Creative Scrapbook Piecing 4 with Marina du Plessis

Penguin Random House South Africa **There is no end to scrapbooking as a craft, or to the popularity of Marina du Plessis's scrapbook piecing. Back with a fourth collection of scrapbook layouts in Creative Scrapbook Piecing 4 with Marina du Plessis, the author provides designs for a host of special occasions and reasons to preserve memories of family and friends. Using mostly paper, each of the 42 full-colour layouts includes easy-to-understand instructions and templates for making the frames, letters, titles, tags, envelopes and the three-dimensional figurines. Elements may be mixed and matched, or adapted, to personalise your own layouts. There are themes to suit boys and girls (from babies to adults) and these include birthdays, weddings, special festivals and events, weddings, memories, pets and good times. Projects are suitable for advanced and beginner scrappers.**

Creative Scrapbook Piecing with Marina du Plessis 2

Penguin Random House South Africa **Creative Scrapbook Piecing 2 with Marina du Plessis follows on the success of her first book on the subject - Creative Scrapbook Piecing with Marina du Plessis - and the clamour for more from scrappers around the country. In this collection of layouts, Marina presents themes encompassing nostalgia, special memories, outright fun and an array of special occasions including a birthday, a Matric dance, a wedding, a christening and an unusual family gathering. The choice is yours; you can faithfully replicate the layouts in this book or you can select specific elements to create your own individual layouts - the choice is yours. Whatever your treasured moments are, capture them forever in this exciting craft. The main ingredients and tools for scrapbook piecing are simple: photographs, paper, ink and a pair of scissors! Each layout includes templates of the frames, letters, titles, tags, journaling and envelopes, as well as the templates for constructing the three-dimensional figurines. Instructions are simple to follow and are accompanied by full-colour photographs. No matter if you have been scrapping for years or you're a beginner, the projects will provide you with plenty of ideas and inspiration.**

Cytokines and Colony Stimulating Factors

Methods and Protocols

Springer Science & Business Media **The immune system is a complex network in which different cell types and soluble factors interact to efficiently eliminate various kinds of microorganisms as well as aberrant cell clones. The roots of immunologic investigations reach far into the past. In 430 BC,**

Thucydides reported that survivors of the plague did not present a second time with similar symptoms. The first report of a successful immunotherapy was made by Edward Jenner in 1798 who found a protective effect of cowpox vaccination against human pox. Since then, much knowledge has been accumulated; today, investigations of the molecular mechanisms of immune regulation are of central research interest. The novel insights into gene polymorphisms and gene regulation gathered from this work has improved our knowledge of individual immune reactions and risk factors in overcoming infections. Strategies to use the immune system for cancer treatment have been propelled by the discovery of divergent immunoregulatory cytokines and the introduction of new gene therapy strategies to modify immune responses. Recently, the discovery of various dendritic cells has focused attention on these cell types as central elements of the immune response and to the possibility of dendritic cell expansion, maturation, and consecutive stimulation with immunologically active tumor-specific peptides. Similarly, methods for ex vivo expansion of various stem cell-derived cell types have led to an improved therapeutic management of various benign and malignant diseases.
