Imperial Visions

Nationalist Imagination and Geographical Expansion in the Russian Far East, 1840–1865

Cambridge University Press In the middle of the nineteenth century, the Russian empire made a dramatic advance on the Pacific by annexing the vast regions of the Amur and Ussuri rivers. Although this remote realm was a virtual terra incognita for the Russian educated public, the acquisition of an 'Asian Mississippi' attracted great attention nonetheless, even stirring the dreams of Russia's most outstanding visionaries. Within a decade of its acquisition, however, the dreams were gone and the Amur region largely abandoned and forgotten. In an innovative examination of Russia's perceptions of the new territories in the Far East, Mark Bassin sets the Amur enigma squarely in the context of the Zeitgeist in Russia at the time. Imperial Visions demonstrates the fundamental importance of geographical imagination in the mentalité of imperial Russia. This 1999 work offers a truly novel perspective on the complex and ambivalent ideological relationship between Russian nationalism, geographical identity and imperial expansion.

The World Bank Legal Review, Volume 5

Fostering Development through Opportunity, Inclusion, and Equity

World Bank Publications This volume explores the potentially transformative role of effective laws and legal institutions in providing people with more opportunity that is both inclusive and equitable.

Love You to Death ð Season 4

The Unofficial Companion to The Vampire Diaries

ECW Press With a foreword by co-creator Julie Plec, the fan-favorite Love You to Death series returns with an essential guide to the fourth season of The CW's hit show The Vampire Diaries. This season four companion delves headlong into the twists and turns of each episode, exploring the layers of rich history, supernatural mythology, historical and pop culture references, and the complexities and motivations of the show's memorable cast of characters. Add expanded chapters on the making of the show, the people who bring the world of Mystic Falls to life, and the intensely loyal audience that keeps it thriving, and you have a guide as compelling and addictive as the show itself. Features exclusive interviews with: co-creator Julie Plec, executive producer Caroline Dries, writer Jose Molina, producer Pascal Verschooris, director Joshua Butler, cinematographer Dave Perkal, editor Tyler Cook, and composer Michael Suby.

A Confederacy of Heretics

J. Paul Getty Museum A Confederacy of Heretics examines the explosion of activity associated with the Architecture Gallery, the first gallery in Los Angeles dedicated exclusively to architecture. Instigated by Thom Mayne in the fall of 1979, the Architecture Gallery staged ten exhibitions in as many weeks by both young and established Los Angeles practitioners, featuring the work of Eugene Kupper, Roland Coate, Jr., Frederick Fisher, Frank Dimster, Frank Gehry, Peter de Bretteville, Morphosis (Thom Mayne and Michael Rotondi), Studio Works (Craig Hodgetts and Robert Mangurian), and Eric Owen Moss. Another young architect, Coy Howard,

opened the events with a lecture at the Southern California Institute of Architecture, which hosted talks by each exhibiting architect. In an unprecedented move by the popular press, the events were chronicled in weekly reviews by the critic John Dreyfuss in the Los Angeles Times. Gathering an array of original drawings, models, photographs, video recordings, and commentary alongside new assessments by current scholars, A Confederacy of Heretics aims neither to canonize the participating architects nor to consecrate their unorthodox activities. Rather, the book re-examines the early work of some of Los Angeles' most well-known architects, charts the development of their most potent design techniques, and documents a crucial turning point in Los Angeles architecture, a time when Angeleno architecture culture shifted from working local variations on imported themes to exporting highly original disciplinary innovations with global reach. Taken together, the exhibition, symposium, and catalog that comprise A Confederacy of Heretics offer a unique lens through which to analyze a pivotal moment in the development of late twentieth-century architecture.

Gender Across Languages

The Linguistic Representation of Women and Men

John Benjamins Publishing This is the second of a three-volume comprehensive reference work on "Gender across Languages", which provides systematic descriptions of various categories of gender (grammatical, lexical, referential, social) in 30 languages of diverse genetic, typological and socio-cultural backgrounds. Among the issues discussed for each language are the following: What are the structural properties of the language that have an impact on the relations between language and gender? What are the consequences for areas such as agreement, pronominalisation and word-formation? How is specification of and abstraction from (referential) gender achieved in a language? Is empirical evidence available for the assumption that masculine/male expressions are interpreted as generics? Can tendencies of variation and change be observed, and have alternatives been proposed for a more equal linguistic treatment of women and men? This volume (and the previous two volumes) will provide the much-needed basis for explicitly comparative analyses of gender across languages. All chapters are original contributions and follow a common general outline developed by the editors. The book contains rich bibliographical and indexical material. Languages of Volume 2: Chinese, Dutch, Finnish, Hindi, Icelandic, Italian, Norwegian, Spanish, Vietnamese, Welsh.

Urbanism As a Way of Life

Irvington Pub

International Complete Collection of R&D Information about Traditional Chinese Materia Medica and Biotechnology Enterprises

World Scientific The International Complete Collection of R&D Information about Traditional Chinese Materia Medica (TCMM) and Biotechnology (BT) Enterprises is designed as an informative medicinal reference directory listing of up-to-date R&D information about TCMM, medical biotechnology, and related medical equipment companies. The focus of this valuable and practical directory is on providing a comprehensive coverage of the most recent developments in scientific research, patents and major products of about 3,000 companies from 50 countries covering the five continents: Asia, Europe, America, Africa and the Oceania. The resource material and information are relevant and compulsory to practitioners and professionals in the fields of TCMM, medical biotechnology, biochemical industry and related medical instrumentation/equipment, as well as to organizational departments of the medicinal information management, intelligence, logistics and trade. The directory also opens up and serves as an important window through which biotech professionals master product information of their counterparts across the world. The directory will benefit professionals of medical health, TCMM, biotechnology and related fields, as well as academics and students, executives of research, information media staffs and translators.

The Utilization of Bioremediation to Reduce Soil

Contamination: Problems and Solutions

Springer Science & Business Media Traditional reliance on chemical analysis to understand the direction and extent of treatment in a bioremediation process has been found to be inadequate. Whereas the goal of bioremediation is toxicity reduction, few direct, reliable measures of this process are as yet available. Another area of intense discussion is the assessment of market forces contributing to the acceptability of bioremediation. Finally, another important component is a series of lectures and lively exchanges devoted to practical applications of different bioremediation technologies. The range of subjects covers a wide spectrum, encompassing emerging technologies as well as actual, full-scale operations. Examples discussed include landfarming, biopiling, composting, phytoremediation and mycoremediation. Each technology is explored for its utility and capability to provide desired treatment goals. Advantages and limitations of each technology are discussed. The concept of natural attenuation is also critically evaluated since in some cases where time to remediation is not a significant factor, it may be an alternative to active bioremediation operations.

Dietary Phytochemicals

A Source of Novel Bioactive Compounds for the Treatment of Obesity, Cancer and Diabetes

Springer Nature This book presents comprehensive coverage on the importance of good nutrition in the treatment and management of obesity, cancer and diabetes. Naturally occurring bioactive compounds are ubiquitous in most dietary plants available to humans and provide opportunities for the management of diseases. The text provides information about the major causes of these diseases and their association with nutrition. The text also covers the role of dietary phytochemicals in drug development and their pathways. Later chapters emphasize novel bioactive compounds as anti-diabetic, anti-cancer and anti-obesity agents and describe their mechanisms to regulate cell metabolism. Written by global team of experts, Dietary Phytochemicals: A Source of Novel Bioactive Compounds for the Treatment of Obesity, Cancer and Diabetes describes the potentials of novel phytochemicals, their sources, and underlying mechanism of action. The chapters were drawn systematically and incorporated sequentially to facilitate proper

understanding. This book is intended for nutritionists, physicians, medicinal chemists, drug developers in research and development, postgraduate students and scientists in area of nutrition and life sciences.

Biochemistry of Antimicrobial Action

Springer The rapid advances made in the study of the synthesis, structure and function of biological macromolecules in the last fifteen years have enabled scientists concerned with antimicrobial agents to achieve a considerable measure of understanding of how these substances inhibit cell growth and division. The use of antimicrobial agents as highly specific inhibitors has in turn substantially assisted the investigation of complex biochemical processes. The literature in this field is so extensive however, that we considered an attempt should be made to draw together in an introductory book the more significant studies of recent years. This book, which is in fact based on lecture courses given by us to undergraduates at Liverpool and Manchester Universities, is therefore intended as an introduction to the biochemistry of antimicrobial action for advanced students in many disciplines. We hope that it may also be useful to established scientists who are new to this area of research. The book is concerned with a discussion of medically important antimicrobial compounds and also a number of agents that, although having no medical uses, have proved invaluable as research tools in biochemistry. Our aim has been to present the available information in a simple and readable way, emphasizing the established facts rather than more controversial material. Whenever possible, however, we have indicated the gaps in the present knowledge of the subject where further information is required.

Introduction to Radar Using Python and MATLAB

Artech House This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the

tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

History of Medicine

A Scandalously Short Introduction

University of Toronto Press Jacalyn Duffin's *History of Medicine* has for ten years been one of the leading texts used to teach medical and nursing students the history of their profession. It has also been widely used in history courses and by general readers. An accessible overview of medical history, this new edition is greatly expanded, including more information on medicine in the United States, Great Britain, and in other European countries. The book continues to be organized conceptually around the major fields of medical endeavor such as anatomy, pharmacology, obstetrics, and psychiatry and has grown to include a new chapter on public health. Years of pedagogic experience, medical developments, and reader feedback have led to new sections throughout the book on topics including bioethics, forensics, genetics, reproductive technology, clinical trials, and recent outbreaks of BSE, West Nile Virus, SARS, and anthrax. Up to date and filled with pithy examples and teaching tools such as a searchable online bibliography, *History of Medicine* continues to demonstrate the power of historical research to inform current health care practice and enhance cultural understanding.

Mood Mapping

Plot your way to emotional health and happiness

Pan Macmillan Mood mapping simply involves plotting how you feel against your energy levels, to determine your current mood. Dr Liz Miller then gives you the tools you need to lift your low mood, so improving your mental health and wellbeing. Dr Miller developed this technique as a result of her own diagnosis of bipolar disorder (manic depression), and of overcoming it, leading her to seek ways

to improve the mental health of others. This innovative book illustrates: * The Five Keys to Moods: learn to identify the physical or emotional factors that affect your moods * The Miller Mood Map: learn to visually map your mood to increase self-awareness * Practical ways to implement change to alleviate low mood Mood mapping is an essential life skill; by giving an innovative perspective to your life, it enables you to be happier, calmer and to bring positivity to your own life and to those around you. 'A gloriously accessible read from a truly unique voice' Mary O'Hara, Guardian 'It's great to have such accessible and positive advice about our moods, which, after all, govern everything we do. I love the idea of MoodMapping' Dr Phil Hammond 'Can help you find calm and take the edge off your anxieties' Evening Standard 'MoodMapping is a fantastic tool for managing your mental health and taking control of your life' Jonathan Naess, Founder of Stand to Reason

Vogue x Music

Abrams Vogue has always been on the cutting edge of popular culture, and Vogue x Music shows us why. Whether they're contemporary stars or classic idols, whether they made digital albums or vinyl records, the world's most popular musicians have always graced the pages of Vogue. In this book you'll find unforgettable portraits of Madonna beside David Bowie, Kendrick Lamar, and Patti Smith; St. Vincent alongside Debbie Harry, and much more. Spanning the magazine's 126 years, this breathtaking book is filled with the work of acclaimed photographers like Richard Avedon and Annie Leibovitz as well as daring, music-inspired fashion portfolios from Irving Penn and Steven Klein. Excerpts from essential interviews with rock stars, blues singers, rappers, and others are included on nearly every page, capturing exactly what makes each musician so indelible. Vogue x Music is a testament to star power, and proves that some looks are as timeless as your favorite albums.

The Mediterranean Sea

Temporal Variability and Spatial Patterns

John Wiley & Sons Surface, intermediate, and deep-water processes and their interaction in time and space drive the major ocean circulation of the Mediterranean Sea. All major forcing mechanisms, such as surface wind forcing, buoyancy fluxes, lateral mass exchange, and deep convection determining the global oceanic circulation are present in this body of water. Deep and intermediate water masses are formed in different areas of the ocean layers and they drive the Mediterranean thermohaline cell, which further shows important analogies with the global ocean conveyor belt. The Mediterranean Sea: Temporal Variability and Spatial Patterns is a comprehensive volume that investigates the temporal and spatial variability patterns in the ocean basin. Volume highlights include: Discussions of state-of-the-art physical and biogeochemical properties of the Mediterranean Sea Multiple physical ocean circulation processes, both in time and spatial scales (basin, sub-basin, and mesoscale) How different regional phenomena in the sea influence the biogeochemistry of the basin and the ocean dynamics Spatio-temporal variability of the surface circulation in the western Mediterranean Deep-water variability and inter-basin interactions in the eastern Mediterranean Sea Understanding the link between global ocean circulation patterns and the global climate The Mediterranean Sea will be a valuable resource for geoscientists, oceanographers, and meteorologists.

Scalia Dissents

Writings of the Supreme Court's Wittiest, Most Outspoken Justice

Simon and Schuster Brilliant. Colorful. Visionary. Tenacious. Witty. Since his appointment to the Supreme Court in 1986, Associate Justice Antonin Scalia has been described as all of these things and for good reason. He is perhaps the best-known justice on the Supreme Court today and certainly the most controversial. Yet most Americans have probably not read even one of his several hundred Supreme Court opinions. In *Scalia Dissents*, Kevin Ring, former counsel to the U.S. Senate's Constitution Subcommittee, lets Justice Scalia speak for himself. This volume—the first of its kind— showcases the quotable justice's take on many of today's most contentious constitutional debates. *Scalia Dissents* contains over a dozen of the justice's most compelling and controversial opinions. Ring also provides helpful background on the opinions and a primer on Justice Scalia's judicial philosophy. *Scalia Dissents* is the perfect book for readers who love scintillating prose and penetrating insight on the most important constitutional issues of our time.

Honeyball and Bowers' Textbook on Employment Law

Oxford University Press Succinct in its treatment of the fundamentals, and interwoven with contextual explanation and analytical consideration of the key debates, Honeyball and Bowers' Textbook on Employment Law continues to provide readers with an accessible account of the subject. Including chapter introductions and new end-of-chapter summaries, students of employment law are guided through the intricacies, while further reading suggestions assist with independent research and essay preparation. The critical elements of individual and collective employment law are considered along with treatment of the relationship between UK and EU law, to give readers a wider view of the issues.

Affirmation

The AIDS Odyssey of Dr. Peter

When Peter Jepsen-Young introduced himself to the dinner-hour TV news audience, nobody foresaw that his AIDS Diary would become a two-year, 111-episode series that would bring him worldwide recognition, including an Oscar nomination, as "Dr. Peter," the charming and articulate public educator on AIDS and gay rights. David Gawthrop interviewed Peter Jepsen-Young's family, friends, lovers, and colleagues, and in AFFIRMATION, he introduces readers to the man behind Dr. Peter. -- adapted from back cover

A Key to Portable Software

And Then I Danced

Traveling the Road to LGBT Equality

Akashic Books A gay-rights pioneer shares his stories, from Stonewall to dancing with his husband at the White House, in a memoir full of "funny anecdotes and heart" (Publishers Weekly). On December 11, 1973, Mark Segal disrupted a live broadcast of the CBS Evening News when he sat on the desk directly between the camera and news anchor Walter Cronkite, yelling, "Gays protest CBS

prejudice!” He was wrestled to the studio floor by the stagehands on live national television, thus ending LGBT invisibility. But this one victory left many more battles to fight, and creativity was required to find a way to challenge stereotypes. Mark Segal's job, as he saw it, was to show the nation who gay people are: our sons, daughters, fathers, and mothers. This is a memoir of one man's role in modern LGBT history, from being on the scene of the Stonewall riots, to getting kicked off a 1970s TV show for dancing with another man—and then, decades later, dancing with his husband at a White House event for Gay Pride. “[Segal] vividly describes his firsthand experience as a teenager inside the Stonewall bar during the historic riots, his participation with the Gay Liberation Front, and amusing encounters with Elton John and Patti LaBelle....A jovial yet passionately delivered self-portrait inspiring awareness about LGBT history from one of the movement's true pioneers.”—Kirkus Reviews “The stories are interesting, unexpected, and witty.”—Library Journal “Much this book focuses on his work, but the more telling pages are filled with love gained and lost, raising other people's children, finding himself, and aging in the gay community. A must-read.”—The Advocate

Harm Reduction

National and International Perspectives

SAGE Harm reduction programmes accept the reality of drug use while attempting to reduce its harmful consequences to individuals and society. Here, contributors discuss the philosophical basis and history of such policies and examine their outcomes.

Slave Stealers

True Accounts of Slave Rescues: Then and Now

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.
