Next Generation Management Development

The Complete Guide and Resource

John Wiley & Sons This innovative, comprehensive, and fully integrated management development program provides a vehicle for enabling managers and leaders to participate more effectively in their organization′s OD processes. The concepts, models, tools, and other materials have been used successfully to train managers, leaders, and MD/OD personnel in organizations such as IBM, AT&T, Kraft, Baxter Labs, Sears, Caterpiller, and the U.S. Navy, Army, and Air Force. The accompanying CD-ROM contains customizable tools for OD consultants and facilitators as well as additional chapter material.

Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Run-to-Run Control in Semiconductor Manufacturing

CRC Press Run-to-run (R2R) control is cutting-edge technology that allows modification of a product recipe between machine "runs," thereby minimizing process drift, shift, and variability-and with them, costs. Its effectiveness has been demonstrated in a variety of processes, such as vapor phase epitaxy, lithography, and chemical mechanical planarization. The only barrier to the semiconductor industry's widespread adoption of this highly effective process control is a lack of understanding of the technology. Run to Run Control in Semiconductor Manufacturing overcomes that barrier by offering in-depth analyses of R2R control.

Operations Support Systems 2002

Enabling the Next Generation Network

Intl. Engineering Consortiu This comprehensive report explores network management in an internet protocol (IP) world, open-system OSS implementation and integration, evolving network architectures, and key OSS business drivers from the perspectives of a wide variety of leading industry professionals. It focuses on the innovations that are shaping the future of network management in light of the industry's transition to packet-based and wireless networks, broadband services, and converged voice-data architectures and is intended to provide unique and informed insights into the challenges involving OSSs today and the solutions and strategies that are being developed to combat those challenges.

The Generation Z Guide

The Complete Manual to Understand, Recruit, and Lead the Next Generation

The Generation Z Guide equips professionals to improve recruitment, enhance engagement, and effectively train and develop the post-Millennial generation. Born after 1998, Generation Z ranges from those entering high school, completing undergraduate college, and starting careers. Generation Z is very different than Millennials and their rapid entrance into the workforce is increasing the complexity of managing and working across generations. In fact, 62 percent of Generation Z anticipate challenges working with Baby Boomers and Generation X. Generation Z has never known a Google-free world. Growing up during the most accelerated and game-changing periods of technological advancements in history has imprinted Generation Z with new behaviors, preferences, and expectations of work, communication, leadership, and much more. The Generation Z Guide's insights are research based and the applications are marketplace tested. Learn from leading companies on how best to attract, engage, and lead Generation Z.

The Open Group Architecture Framework TOGAF™ Version 9

Van Haren The Open Group Architecture Framework (TOGAF) is a framework – a detailed method and a set of supporting tools – for developing an enterprise architecture, developed by members of The Open Group Architecture Forum (www.opengroup.org/architecture). As a comprehensive, open method for enterprise architecture, TOGAF Version 9 complements, and can be used in conjunction with, other frameworks that are more focused on specific aspects of architecture or for vertical sectors such as Government, Defense, and Finance. TOGAF may be used freely by any organization wishing to develop an enterprise architecture for use within that organization (subject to the Conditions of Use). This book is divided into seven main parts : PART I (Introduction) This part provides a high-level introduction to the key concepts of enterprise architecture and in particular the TOGAF approach. It contains the definitions of terms used throughout TOGAF and release notes detailing the changes between this version and the previous version of TOGAF. PART II (Architecture Development Method) This is the core of TOGAF. It describes the TOGAF Architecture Development Method (ADM) – a step-by-step approach to developing an enterprise architecture. PART III (ADM Guidelines & Techniques) This part contains a collection of guidelines and techniques available for use in applying TOGAF and the TOGAF ADM. PART IV (Architecture Content Framework) This part describes the TOGAF content framework, including a structured metamodel for architectural artifacts, the use of re-usable architecture building blocks, and an overview of typical architecture deliverables. PART V (Enterprise Continuum & Tools) This part discusses appropriate taxonomies and tools to categorize and store the outputs of architecture activity within an enterprise. PART VI (TOGAF Reference Models) This part provides a selection of architectural reference models, which includes the TOGAF Foundation Architecture, and the Integrated Information Infrastructure Reference Model (III-RM). PART VII (Architecture Capability Framework) This part discusses the organization, processes, skills, roles, and responsibilities required to establish and operate an architecture function within an enterprise.
