HANDBOOK OF READING RESEARCH

Routledge In Volume III, as in Volumes I and II, the classic topics of reading are included--from vocabulary and comprehension to reading instruction in the classroom--and, in addition, each contributor was asked to include a brief history that chronicles the legacies within each of the volume's many topics. However, on the whole, Volume III is not about tradition. Rather, it explores the verges of reading research between the time Volume II was published in 1991 and the research conducted after this date. The editors identified two broad themes as representing the myriad of verges that have emerged since Volumes I and II were published: (1) broadening the definition of reading, and (2) broadening the reading research program. The particulars of these new themes and topics are addressed.

EXTENDING LITERACY

DEVELOPING APPROACHES TO NON-FICTION

Routledge One of the most problematic areas in the teaching and development of literacy appears to concern children's interactions with non-fiction books. Many surveys and reports have commented on the tendency for children to do little more than copy out sections of non-fiction texts. The Exeter Extending Literacy (EXEL) project was set up with the aim of exploring ways in which non-fiction might be used more effectively and profitably than this. In this book David Wray and Maureen Lewis outline the thinking behind the project and describe in detail the many useful teaching strategies and approaches which were developed in collaboration with primary teachers across the country. Teachers of children from five to fourteen will find this book both a stimulating account of a very influential development project and a useful source of practical teaching ideas.
