written by renowned experts in the field, this textbook will thoroughly address the educational needs of physicians, nurse practitioners, and physician assistants in the areas of neurology, psychiatry, internal medicine, and obstetrics and expanding their understanding of concerns unique to female patients.

The Sticky Synapse

Cell Adhesion Molecules and Their Role in Synapse Formation and Maintenance

Springer Science & Business Media The molecular mechanisms, which are responsible for the functional differences between the various types of neuronal synapses, have become one of the central themes of modern neurobiology. It is becoming increasingly clear that a misregulation of synaptogenesis and synaptic remodeling and dysfunctional neuronal synapses are at the heart of several human diseases, both neurological disorders and psychiatric conditions. As synapses present specialized cellular junctions between neurons and their target cells, it may not come as a surprise that neural cell adhesion molecules (CAMs) are of special importance for the genesis and the maintenance of synaptic connections. Genes encoding adhesive molecules make up a significant portion of the human genome, and neural CAMs even have been postulated to be a major factor in the evolution of the human brain. These are just some of the many reasons why we thought a book on neural CAMs and their role in establishing and maintaining neuronal synapses would be highly appropriate for summarizing our current state of knowledge. Without question, over the near future, additional adhesive proteins will join the ranks of synaptic CAMs and our knowledge, and how these molecules enable neurons and their targets to communicate effectively will grow.

Petook

The Rooster Who Met Jesus

Petook is a snowy white rooster and proud of his wife's new brood of chicks, and quick to protect them from an intruding young stranger named Jesus walking through the garden. But when he sees the child kneeling in wonder and caressing his newborn chicks, Petook is soothed and crows happily. Years later, Petook, whose home is in sight of Calvary's hill, is awaiting another hatching and becomes strangely agitated when he sees men being lifted onto crosses there. He doesn't know that one of the men being crucified is the same boy who visited Petook's family long ago. But three days later on Easter morning, as a new brood of chicks hatches that coincides with the Resurrection of the stranger, Petook is inspired to crow with great joy, celebrating the mystery of new life.

The Rise and Decline of the Medici Bank, 1397-1494

Beard Books **A classic history of banking and trade in the medieval period, combining superb research and analysis with graceful writing. The Medici Bank was the most powerful banking house of the 15th century. Headquartered in Florence, Italy, it established branches in Rome, Venice, Geneva, Lyons, Bruges, London, and many other cities. The bank served as financial agent of the Church, extended credit to monarchs, and facilitated international trade in Western Europe. By their personal influence and the use of their profits, the owners and administrators of the bank contributed significantly to the development of Florence as the greatest center of the Renaissance.**

Cleanth Brooks and Robert Penn Warren

A Literary Correspondence

University of Missouri Press **James A. Grimshaw, Jr., brings together for the first time more than 350 letters exchanged by two scholars who altered the way literature is taught in this country. The selected letters focus on the development of their five major textbooks--the rationale for selections, the details involved in obtaining permissions and preparing indexes, and the demands of meeting deadlines. More important, these letters reveal their attitudes toward literature, teaching, and scholarship. Providing insight into two of the most influential literary minds of this century, these letters show two men who were deeply involved in research and writing, and who were committed to a life of travel, conversation, and learning. Their zest for life and their love of literature explain, in part, their uncanny ability to persevere and to succeed. Yet their human qualities are also present in the letters, which bring Brooks and Warren to life as rare individuals able to sustain a deep, lifelong friendship. Cleanth Brooks and Robert Penn Warren will help readers better understand the critical work of Brooks and the creative work of Warren. Students and teachers of American literature will find this book indispensable.**

The Chinese Mirror

Houghton Mifflin Harcourt **A retelling of a traditional Korean tale in which a mirror brought from China causes confusion within a family as each member looks in it and sees a different stranger.**

Wonders in the Sky

Unexplained Aerial Objects from Antiquity to Modern Times

Penguin One of the most ambitious works of paranormal investigation of our time, here is an unprecedented compendium of pre-twentieth-century UFO accounts, written with rigor and color by two of today's leading investigators of unexplained phenomena. In the past century, individuals, newspapers, and military agencies have recorded thousands of UFO incidents, giving rise to much speculation about flying saucers, visitors from other planets, and alien abductions. Yet the extraterrestrial phenomenon did not begin in the present era. Far from it. The authors of *Wonders in the Sky* reveal a thread of vividly rendered-and sometimes strikingly similar- reports of mysterious aerial phenomena from antiquity through the modern age. These accounts often share definite physical features- such as the heat felt and described by witnesses-that have not changed much over the centuries. Indeed, such similarities between ancient and modern sightings are the rule rather than the exception. In *Wonders in the Sky*, respected researchers Jacques Vallee and Chris Aubeck examine more than 500 selected reports of sightings from biblical-age antiquity through the year 1879-the point at which the Industrial Revolution deeply changed the nature of human society, and the skies began to open to airplanes, dirigibles, rockets, and other opportunities for misinterpretation represented by military prototypes. Using vivid and engaging case studies, and more than seventy-five illustrations, they reveal that unidentified flying objects have had a major impact not only on popular culture but on our history, on our religion, and on the models of the world humanity has formed from deepest antiquity. Sure to become a classic among UFO enthusiasts and other followers of unexplained phenomena, *Wonders in the Sky* is the most ambitious, broad-reaching, and intelligent analysis ever written on premodern aerial mysteries.

U.S. and Russian Policymaking with Respect to the Use of Force

Rand Corporation This volume presents case studies of U.S. and Russian peacekeeping and peacemaking operations since the end of the Cold War. The chapters are authored by U.S. and Russian policymakers and/or policy analysts who were neither direct participants in, nor first-hand observers of, the events they describe. Drawing on the evidence presented in the case studies, a concluding chapter compares the political and institutional arrangements and procedures through which the two countries decide whether or not to engage in peacekeeping and peacemaking operations and assesses the implications of the key similarities and differences for combined operations in the future.

Little Grunt and the Big Egg

Penguin Tomie dePaola's classic (and hilarious) story of a young cave boy and his mysterious egg. Mama Grunt sends Little Grunt out to find a dozen eggs. All he can find is one huge egg. The egg hatches and out pops a baby dinosaur. Little Grunt names him George. Soon George grows too big for the Grunt family cave, and poor Little Grunt has to send him away. But when the local volcano erupts, there's only one dinosaur who can save the day!
