How to Start Internet Radio A Complete Step to Step Guide to Start an Online Radio at the Comfort of Your Home *Independently Published* Internet radio services are usually accessible from anywhere in the world with a suitable internet connection available; one could, for example, listen to an Australian station from Europe and America. This has made internet radio particularly suited to and popular among expatriate listeners. Nevertheless, some major networks like TuneIn Radio, Entercom, Pandora Radio, iHeartRadio and Citadel Broadcasting (except for news/talk and sports stations) in the United States, and Chrysalis in the United Kingdom, restrict listening to in-country due to music licensing and advertising issues. Internet radio is also suited to listeners with special interests, allowing users to pick from a multitude of different stations and genres less commonly represented on traditional radio. Internet radio (also web radio, net radio, streaming radio, e-radio, IP radio, online radio) is a digital audio service transmitted via the Internet. Broadcasting on the Internet is usually referred to as webcasting since it is not transmitted broadly through wireless means. It can either be used as a stand-alone device running through the internet, or as software running through a single computer. Internet radio is generally used to communicate and easily spread messages through the form of talk. It is distributed through a wireless communication network connected to a switch packet network (the internet) via a disclosed source. Internet radio involves streaming media, presenting listeners with a continuous stream of audio that typically cannot be paused or replayed, much like traditional broadcast media; in this respect, it is distinct from on-demand file serving. Internet radio is also distinct from podcasting, which involves downloading rather than streaming. Internet radio services offer news, sports, talk, and various genres of music-every format that is available on traditional broadcast radio stations. Many Internet radio services are associated with a corresponding traditional (terrestrial) radio station or radio network, although low start-up and ongoing costs have allowed a substantial proliferation of independent Internet-only radio stations. The first Internet radio service was launched in 1993. As of 2017, the most popular internet radio platforms and applications in the world include (but are not limited to) TuneIn Radio, iHeartRadio, and Sirius XM. **The Ultimate Digital Music Guide** *Que Publishing* Discusses all aspects of digital music, including navigating Internet radio, determining the best audio file format, creating playlists, and sharing music through social media outlets. **A Newbie's Guide to Fire TV** *CreateSpace* If you're tired of paying your cable television bills and ready to embrace the future of home entertainment, then you're a perfect match for the brand new Fire TV. Basic Music Reference A Guide for Non-specialist Librarians, Library Assistants, and Student Employees *A-R Editions, Inc.* Basic Music Reference is a quick-start guide designed to introduce library employees to the basic tools and techniques involved in answering questions related to music. As in every specialist subject area, music has its own terminology, but unlike most, it also has a multitude of formats [on paper and other materials] as well as special notation and frequent use of foreign languages in titles and texts. These features make it particularly difficult for library employees to answer users' questions and thus a guide such as this one is essential. Not all libraries with a music collection can afford to hire a music reference librarian. Even libraries with such a specialist rely on support staff and student employees to answer questions when the music librarian is not available. Whatever the scenario, this volume will serve as a helpful training tool for library employees to learn about the basic music reference tools, and to develop the techniques of greatest use when answering the most common types of music-related questions
