The Voyage of the CSS Shenandoah A Memorable Cruise University Alabama Press "The Confederate cruiser Shenandoah was the last of a group of commerce raiders deployed to prey on Union merchant ships. Ordered to the Pacific Ocean to "greatly damage and disperse" the Yankee whaling fleet in those waters, the Shenandoah's successful pursuit of her quarry compares favorably with the exploits of the more celebrated Alabama and Florida but has never been as well known because it coincided with the war's end. It was, however, one of the best documented naval expeditions - from England to the Indian Ocean, Australia and the South Pacific, the Bering Sea, San Francisco, and finally to port in Liverpool - during the Civil War."--BOOK JACKET.

Russian Motor Vehicles Soviet Limousines 1930-2003 Veloce Publishing Ltd A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where

the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject. Runways & Racers Sports Car Races Held on Military Airfields in America 1952-1954 Veloce Publishing Ltd Runways and Racers concentrates on the short transitional period, 1952-1954, for sports car racing in America following the ban on public road racing in many of the States. The ban left the rapidly expanding Sports Car Club of America with a problem: where to hold races. At precisely the same time, Curtis LeMay, head of Strategic Air Command, was having problems obtaining funds from Congress to improve conditions on the many air bases located around the country. The solution was a marriage of convenience, whereby the SCCA was allowed access to active SAC air bases to hold its race programmes. In return, the SAC base would receive the net profits from the event, which would be put into the Airmen's Living Improvement Fund. As a result of some initial financial success for the SAC bases, the scheme was also adopted by non-SAC bases together with regional clubs, with the same agreement in place. Complaints from airmen alerted Congressman Errett Scrivner to potential irregularities, and he ordered an audit to be

conducted to ascertain precisely what it was costing the air bases to host the races. His findings led to the cessation of the races, ordered by Congress. The product of a long period of extensive research by the author, this book gives a fascinating insight into this two-year period, complemented by over 150 period pictures, many previously unpublished.

Vaschel has a remarkable connection with animals; Richard can tell the weight of any item he lifts to the nearest tenth of a pound; two-year-old Hannah detected a dangerously faulty electrical circuit in her family home; and eight-year-old Clark became conversant in French after only an evening's study. What connects these individuals? They all have AS. John M. Ortiz celebrates the qualities of individuals with AS he has met through his clinical experience, including their characteristic tenacity, honesty, and attention to detail, and looks also at the wide range of careers they have chosen and in which they flourish. This uplifting book should be read and enjoyed by anyone who knows or works professionally with individuals with AS, and anyone with an interest in the subject. **Assessment of Fuel Economy Technologies for Light-Duty Vehicles** National Academies Press Various combinations of commercially available technologies could greatly reduce fuel consumption in passenger cars, sport-utility vehicles, minivans, and other light-duty vehicles without compromising vehicle performance or safety. **Assessment of Technologies for Improving Light Duty Vehicle Fuel Economy** estimates the potential fuel savings and costs to consumers of available technology combinations for three types of engines: spark-ignition gasoline, compression-ignition diesel, and hybrid. According to its estimates, adopting the full combination of improved technologies in medium and large cars and pickup trucks with spark-ignition engines could reduce fuel consumption by 29 percent at an additional cost of \$2,200 to the consumer. Replacing spark-ignition engines with diesel engines and components would yield fuel savings of about 37 percent at an added cost of approximately \$5,900 per vehicle, and replacing spark-ignition engines with hybrid engines and components would reduce fuel consumption by 43 percent at an increase of \$6,000 per vehicle. The book focuses on fuel consumption--the amount of fuel consumed in a given driving distance--because energy savings are directly related to the amount of fuel used. In contrast, fuel economy measures how far a vehicle will travel with a gallon of fuel. Because fuel consumption data indicate money saved on fuel purchases and reductions in carbon dioxide emissions, the book finds that vehicle stickers should provide consumers with fuel consumption data in addition to fuel economy information. **The Best Whale Watching in Europe A Guide to Seeing Whales, Dolphins and Porpoises in All European Waters** How to Keep Your Toyota Pickup Alive Step-by-step Procedures for the Compleat [sic] Idiot for 1975-1987/2 & 4 WD John Muir Publications Owens provides precise, easy-to-follow instructions for 1975 to 1987 two- and four-wheel-drive pickups, 4-Runners, and cab-
