### The Untold Story of the PLATO System and the Dawn of Cyberculture

Vintage At a time when Steve Jobs was only a teenager and Mark Zuckerberg wasn't even born, a group of visionary engineers and designers--some of them only high school students--in the late 1960s and 1970s created a computer system called PLATO, which was light-years ahead in experimenting with how people would learn, engage, communicate, and play through connected computers. Not only did PLATO engineers make significant hardware breakthroughs with plasma displays and touch screens but PLATO programmers also came up with a long list of software innovations: chat rooms, instant messaging, message boards, screen savers, multiplayer games, online newspapers, interactive fiction, and emoticons. Together, the PLATO community pioneered what we now collectively engage in as cyberculture. They were among the first to identify and also realize the potential and scope of the social interconnectivity of computers, well before the creation of the internet. PLATO was the foundational model for every online community that was to follow in its footsteps. The Friendly Orange Glow is the first history to recount in fascinating detail the remarkable accomplishments and inspiring personal stories of the PLATO community. The addictive nature of PLATO both ruined many a college career and launched pathbreaking multimillion-dollar software products. Its development, impact, and eventual disappearance provides an instructive case study of technological innovation and disruption, project management, and missed opportunities. Above all, The Friendly Orange Glow at last reveals new perspectives on the origins of social computing and our internet-infatuated world.

### 15th International Symposium ISMIS 2005, Saratoga Springs, NY, USA, May 25-28, 2005, Proceedings

Springer Science & Business Media This book constitutes the refereed proceedings of the 15th International Symposium on Methodologies for Intelligent Systems, ISMIS 2005, held in Saratoga Springs, NY, USA in May 2005. The 69 revised full papers presented together with 2 invited papers were carefully reviewed and selected from close to 200 submissions. The papers are organized in topical sections on knowledge discovery and data mining, intelligent information systems, information and knowledge integration, soft computing, clustering, Web data processing, AI logics, applications, intelligent information retrieval, and knowledge representation.

## InfoWorld

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

## Network World

For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

## The Past, Present, and Future of the Digital University

[Taylor & Francis](#) Online Education Policy and Practice examines the past, present, and future of networked learning environments and the changing role of faculty within them. As digital technologies in higher education increasingly enable blended classrooms, collaborative assignments, and wider student access, an understanding of the creation and ongoing developments of these platforms is needed more than ever. By investigating the history of online education, the rise and critique of MOOCs, the mainstreaming of social media, mobile devices, gaming in instruction, and more, this expansive book outlines a variety of potential scenarios likely to become realities in higher education over the next decade.

## Electronic Collaboration in the Humanities

## Issues and Options

[Routledge](#) This volume provides an informed view of how information technology is shaping the contemporary humanities. It specifically reflects five ideals: \*humanities scholars with all levels of access are doing important work with technology; \*humanities scholars' projects with technology reflect significant diversity, both across and within disciplinary bounds; \*using information technology in the humanities is a continuous conversation; \*information technology offers new options for humanities education; and \*just as collaboration changes the nature of any project, so does information technology change the nature of collaboration--its speed, character, methods, and possible implementations. The first to explore new and important ways for humanities scholars to collaborate across disciplines via electronic media, this book redefines electronic collaboration; presents insightful models of student collaboration; provides important models of faculty collaboration with special emphasis on professional development; and offers a look at the future of electronic collaboration and the overall future of the humanities. Featuring the voices of humanities teacher-scholars at all stages of their professional careers, the chapters emphasize pedagogy, outlining contemporary issues and options. Electronic Collaboration in the Humanities speaks directly to anyone involved with interdisciplinary initiatives in colleges and universities, such as writing across the curriculum and communication across the curriculum programs, and to specific populations within the humanities, including literacy and technology, language and literature, literacy studies, professional writing, and English education.

## Environmental Management Accounting for Cleaner Production

[Springer Science & Business Media](#) Sustainability requires companies to develop in an economically, environmentally and socially sustainable manner. Corporate sustainable development in turn requires movement towards cleaner production. In order to recognize the potential from cleaner production - reduced costs and fewer environmental impacts through the reduced use of materials - environmental management accounting (EMA) is a necessary information management tool. Environmental Management Accounting for Cleaner Production reveals a set of tools for companies to collect, evaluate and interpret the information they need to estimate their potential to use cleaner production to realize cost savings and to make the best decisions about the available cleaner production options. EMA is therefore the key for driving environmental progress, cost savings, increased competitiveness and corporate sustainability through the means of cleaner production.

## Clinician's Guide to Psychopharmacology

[Springer Nature](#) This book employs a direct and clear approach to understanding the medications used in the treatment of psychiatric disorders. A range of areas, such as prescription errors, dosage modification in renal and hepatic dysfunction, augmentation strategies in treatment resistant patients, and recent findings from various clinical trials are addressed. Given its clear, straightforward approach, the book will be a valuable guide for all clinicians working with patients with psychiatric illness.

## Computer-assisted Instruction

### A Synthesis of Theory, Practice, and Technology

**Routledge** This volume presents a theoretical framework and background for designing computer-assisted instruction (CAI). Its goal is to synthesize theoretical and applied research in CAI-relevant fields including theories of learning and instruction, systems for instructional design, and experience with CAI. Building on this knowledge, the book shows how computer technology interacts with instruction to influence the design of effective lessons. Designers, practitioners, and students of CAI and computer-based training (CBT) should find this text very helpful in developing a better understanding of the potential and limitations of computers as tutors.

History of Computing in Education

IFIP 18th World Computer Congress, TC3 / TC9 1st Conference on the History of Computing in Education 22–27 August 2004 Toulouse, France

**Springer** This work derives from a conference discussing the history of computing in education. This conference is the first of hopefully a series of conferences that will take place within the International Federation for Information Processing (IFIP) and hence, we describe it as the First Conference on the History of Computing in Education (HCE1). These proceedings represent a collection of works presented at the HCE1 Conference held in association with the IFIP 2004 World Computer Congress held in Toulouse, France. Contributions to this volume range from a wide variety of educational perspectives and represent activities from four continents. The HCE1 conference represents a joint effort of the IFIP Working Group 9.7 on the History of Computing and the IFIP Technical Committee 3 on Education. The HCE1 Conference brings to light a broad spectrum of issues and spans four continents. It illustrates topics in computing education as they occurred in the "early days" of computing whose ramifications or overtones remain with us today. Indeed, many of the early challenges remain part of our educational tapestry; most likely, many will evolve into future challenges. Therefore, this work provides additional value to the reader as it will reflect in part the future development of computing in education to stimulate new ideas and models in educational development.

Bud, Not Buddy

**Delacorte Books for Young Readers** The Newbery Medal and Coretta Scott King Award-winning classic about a boy who decides to hit the road to find his father—from Christopher Paul Curtis, author of *The Watsons Go to Birmingham—1963*, a Newbery and Coretta Scott King Honoree. It's 1936, in Flint Michigan. Times may be hard, and ten-year-old Bud may be a motherless boy on the run, but Bud's got a few things going for him: 1. He has his own suitcase full of special things. 2. He's the author of Bud Caldwell's Rules and Things for Having a Funner Life and Making a Better Liar Out of Yourself. 3. His momma never told him who his father was, but she left a clue: flyers advertising Herman E. Calloway and his famous band, the Dusky Devastators of the Depression!!!!!! Bud's got an idea that those flyers will lead him to his father. Once he decides to hit the road to find this mystery man, nothing can stop him—not hunger, not fear, not vampires, not even Herman E. Calloway himself. AN ALA BEST BOOK FOR YOUNG ADULTS AN ALA NOTABLE CHILDREN'S BOOK AN IRA CHILDREN'S BOOK AWARD WINNER NAMED TO 14 STATE AWARD LISTS "The book is a gem, of value to all ages, not just the young people to whom it is aimed." —The Christian Science Monitor "Will keep readers engrossed from first page to last." —Publishers Weekly, Starred "Curtis writes with a razor-sharp intelligence that grabs the reader by the heart and never lets go. . . . ### Understanding Virtual Universities

**Intellect Books** "The purpose of this book is to help academics from all disciplines take full advantage of IT. Anticipating a future in which distance learning and virtual reality tutoring systems play a central role in university teaching, Roy Rada provides guidelines for making best use of such technological opportunities." "The chapters cover: distance learning for individual students; groups in classrooms - focusing on interactive technology; the university as a whole; and emerging market forces in Higher Education and training for industry. Unlike competing books that focus on specific aspects of the subject, *Understanding Virtual Universities* combines managerial, social and technical issues, to provide a comprehensive approach to Information Technology for Higher Education."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. ### The Impact of Bilingual Treatment on the Math Skills of Hispanic High School Algebra Students

This dissertation was designed to measure the impact of partly bilingual instructional techniques in the Foundations of Algebra classroom to communicate math concepts to Hispanic students in an English-speaking classroom. Two consecutive years of failing to meet anticipated yearly growth among Hispanic students in Algebra I, as determined by the North Carolina End of Course exams, had highlighted the situation which this research was designed to improve. The writer developed a controlled experiment which was implemented in Algebra classes in a North Carolina high school. (a) The control group used Microsoft PowerPoint slides created for every lesson plan determined by the school system's pacing guide over the one-semester course, based on the adopted Algebra I textbook (Prentice-Hall, 2004), with supplemental worksheets from the same publisher's accompanying study guide and workbook. (b) The treatment group used the same PowerPoint slides as the control group, with the addition of Spanish subtitles for key words and concepts presented during the lesson introduction. The subtitles were a smaller font and in a different color. Upon completion of the instruction, Hispanic students were allowed to form monolingual working groups to delve into application. Their worksheets came from the same source but were in Spanish. (c) The researcher examined differences in cognitive domain of both groups using analysis of variance (ANOVA) in pre-test and post-test data from the software NovaNet, as well as data from county-wide semester-final exams. Changes in attitudes regarding mathematics as determined by a student questionnaire were compared with frequency distribution on answers to test questions. Changes in classroom climate were assessed using the Classroom Environment Scale and teacher interviews. (d) The treatment group, [comma uncertain] which exercised the greatest fidelity in experimental guidelines, showed greatest gains in math application skills, while expressing feelings of stronger class affiliation, teacher support, and rule clarity.

## Supporting Early Career Teachers With Research-Based Practices

**IGI Global** Teachers in their first few years of their teaching career require high quality, structured support to begin the journey towards becoming experts. Establishing research-based best practices and working habits set up early career teachers for a fulfilling and successful career. The requirements of teachers are constantly changing, and teachers need to continually adapt their knowledge and practices to fit schools' changing demographics. Having a toolbox of research-based best practices to draw upon can support early career teachers as they move from theory to practical application when the learning curve is the steepest. Strengthening the system of support includes increasing teachers' influence over their day-to-day work and developing positive and supportive cultures of learning. *Supporting Early Career Teachers With Research-Based Practices* presents both theoretical and practical research to support the conceptual understanding of educational praxis for common areas with which early career educators may require additional expertise or support. This book is intended to be a valuable contribution to the body of literature in the field of education by supplying research-based teaching practices for modern education. Primary topics covered include professional learning, classroom management, student-teacher relationships, teaching diverse students and inclusive educational practices, and teacher self-care strategies. This book is a valuable reference tool for early career teachers of all subject areas and grade levels, school administrators, teacher mentors and guides, education faculty in higher education, educational researchers, curriculum developers, instructional facilitators, practicing teachers, pre-service teachers, professional development coordinators, teacher educators, researchers, academicians, and students interested in teaching practices and support for the early career teacher.

## International Handbook of Teachers and Teaching

**Springer Science & Business Media** Recent years have generated a huge increase in the number of research and scholarly works concerned with teachers and teaching, and this effort has generated new and important insights that are crucial for understanding education today. This handbook provides a host of chapters, written by leading authorities, that review both the major traditions of work and the newest perspectives, concepts, insights, and research-based knowledge concerned with teachers and teaching. Many of the chapters discuss developments that are international in scope, but coverage is also provided for education in a number of specific countries. Many chapters also review contemporary problems faced by educators and the dangers posed by recent, politically-inspired attempts to 'reform' schools and school systems. The Handbook provides an invaluable resource for scholars, teacher-educators, graduate students, and all thoughtful persons concerned with the best thinking about teachers and teaching, current problems, and the future of education.
