Parentology

Everything You Wanted to Know about the Science of Raising Children but Were Too Exhausted to Ask

Simon and Schuster **An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.**

The Powers of Heaven and Earth

New and Selected Poems

LSU Press Among the papers of the late John Frederick Nims was a group of poems selected by the poet from his more than sixty-year career. The Powers of Heaven and Earth presents that choice verse—generous portions from the eight superbly varied and beautifully crafted collections Nims published between 1947 and 1990. In addition, this incomparably rich volume includes thirty new poems published during Nims's last decade. Rhythmically precise yet delightfully playful, Nims's work bestows on readers those qualities of mind and heart well known to colleagues, students, and friends—his wit, lightly carried erudition, and generosity of spirit. From first to last, there is no falling off. Nims's irrepressible joy in his work constantly illuminates the verse collected here, joining together a lifetime of keen observation with speculation on the nature of eternity.

Fema National Incident Management System Third Edition October 2017

Independently Published This manual, the Federal Emergency Management Agency FEMA National Incident Management System Third Edition October 2017, provides a common, nationwide approach to enable the whole community to work together to manage all threats and hazards. NIMS applies to all incidents, regardless of cause, size, location, or complexity. Communities across the Nation experience a diverse set of threats, hazards, and events. The size, frequency, complexity, and scope of these incidents¹ vary, but all involve a range of personnel and organizations to coordinate efforts to save lives, stabilize the incident, and protect property and the environment. Every day, jurisdictions and organizations work together to share resources, integrate tactics, and act collaboratively. Whether these organizations are nearby or are supporting each other from across the country, their success depends on a common, interoperable approach to sharing resources, coordinating and managing incidents, and communicating information. The National Incident Management System (NIMS) defines this comprehensive approach. NIMS guides all levels of government, nongovernmental organizations (NGO), and the private sector to work together to prevent, protect against, mitigate, respond to, and recover from incidents. NIMS provides stakeholders across the whole community² with the shared vocabulary, systems, and processes to successfully deliver the capabilities described in the National Preparedness System.³ NIMS defines operational systems, including the Incident Command System (ICS), Emergency Operations Center (EOC) structures, and Multiagency Coordination Groups (MAC Groups) that guide how personnel work together during incidents. NIMS applies to all incidents, from traffic accidents to major disasters. The jurisdictions and organizations involved in managing incidents vary in their authorities, management

structures, communication capabilities and protocols, and many other factors. NIMS provides a common framework to integrate these diverse capabilities and achieve common goals. The guidance contained in this document incorporates solutions developed over decades of experience by incident personnel across the Nation.

Collected Scientometrics

This first volume of the scientifically famous "Book of Scientometrics" is unique in the history of science and records in great and accurate detail the meteoric impact of the first successful unified field theory in the history of science, the Einstein Cartan Evans (ECE) unified field theory. This theory has attracted about fifty million readings at the minimum off the internet since May 2002. Volume One of "The Book of Scientometrics" is currently being read at the rate of 3,969 times a year from www.aiaa.us judging by the first eight days of April 2015. It took eleven years to compile from April 30th 2004 to present by daily monitoring with a few exceptions, for example when I was unavoidably detained at Buckingham Palace one summer day in 2010 at the invitation of my distant Tudor cousin Queen Elizabeth II. I decided to eat the cucumber sandwiches instead of doing the stats in the Garden Party. This book is a revolutionary new concept in the measurement of the impact of a theory, given the name "Scientometrics." The phenomenal impact of ECE theory has been recorded in a way that the world of science has never seen before, with its obsolete reliance on citations of things that are often never read. The scientometrics in this book are very carefully filtered and accurately recorded, and are confined to the intellectual elite around the world: universities, institutes, organizations, government departments, prominent corporations, military facilities and so forth. This intellectual elite makes up a tiny 2% of the vast total readership of the theory. The data are made available in this softback for the first time. As Jeff Rense told me in a recent radio broadcast, "Bob Dylan would have been proud of this."

Critical Care Transport

[Jones & Bartlett Learning](#) **Welcome to the new gold standard in critical care transport training. Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), Critical Care Transport offers cutting edge content relevant to any healthcare provider training in critical care transport. Like no other textbook in this market, Critical Care Transport thoroughly prepares medical professionals to function as competent members of a critical care team by covering the material that everyone—paramedics, nurses, physicians, and specialty crew—needs to know to operate effectively in the prehospital critical care environment. This book meets the curricula of major critical care training programs, including University of Maryland, Baltimore County (UMBC). It covers both ground and flight transport, and meets the objectives of critical care transport certification exams such as the Certified Flight Paramedic (FP-C) exam administered by the Board for Critical Care Transport Paramedic Certification. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, trauma, and pharmacology are covered in the context of critical care. Chapters have been authored by leading critical care professionals across the country and represent the most current, state-of-the-art information on management of critical care patients.**

Social Media in Emergency Management

[Createspace Independent Publishing Platform](#) Social media is a new technology that not only allows for another channel of broadcasting messages to the public, but also allows for two way communication between emergency managers and major stakeholder groups. Increasingly the public is turning to social media technologies to obtain up to date information during emergencies and to share data about the disaster in the form of geo data, text, pictures, video, or a combination of these media. Social media also can allow for greater situational awareness for emergency responders. While social media allows for many opportunities to engage in an effective conversation with stakeholders, it also holds many challenges for emergency managers. The purpose of this course is to provide the participants with best practices including tools, techniques and a basic roadmap to build capabilities in the use of social media technologies in their own emergency management organizations (State, local, Tribal) in order to further their emergency response missions. By the end of this course, participants will be able to: Explain why social media is important for emergency management Describe the major functions and features of common social media sites currently used in emergency management Describe the opportunities and challenges of using social media applications during the 5 phases of emergency management Describe better practices for using social media applications during the 5 phases of emergency management Describe the process for building the capabilities and to sustain the use of social media in an emergency management organization (State, local, tribal, territorial)"

Residential Architecture 1945-1970

[Rizzoli International Publications](#) Between 1941 and 1966, Florida became host to sweeping innovations in residential architecture rivaled only by what was happening in California with the Case Study Houses. Florida Modern documents the best work of the era, from Key West to Jacksonville, documenting numerous unsung and unpublished masterpieces by such architects as Paul Rudolph, Gene Leedy, and Rufus Nims. With today's widespread resurgence of interest in "MidCentury Modernism," the houses appear as fresh and contemporary as they did over fifty years ago. Many of the houses have been preserved as they were originally built, with Saarinen chairs and Eames furniture all part of the mise-en-scène. While these houses found their inspiration in part from the philosophies of the Bauhaus, they were quick to incorporate aspects of regional Southern architecture, using verandas, porches, and raised floors to open out to tropical vegetation, and more importantly, cooling breezes. The appeal of many of these homes is the blurring of indoors and outdoors, the connection to the natural environment, and, perhaps even more so today, the eco-conscious spirit that favored local materials and natural ventilation. Easy-to-read and perfect for use in HazMat awareness, operations, and technician-level training courses, this "Operations Plus" book begins by acquainting readers with current laws and regulations, including those governing emergency planning and workplace safety. Subsequent chapters provide in-depth information about personal protective equipment and its limitations; protective actions ranging from site management and rescue through evacuation and decontamination; product control including the use of carbon monoxide detectors; responses to terrorism and terrorist groups; law enforcement activities such as SWAT operations and evidence collection; and more! A key resource for every fire, police, EMS, and industrial responder, **Hazardous Materials Incidents** is one of the few books available today that is modeled on current ways of thinking about HazMat and terrorism responses and operations.

Mission Jupiter

The Spectacular Journey of the Galileo Spacecraft

[Springer Science & Business Media](#) In this exciting story of the Galileo mission to investigate Jupiter, noted astronomer Daniel Fischer weaves together the many disparate facts learned about this most fascinating planet and its satellites. Fischer tells the entire story of Galileo: a behind-the-scenes look at its difficult course from idea to reality; its launch; the problems it encountered early on and how these were resolved; and finally, what will become of the probe. Along the way, the author describes what we have learned about Jupiter, including what the Jovian atmosphere is really like, and the peculiar reality of the planets magnetic field. The story of the journey to Jupiter is combined with interesting details about Galileos capacities and a graphic description of the solar system, with an episode on how Galileo would judge the chances of finding life on Earth. The book concludes with a look at the future, closing on the Cassini probe to Saturn. Beautifully illustrated and well written, **Mission Jupiter** shows us space exploration at its best and clearly and vividly conveys the essential science.

Love by Night

A Book of Poetry

Andrews McMeel Publishing **More of a story than a collection of poetry, Love by Night will whisk you away from your world and into the dreamy romantic night. Love by Night begins with anxious hesitation and nervous attraction, grows into tender affection, blossoms into passionate love, delves deep into whimsical dreams, and finally builds an image of an idyllic future together, as the reader develops along with the two characters of this poetic story. Written as a conversation between two points of view in constant change and flux with each other, this book invites the reader into the conversation about the love that connects one person to another, but also all of us to each other. Through this written testament to the emotional journeys books can take us on, S. K. Williams breaks down stereotypes, sexism, relationship roles, and brings awareness to mental health, grief, anxiety, depression, how to move forward, how to love in a healthy way, and, most of all, how to love yourself when it feels impossible.**
