Magic Lantern Guides: Nikon D300

[Sterling Publishing Company, Inc.](#) Simon Stafford, the Technical Editor to the Nikon Owners' Club International's Nikon Owner magazine, tells all about the company's new semi-pro camera, the D300. He explains how to make the most of the model's up-to-the-minute attributes, including the 12.3 effective megapixel Nikon DX-format CMOS image sensor with integrated A/D converter and the increased bit precision of selectable 14-bit NEF (RAW) output.

Speedlights & Speedlites

[CRC Press](#) Canon Speedlites and Nikon Speedlights are small, off-camera flashguns that can provide big results - if you know how to use them properly. Acclaimed Boston photographers Lou Jones, Bob Keenan and Steve Ostrowski guide you through the technical and creative aspects of how to get the most out of these powerful tools in this indispensable guide, packed full of inspirational images and comprehensive diagrams of the lighting set ups used to capture them. They are significantly more advanced, lighter and considerably cheaper than a standard flashgun, and have many advantages. They are small (and cheap) enough that a number can be carried in your kit, and they can be used in combination, triggered wirelessly. They use through-the-lens (TTL) metering, which allows you to use the in-camera LCD and histograms to calculate the required power/direction, rather than having to use a light meter or trial and error. They use proprietary, dedicated technology (from Canon and Nikon) that means there are no compatibility issues. Getting the most out of them, however, remains a mystery - most photographers still just use their speedlights in the same way as a standard flash gun. This is where this book comes in.
