If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time. **Harley-Davidson XL/XLH Sportster 1986-2003** Haynes Manuals N. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures. **Side Impact and Rollover World Investment Report 2020 International Production Beyond the Pandemic** *United Nations* The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action. **Auto Repair For Dummies** *John Wiley & Sons* Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). [xiii]. **Competitive Ties Subcontracting in the Japanese Automotive Industry** *Columbia University Press* From the preeminent writer of Taiwanese nativist fiction and the leading translator of Chinese literature come these poignant accounts of everyday life in rural and small-town Taiwan. Huang is frequently cited as one of the most original and gifted storytellers in the Chinese language, and these selections reveal his genius. In "The Two Sign Painters," TV reporters ambush two young workers from the country taking a break atop a twenty-four-story building. "His Son's Big Doll" introduces the tortured soul inside a walking advertisement, and in "Xiaoqi's Cap" a dissatisfied pressure-cooker salesman is fascinated by a young schoolgirl. Huang's characters -- generally the uneducated and disadvantaged who must cope with assaults on their traditionalism, hostility from their urban brethren and, of course, the debilitating effects of poverty -- come to life in all their human uniqueness, free from idealization. **The Nature of the Japanese State Rationality and Rituality** *Psychology Press* In this adventurous new study, Brian J. McVeigh demonstrates how nominally conflicting impressions of Japan can be reconciled by a greater understanding of the state - revealing flaws in current intellectual discourse. **Like a Bride And Like a Mother** "Oshinica's family thwarts her desire to enter the university and instead she's pushed into marriage at age seventeen. Children follow quickly, four in all, and into the 1960s Oshinica tries to be a dutiful wife and mother while continuing to be an obedient daughter. But the insular Jewish neighborhood that sheltered and defined her life is impinged upon as modernity transforms Mexico City." "Seeing films like the Fellini movie *8 1/2* and experiencing a culturally changing capital city sets her on a quest for her own voice and space." "Eventually she separates and divorces, supports herself as a commercial photographer, and enrolls in a creative writing course taught by Elena Poniatowska, one of Mexico's most prominent women authors."--Jacket. **Reshaping the North American automobile industry restructuring, corporatism, and union democracy in Mexico** **Employment and work relations in context** *Routledge* This work examines the responses of unions and workers to regional integration and restructuring in the automobile industry in North and Central America. The focus is on the automobile industry in Mexico, which, because of its size and importance, is viewed as a strategic sector of the Mexican economy and was the focal point of talks between the US, Canada and Mexico during negotiations on NAFTA. Focusing on the period from 1980, John P. Tuman examines the changes

implemented by firms to promote export production, he explores reasons for the variation in labour responses to restructuring, and he discusses the prospects for cross-border organizing and co-operation among automobile workers in Canada, the US and Mexico.
