HIGHER-ORDER PERL

TRANSFORMING PROGRAMS WITH PROGRAMS

Elsevier Most Perl programmers were originally trained as C and Unix programmers, so the Perl programs that they write bear a strong resemblance to C programs. However, Perl incorporates many features that have their roots in other languages such as Lisp. These advanced features are not well understood and are rarely used by most Perl programmers, but they are very powerful. They can automate tasks in everyday programming that are difficult to solve in any other way. One of the most powerful of these techniques is writing functions that manufacture or modify other functions. For example, instead of writing ten similar functions, a programmer can write a general pattern or framework that can then create the functions as needed according to the pattern. For several years Mark Jason Dominus has worked to apply functional programming techniques to Perl. Now Mark brings these flexible programming methods that he has successfully taught in numerous tutorials and training sessions to a wider audience. * Introduces powerful programming methods new to most Perl programmers that were previously the domain of computer scientists * Gradually builds up confidence by describing techniques of progressive sophistication * Shows how to improve everyday programs and includes numerous engaging code examples to illustrate the methods

THANKS, BUT THIS ISN'T FOR US

A (SORT OF) COMPASSIONATE GUIDE TO WHY YOUR WRITING IS BEING REJECTED

Penguin A fun, practical guide that reveals the essentials of good fiction and memoir writing by exposing the most common mistakes literary writers make. All great works of fiction and memoir are unique-but most bad novels, stories, and memoirs have a lot in common. From clunky dialogue to poorly sketchedout characters, sagging pacing to exaggerated prose, these beginners' mistakes drive any agent or editor to their stock rejection letter, telling the aspiring writer "Thanks, but this isn't for us," and leaving many to wonder what exactly it is that they're doing wrong. Veteran writing coach, developmental editor, and writing instructor Jessica Page Morrell will fill in the gaps in every rejection letter you've ever received. In Thanks, But This Isn't for Us, Morrell uses her years of experience to isolate the specific errors beginners make, including the pitfalls of unrealistic dialogue, failing to "show, not tell," and over-the-top plot twists. These are just a few of the problems that keep writers from breaking through with their work. Sympathetic and humane, but pulling no punches, Thanks, But This Isn't for Us shows writers precisely where they've gone wrong and how to get on the right track. In sixteen to-the-point chapters, with checklists, exercises, takeaway tips, and a glossary, Morrell helps readers transcend these mistakes so that they don't have to learn the hard way: with another rejection letter.

DESIGNING A BOOK

DRAPLIN DESIGN CO.

PRETTY MUCH EVERYTHING

Abrams Esquire. Ford Motors. Burton Snowboards. The Obama Administration. While all of these brands are vastly different, they share at least one thing in common: a teeny, little bit of Aaron James Draplin. Draplin is one of the new school of influential graphic designers who combine the power of design, social media, entrepreneurship, and DIY aesthetic to create a successful business and way of life. Pretty Much Everything is a mid-career survey of work, case studies, inspiration, road stories, lists, maps, how-tos, and advice. It includes examples of his work—posters, record covers, logos—and presents the process behind his design with projects like Field Notes and the "Things We Love" State Posters. Draplin also offers valuable advice and hilarious commentary that illustrates how much more goes into design than just what appears on the page. With Draplin's humor and pointed observations on the contemporary design scene, Draplin Design Co. is the complete package for the new generation of designers.

UK FEMINIST CARTOONS AND COMICS

A CRITICAL SURVEY

Springer Nature This book demonstrates that since the 1970s, British feminist cartoons and comics have played an important part in the Women's Movement in Britain. A key component of this has been humour. This aspect of feminist history in Britain has not previously been documented. The book questions why and how British feminists have used humour in comics form to present serious political messages. It also interrogates what the implications have been for the development of feminist cartoons and for the popularisation of feminism in Britain. The work responds to recent North American feminist comics scholarship that concentrates on North American autobiographical comics of trauma by women. This book highlights the relevance of humour and provides a comparative British perspective. The time frame is 1970 to 2019, chosen as representative of a significant historical period for the development of feminist cartoon and comics activity and of feminist theory and practice. Research methods include archival data collection, complemented by interviews with selected cartoonists. Visual and textual analysis of specific examples draws on literature from humour theory, comics studies and feminist theory. Examples are also considered as responses to the economic, social and political contexts in which they were produced.

FAMILY MAPS OF MARTIN COUNTY, INDIANA, DELUXE EDITION

WITH HOMESTEADS, ROADS, WATERWAYS, TOWNS, CEMETERIES, RAILROADS, AND MORE

182 pages with 47 total maps Locating original landowners in maps has never been an easy task-until now. This volume in the Family Maps series contains newly created maps of original landowners (patent maps) in what is now Martin County, Indiana, gleaned from the indexes of the U.S. Bureau of Land Management. But it offers much more than that. For each township in the county, there are two additional maps accompanying the patent map: a road map and a map showing waterways, railroads, and both modern and many historical city-centers and cemeteries. Included are indexes to help you locate what you are looking for, whether you know a person's name, a last name, a place-name, or a cemetery. The combination of maps and indexes are designed to aid researchers of American history or genealogy to explore frontier neighborhoods, examine family migrations, locate hard-to-find cemeteries and towns, as well as locate land based on legal descriptions found in old documents or deeds. The patent-maps are essentially plat maps but instead of depicting owners for a particular year, these maps show original landowners, no matter when the transfer from the federal government was completed. Dates of patents typically begin near the time of statehood and run into the early 1900s. What's Mapped in this book (that you'll not likely find elsewhere) . . . 2325 Parcels of Land (with original landowner names and patent-dates labeled in the relevant map) 48 Cemeteries plus . . . Roads, and existing Rivers, Creeks, Streams, Railroads, and Small-towns (including some historical), etc. What YEARS are these maps for? Here are the counts for parcels of land mapped, by the decade in which the corresponding land patents were issued: DecadeParcel-count 1810s1 1820s25 1830s509 1840s617 1850s1162 1860s5 1870s2 1910s1 1930s1 1950s1 What Cities and Towns are in Martin County, Indiana (and in this book)?
