A Guide for the Penetration Tester

No Starch Press Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to:

- Build an accurate threat model for your vehicle
- Reverse engineer the CAN bus to fake engine signals
- Exploit vulnerabilities in diagnostic and data-logging systems
- Hack the ECU and other firmware and embedded systems
- Feed exploits through infotainment and vehicle-to-vehicle communication systems
- Override factory settings with performance-tuning techniques
- Build physical and virtual test benches to try out exploits safely

Automotive Machining

A Guide to Boring, Decking, Honing & More

CarTech Inc Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.

The Rise and Fall of the Western on Television

McFarland Publishing In June 1949, Hopalong Cassidy. Then Roy Rogers, the Lone Ranger, Zorro, Davy Crockett, the Cisco Kid, Matt Dillon, Bat Masterson, the Cartwrights, Hec Ramsey, Paladin ("Have Gun Will Travel")-no television genre has generated as many enduring characters as the Western. Gunsmoke, Death Valley Days, Bonanza, Maverick, and Wagon Train are just a few of the small-screen oaters that became instant classics. Recent years have seen a resurgence, with shows such as Lonesome Dove and The Young Riders updating and redefining the genre for a modern audience. Though the characters were different, Western shows' format often fell into one of several broad categories: marshals, sheriffs and other lawmen, wagon trains, cattle drives and ranchers, bounty hunters, gamblers and hired guns, and even spoofs. Arranged by categories, over 150 television Westerns are analyzed here, focusing on the characters, stories and why the shows succeeded or failed. How Native Americans have been portrayed is examined, as are such phenomena as single parent families (in shows such as The Big Valley, The Rifleman and Bonanza), women, Asians and blacks.

Planning a Wilderness

Regenerating the Great Lakes Cutover Region

U of Minnesota Press "By 1910, the forest region of the Great Lakes states was largely denuded, logged over by industrialists who coveted its timber, particularly the giant white pine. After unsuccessful attempts to farm this "cutover" region of Minnesota, Wisconsin, and Michigan, a group of visionaries began to dream of restoring the North Woods as a place of solace and beauty, of recreation and retreat, for the benefit of people ever more remote from the splendors of nature. What ensued was an extraordinary campaign to recreate the original Midwest forest - the Great Lakes Crusade that James Kates chronicles in this enlightening, deeply interesting, and entertaining account of a "natural" wonderland remade from the ground up."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Smokechaser

In the 1940s, the Clearwater Forest, a vast wilderness area in northern Idaho, was watched over by a unique breed of men - fire lookouts. It was an isolated, lonely life that was not for everyone. Warren J. Yahr came to Idaho as a teenager to work for the Forest Service and became a lookout in the remote Bungalow Ranger Station 28 miles from Pierce, Idaho, near the North Fork of the Clearwater River. In Smokechaser, he recalls his experiences during the years he worked as a lookout watching over large stands of virgin fir, pine, hemlock, cedar, and spruce. In the early 1940s, no commercial logging had yet been done in the Bungalow District, parts of which had burned off in the fire of 1910 and were just recovering. Mr. Yahr describes his experiences as a lookout - the struggles of daily life and the joys of wilderness living. He recalls the dangers of being lost in a snowstorm, befriending wildlife, and enjoying the remote wilderness. His experiences are told with enchanting good humor and give readers a unique opportunity to learn firsthand about this chapter of Idaho history.
