PROJECT MANAGEMENT METHODOLOGIES, GOVERNANCE AND SUCCESS

INSIGHT FROM TRADITIONAL AND TRANSFORMATIVE RESEARCH

CRC Press Project management methodologies, practices, and guidelines are the only explicit information that project managers have and, when properly maintained, should reflect the most current knowledge and guidance to achieve repeatable successful project outcomes. Despite more than 50 years of research in the field of project management, project success r

CTET & TETS PREVIOUS YEARS PAPERS CLASS (1 TO 5) PAPER-1 2021

Arihant Publications India limited 1. The book is complete practice capsule for CTET and TETs Entrances 2. This practice capsule deals with Paper 1 for classes 1 to 5 3. Covers Previous Years' Questions (2021-2013) of various Teaching Entrances 4. More than 3000 Questions are provided for practice 5. Well detailed answers help to understand the concepts Central Teacher Eligibility Test (CTET) or Teacher Eligibility Test (TET) are the national level teaching entrance exams that recruit eligible candidates as teacher who are willing to make their careers in the stream of teaching at Central or State Government Schools. Prepared under National curriculum pattern, the current edition of "CTET & TETs Previous Years' Solved Papers - Paper 1 for Class 1-5" is a complete practice package for teaching entrances. This book covers all the previous years' questions (2021-2013) providing complete detailed explanations of each question. It has more than 3000 Questions that are asked in various Teaching Entrances that promote self-evaluation by enabling not just

practicing and revising concepts but also to keep track of self-progress. Well detailed answers help students to win over doubt and fears associated with exam. Preparation done from this book proves to be highly useful for CTET & TET Paper I in achieving good rank. TABLE OF CONTENT Solved Paper (2021-2013)

ICPMG2014 - PHYSICAL MODELLING IN GEOTECHNICS

PROCEEDINGS OF THE 8TH INTERNATIONAL CONFERENCE ON PHYSICAL MODELLING IN GEOTECHNICS 2014 (ICPMG2014), PERTH, AUSTRALIA, 14-17 JANUARY 2014

CRC Press The 8th International Conference on Physical Modelling in Geotechnics (ICPMG2014) was organised by the Centre for Offshore Foundation Systems at the University of Western Australia under the auspices of the Technical Committee 104 for Physical Modelling in Geotechnics of the International Society of Soil Mechanics and Geotechnical Engineering. This quadrennial conference is the traditional focal point for the physical modelling community of academics, scientists and engineers to present and exchange the latest developments on a wide range of physical modelling aspects associated with geotechnical engineering. These proceedings, together with the seven previous proceedings dating from 1988, present an inestimable collection of the technical and scientific developments and breakthroughs established over the last 25 years. These proceedings include 10 keynote lectures from scientific leaders within the physical modelling community and 160 peer-reviewed papers from 26 countries. They are organised in 14 themes, presenting the latest developments in physical modelling technology, modelling techniques and sensors, through a wide range of soil-structure interaction problems, including shallow and deep foundations, offshore geotechnics, dams and embankments, excavations and retaining structures and slope stability. Fundamental aspects of earthquake engineering, geohazards, ground reinforcements and improvements, and soil properties and behaviour are also covered, demonstrating the increasing complexity of modelling arising from state-of-the-art technological developments and increased understanding of similitude principles. A special theme on education presents the latest developments in the use of physical modelling techniques for instructing undergraduate and postgraduate students in geotechnical engineering.

AN IUCN SITUATION ANALYSIS OF TERRESTRIAL AND FRESHWATER FAUNA IN WEST AND CENTRAL AFRICA

IUCN This situation analysis was undertaken to inform responses to several resolutions made at the 5th World Conservation Congress in 2012 about the plight of large vertebrates in West and Central Africa. It draws on a wide range of information to provide information on the status of these species, important sites, pressures, legislation, the effectiveness of protected areas, and both community-based incentives for conservation and institutional responses. The overriding conclusion is of substantial wildlife declines and inadequate responses to either long-standing pressures or rapidly escalating threats that have emerged in recent years.

ECOLOGY & ENVIRONMENT FOR GENERAL STUDIES CSAT - PAPER 1 IAS PRELIMS 2ND EDITION

Disha Publications Ecology and Environment General Studies CSAT - Paper 1 IAS Prelims for Civil Services Preliminary Exam covers various Chapters and their important topics. The book is divided into 17 chapters followed by 2 levels of exercises - Simple MCQs & statement based MCQs. The book captures most of the important questions with explanations of the past 12 years of the IAS Prelim exam distributed in the various chapters.

THE ECOLOGY & ENVIRONMENT COMPENDIUM FOR IAS PRELIMS GENERAL STUDIES PAPER 1 & STATE PSC EXAMS 2ND EDITION

Disha Publications The thoroughly Revised & Updated 2nd Edition of the book "The Ecology & Environment Compendium" is the Most Updated Material for Ecology covering the social, political and economic aspects of Climate Change, Sustainable Development and Environmental Management. The emphasis of the book has been on Policies, Summits, Reports, Initiatives, new terms, Judgements etc., which are important from the point of view of the exam. The book covers a lot of new topics Eco-San, REDD, REDD+, Paris Agreement, Rio Declaration, COP, In Situ, Ex Situ, Cli-Fi, Green Economy, Carbon - Footprints/ Trading/ Budget, etc. The book captures most of the important questions with explanations of the past years of the IAS Prelim exam, CDS, NDA and other competitive exams distributed in the various chapters. The book is divided into 9 chapters followed by 2 levels of exercises with 800+ Simple MCQs & statement based MCQs.

IVORY

POWER AND POACHING IN AFRICA

Oxford University Press Half of Tanzania's elephants have been killed for their ivory since 2007. A similar alarming story can be told of the herds in northern Mozambique and across swathes of central Africa, with forest elephants losing almost two-thirds of their numbers to the tusk trade. The huge rise in poaching and ivory smuggling in the new millennium has destroyed the hope that the 1989 ivory trade ban had capped poaching and would lead to a long-term fall in demand. But why the new upsurge? The answer is not simple. Since ancient times, large-scale killing of elephants for their tusks has been driven by demand outside Africa's elephant ranges - from the Egyptian pharaohs through Imperial Rome and industrialising Europe and North America to the new wealthy business class of China. And, who poaches and why do they do it? In recent years lurid press reports have blamed mass poaching on rebel movements and armed militias, especially Somalia's Al Shabaab, tying two together two evils - poaching and terrorism. But does this account stand up to scrutiny? This new and ground-breaking examination of the history and politics of ivory in Africa forensically examines why poaching happens in Africa and why it is corruption, crime and politics, rather than insurgency, that we should worry about.

STUDY GUIDE FOR CTET PAPER 1 (CLASS 1 - 5 TEACHERS) WITH PAST QUESTIONS 5TH EDITION

Disha Publications

SCIENCE & TECHNOLOGY FOR GENERAL STUDIES CSAT - PAPER 1 IAS PRELIMS 2ND EDITION

Disha Publications Science & Tech General Studies CSAT - Paper 1 IAS Prelims for Civil Services Preliminary Exam covers various Chapters and their important topics. The book is divided into 17 chapters followed by 2 levels of exercises - Simple MCQs & statement based MCQs. The book captures most of the important questions with explanations of the past 12 years of the IAS Prelim exam distributed in the various chapters.

WAR AND PEACE IN SOMALIA

NATIONAL GRIEVANCES, LOCAL CONFLICT AND AL-SHABAAB

Oxford University Press For the last thirty years Somalia has experienced violence and upheaval. Today, the international effort to help

Somalis build a federal state and achieve stability is challenged by deep-rooted grievances, local conflicts and a powerful insurgency led by Al-Shabaab. Consisting of forty-four chapters by conflict resolution specialists and the world's leading experts on Somalia, this volume constitutes a unique compendium of insights into the insurgency and its impact. War and Peace in Somalia explores the legacies of past violence, especially impunity, illegitimacy and exclusion, and the need for national reconciliation. Drawing on decades of experience and months of field research, the contributors throw light on diverse forms of local conflict, its interrelated causes, and what can be done about it. They share original research on the role of women, men and youth in the conflict, and present new insight into Al-Shabaab--particularly the group's multi-dimensional strategy, the motivations of its fighters, their foreign links, and the prospects for engagement. This ground-breaking volume illuminates the war in Somalia, and sets out what can and should be done to bring it to an end. For policymakers and researchers covering Somalia, East Africa, extremism or conflict resolution, this is a must-read.

RESILIENCE, DEVELOPMENT AND GLOBAL CHANGE

Routledge Resilience is currently infusing policy debates and public discourses, widely promoted as a normative goal in fields as diverse as the economy, national security, personal development and well-being. Resilience thinking provides a framework for understanding dynamics of complex, inter-connected social, ecological and economic systems. The book critically analyzes the multiple meanings and applications of resilience ideas in contemporary society and to suggests where, how and why resilience might cause us to re-think global change and development, and how this new approach might be operationalized. The book shows how current policy discourses on resilience promote business-as-usual rather than radical responses to change. But it argues that resilience can help understand and respond to the challenges of the contemporary age. These challenges are characterized by high uncertainty; globalized and interconnected systems; increasing disparities and limited choices. Resilience thinking can overturn orthodox approaches to international development dominated by modernization, aid dependency and a focus on economic growth and to global environmental change - characterized by technocratic approaches, market environmentalism and commoditization of ecosystem services. Resilience, Development and Global Change presents a sophisticated, theoretically informed synthesis of resilience thinking across disciplines. It applies resilience ideas specifically to international development and relates resilience to core theories in development and shows how a radical, resilience-based approach to development might transform responses to climate change, to the dilemmas of managing forests and ecosystems, and to rural and urban poverty in the developing world. The book provides fresh perspectives for scholars of international development, environmental studies and geography and add new dimensions for those studying broader fields of ecology and society.

THE ROUTLEDGE ATLAS OF SOUTH ASIAN AFFAIRS

Routledge South Asia has developed from a group of newly independent post-Colonial states of at most secondary importance to the wider world to its current position as a region of central strategic importance to both global economic development and world peace and stability. This Atlas highlights the global significance of South Asia in relation to economic, geopolitical and strategic interests. It provides a coherent descriptive and analytical account of the key elements of the complex societies that make up the region and its component countries. Illustrated with more than 100 original maps and offering concise entries on key issues, the book is structured thematically in these sections: Global Context Geographical Environments Historical Evolution of South Asia Key Issues in modern South Asia Economy and Security Designed for use in teaching undergraduate and graduate classes and seminars in geography, history, economics, anthropology, international relations, political science and the environment as well as regional courses on the South Asia, this book is also a comprehensive reference source for libraries and decision makers focusing on South Asia.

SHALE GAS, THE ENVIRONMENT AND ENERGY SECURITY

A NEW FRAMEWORK FOR ENERGY REGULATION

Edward Elgar Publishing This pioneering and in-depth study into the regulation of shale gas extraction examines how changes in the constitutional set-ups of EU Member States over the last 25 years have substantially altered the legal leverage of environmental protection and energy security as state objectives. As well as offering the first formal assessment of the legality of fracking bans and moratoria, Ruven Fleming further proposes a new methodology for the development of legally sound regulation of new energy technologies in the context of the energy transition.

FOOD FOR ALL IN AFRICA

SUSTAINABLE INTENSIFICATION FOR AFRICAN FARMERS

Cornell University Press Africa requires a new agricultural transformation that is appropriate for Africa, that recognizes the continent's diverse environments and climates, and that takes into account its histories and cultures while benefiting rural smallholder farmers and their families. In this boldly optimistic book, Sir Gordon Conway, Ousmane Badiane, and Katrin Glatzel describe the key challenges faced by Africa's smallholder farmers and present the concepts and practices of Sustainable Intensification (SI) as opportunities to sustainably transform Africa's agriculture sector and the livelihoods of millions of smallholders. The way forward, they write, will be an

agriculture sector deeply rooted within SI: producing more with less, using fertilizers and pesticides more prudently, adapting to climate change, improving natural capital, adopting new technologies, and building resilience at every stage of the agriculture value chain. Food for All in Africa envisions a virtuous circle generated through agricultural development rooted in SI that results in greater yields, healthier diets, improved livelihoods for farmers, and sustainable economic opportunities for the rural poor that in turn generate further investment. It describes the benefits of digital technologies for farmers and the challenges of transforming African agricultural policies and creating effective and inspiring leadership. Food for All in Africa demonstrates why we should take on the challenge and provides ideas and methods through which it can be met.

MARINE ANTHROPOGENIC LITTER

Springer This book describes how man-made litter, primarily plastic, has spread into the remotest parts of the oceans and covers all aspects of this pollution problem from the impacts on wildlife and human health to socio-economic and political issues. Marine litter is a prime threat to marine wildlife, habitats and food webs worldwide. The book illustrates how advanced technologies from deep-sea research, microbiology and mathematic modelling as well as classic beach litter counts by volunteers contributed to the broad awareness of marine litter as a problem of global significance. The authors summarise more than five decades of marine litter research, which receives growing attention after the recent discovery of great oceanic garbage patches and the ubiquity of microscopic plastic particles in marine organisms and habitats. In 16 chapters, authors from all over the world have created a universal view on the diverse field of marine litter pollution, the biological impacts, dedicated research activities, and the various national and international legislative efforts to combat this environmental problem. They recommend future research directions necessary for a comprehensive understanding of this environmental issue and the development of efficient management strategies. This book addresses scientists, and it provides a solid knowledge base for policy makers, NGOs, and the broader public.

ENGINEERING CHALLENGES FOR SUSTAINABLE FUTURE

PROCEEDINGS OF THE 3RD INTERNATIONAL CONFERENCE ON CIVIL, OFFSHORE AND ENVIRONMENTAL ENGINEERING (ICCOEE 2016, MALAYSIA, 15-17 AUG 2016)

CRC Press Engineering Challenges for Sustainable Future contains the papers presented at the 3rd International Conference on Civil, Offshore & Environmental Engineering (ICCOEE2016, Kuala Lumpur, Malaysia, 15-17 August 2016), under the banner of World Engineering, Science & Technology Congress (ESTCON2016). The ICCOEE series of conferences started in Kuala Lumpur, Malaysia 2012, and the second event of the series took place in Kuala Lumpur, Malaysia 2014. This conference series deals with the civil,

offshore & environmental engineering field, addressing the following topics: • Environmental and Water Resources Engineering • Coastal and Offshore Engineering • Structures and Materials • Construction and Project Management • Highway, Geotechnical and Transportation Engineering and Geo-informatics This book is an essential reading for academic, engineers and all professionals involved in the area of civil, offshore and environmental engineering.

UPPSC (UTTAR PRADESH PUBLIC SERVICE COMMISSION) UP COMBINED STATE/UPPER SUBORDINATE SERVICES GENERAL STUDIES (PAPER-I) PRELIMINARY EXAMINATION SOLVED PAPERS 2021-2005

Prabhat Prakashan The presented book UPPSC (Uttar Pradesh Public Service Commission) General Studies (Paper-I) Preliminary Examination Solved Papers is a compilation of previous years' examination question papers from 2021 to 2005. Aspirants can find all these question papers easily where most of the syllabus is covered in the form of MCQs. The solutions are supplemented lucidly with analytical explanations to promote a clearer understanding to various levels of questions depending upon the complexity. This book seeks to make the aspirants fully aware about the developments in the papers throughout these years along with preparing them to face the upcoming examination with confidence.

CLIMATE CHANGE AND NATURAL DISASTERS

TRANSFORMING ECONOMIES AND POLICIES FOR A SUSTAINABLE FUTURE

Routledge The Open Access version of this book, available at <https://www.taylorfrancis.com/books/9781351527927>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license The start of the new millennium will be remembered for deadly climate-related disasters - the great floods in Thailand in 2011, Super Storm Sandy in the United States in 2012, and Typhoon Haiyan in the Philippines in 2013, to name a few. In 2014, 17.5 million people were displaced by climate-related disasters, ten times more than the 1.7 million displaced by geophysical hazards. What is causing the increase in natural disasters and what effect does it have on the economy? *Climate Change and Natural Disasters* sends three messages: human-made factors exert a growing influence on climate-related disasters; because of the link to anthropogenic factors, there is a pressing need for climate mitigation; and prevention, including climate adaptation, ought not to be viewed as a cost to economic growth but as an investment. Ultimately, attention to climate-related disasters, arguably the most tangible manifestation of global warming, may help mobilize broader climate action. It can also be instrumental in transitioning to a path of low-carbon, green growth, improving disaster resilience, improving natural resource use, and caring for the urban environment. Vinod Thomas proposes that economic growth will become sustainable only if governments, political actors, and local communities combine natural disaster prevention and controlling climate change into national growth strategies. When considering all types of capital, particularly human capital, climate action can drive economic growth, rather than hinder it.

10 YEAR-WISE CTET PAPER 1 SOLVED PAPERS (2011 - 2018) - ENGLISH EDITION

Disha Publications 10 YEAR-WISE CTET Paper 1 Solved Papers (2011 - 2018) - English Edition contains Past 10 Solved Papers of the CTET exam. The past CTET Solved papers included are : June 2011, Jan & Nov 2012, July 2013, Feb & Sep 2014, Feb & Sep 2015 and Feb & Sep 2016 Papers. The languages covered in the tests are English (1st language) and Hindi (2nd language).

CTET PRACTICE WORKBOOK PAPER 1 (10 SOLVED + 10 MOCK PAPERS) CLASS 1 - 5 TEACHERS 5TH EDITION

Disha Publications CTET Practice Workbook (10 Solved + 10 Mock papers) Paper 1 (Class 1 to 5), English edition contains 10 challenging Mock Papers and Past 10 Solved Papers of the CTET exam. The Mock Tests follows the exact pattern as per the latest CTET paper. The book also contains the solution to the past CTET papers of June 2011, Jan & Nov 2012, July 2013, Feb & Sep 2014, Feb & Sep 2015 and Feb & Sep 2016 Papers. The languages covered in the tests are English (1st language) and Hindi (2nd language).

Each Practice Set in the book contains sections on Child Development & Pedagogy, English, Hindi, EVS and Maths. The question papers have been set very diligently so as to give a real-feel of the actual TET. The book is also useful for other State TETs - UPTET, Rajasthan TET, Haryana TET, Bihar TET, Uttarakhand TET etc.

CURIOSITY AND PASSION FOR SCIENCE AND ART

World Scientific This book describes the accomplishments of a curious and imaginative scientist, and his endeavours to translate or even to extrapolate scientific insights into the world of art. The science section in this volume concerns studies on S-layers, a very important class of proteins found on the surface of numerous Bacteria and nearly all Archaea. S-layer proteins are one of the most abundant biopolymers on our planet, and assemble into the simplest type of biological membrane. Moreover, they are unique building blocks and patterning elements for the production of complex supramolecular structures and nanoscale devices in nanobiotechnology, molecular nanotechnology, synthetic biology, biomimetics and nanomedicine. In the second part of this book the author goes on to passionately describe how his scientific activities stimulated his art work, which in particular concerns the visualization of results and the potential of synthetic biology and evolutionary events induced by genetic manipulations. Most importantly, the engagement in art allowed him to leave the rather curtailed canon of science and reach a mental state of unlimited freedom of thoughts. Mask-like sculptures are used as examples to visualize the intersection between science and art, and in particular the unpredictability and mystery of scientific visions.

NETWORK AND SYSTEM SECURITY

12TH INTERNATIONAL CONFERENCE, NSS 2018, HONG KONG, CHINA, AUGUST 27-29, 2018, PROCEEDINGS

Springer This book constitutes the proceedings of the 12th International Conference on Network and System Security, NSS 2018, held in Hong Kong, China, in August 2018. The 26 revised full papers and 9 short papers presented in this book were carefully reviewed and selected from 88 initial submissions. The papers cover a wide range of topics in the field, including blockchain, mobile security, applied cryptography, authentication, biometrics, IoT, privacy, and education.

WEIGHTED BERGMAN SPACES INDUCED BY RAPIDLY INCREASING WEIGHTS

American Mathematical Soc.

SINGULARITY THEORY FOR NON-TWIST KAM TORI

American Mathematical Soc. In this monograph the authors introduce a new method to study bifurcations of KAM tori with fixed Diophantine frequency in parameter-dependent Hamiltonian systems. It is based on Singularity Theory of critical points of a real-valued function which the authors call the potential. The potential is constructed in such a way that: nondegenerate critical points of the potential correspond to twist invariant tori (i.e. with nondegenerate torsion) and degenerate critical points of the potential correspond to non-twist invariant tori. Hence, bifurcating points correspond to non-twist tori.

MOBILE COMPUTING, APPLICATIONS, AND SERVICES

10TH EAI INTERNATIONAL CONFERENCE, MOBICASE 2019, HANGZHOU, CHINA, JUNE 14-15, 2019, PROCEEDINGS

Springer Nature This book constitutes the thoroughly refereed post-conference proceedings of the 10th International Conference on Mobile Computing, Applications, and Services, MobiCASE 2019, held in Hangzhou, China, in June 2019. The 17 full papers were carefully reviewed and selected from 48 submissions. The papers are organized in topical sections on mobile application with data analysis, mobile application with AI, edge computing, energy optimization and application

INTERNATIONAL LAW AND THE WAR WITH ISLAMIC STATE

CHALLENGES FOR JUS AD BELLUM AND JUS IN BELLO

Bloomsbury Publishing Armed non-state actors (ANSAs) often have economic aims that international law needs to respond to. This book looks at the aim of Islamic State to create an effective government, with an economically independent regime, which focused on key oilfields in Syria and Iraq. Having addressed Islamic State's quest for energy resources in Iraq and Syria, the book explores the lawfulness of the war with Islamic State from a variety of legal aspects. It has been attempted to make inroads into the most controversial aspects of contradictions in the application of jus ad bellum and jus in bello, particularly when discussing the use of extraterritorial armed force against ANSAs, and the obligation to protect civilian objects, including the natural environment. The

question is whether the targeting of energy resources should be regarded as a violation of the laws of armed conflict, even though the war with Islamic State being classified as a non-international armed conflict. Ambitious in scope, the study argues that legal theory and state practice are still problematic as to how and under what conditions states can justify resorting to military force in foreign territory, and to what extent they can target natural resources as being part of state property. Furthermore, it goes on to examine the differences between international and non-international armed conflicts, to establish whether there is any difference in the targeting of energy resources as part of the war-sustaining capabilities of either party. Through an examination of the Islamic State case, the book offers a comprehensive study to close the gaps in jus in bello by contextualising the questions of civilian protection, victimisation and state responsibility by evaluating the US's war-sustaining theory as a justification for the destruction of a territorial state's natural resources that are occupied by ANSAs.

INFORMATION, COMPUTER AND APPLICATION ENGINEERING

PROCEEDINGS OF THE INTERNATIONAL CONFERENCE ON INFORMATION TECHNOLOGY AND COMPUTER APPLICATION ENGINEERING (ITCAE 2014), HONG KONG, CHINA, 10-11 DECEMBER 2014

CRC Press This proceedings volume brings together peer-reviewed papers presented at the International Conference on Information Technology and Computer Application Engineering, held 10-11 December 2014, in Hong Kong, China. Specific topics under consideration include Computational Intelligence, Computer Science and its Applications, Intelligent Information Processing and Knowledge Engineering, Intelligent Networks and Instruments, Multimedia Signal Processing and Analysis, Intelligent Computer-Aided Design Systems and other related topics. This book provides readers a state-of-the-art survey of recent innovations and research worldwide in Information Technology and Computer Application Engineering, in so-doing furthering the development and growth of these research fields, strengthening international academic cooperation and communication, and promoting the fruitful exchange of research ideas. This volume will be of interest to professionals and academics alike, serving as a broad overview of the latest advances in the dynamic field of Information Technology and Computer Application Engineering.

LIES, INCORPORATED

THE WORLD OF POST-TRUTH POLITICS

Anchor A stunning investigation of the history of organized misinformation in politics. In today's post-truth political landscape, there is a carefully concealed but ever-growing industry of organized misinformation that exists to create and disseminate lies in the service of political agendas. Ari Rabin-Havt and Media Matters for America present a revelatory history of this industry—which they've dubbed *Lies, Incorporated*—and show how it has crippled legislative progress on issues including tobacco regulation, public health care, climate change, gun control, immigration, abortion, and same-sex marriage. Eye-opening and indispensable, *Lies, Incorporated* takes an unflinching look at the powerful network of politicians and special interest groups that have launched coordinated assaults on the truth to shape American politics.

APPLIED ANALYSIS IN BIOLOGICAL AND PHYSICAL SCIENCES

ICMBAA, ALIGARH, INDIA, JUNE 2015

Springer The book contains recent developments and contemporary research in mathematical analysis and in its application to problems arising from the biological and physical sciences. The book is of interest to readers who wish to learn of new research in such topics as linear and nonlinear analysis, mathematical biology and ecology, dynamical systems, graph theory, variational analysis and inequalities, functional analysis, differential and difference equations, partial differential equations, approximation theory, and chaos. All papers were prepared by participants at the International Conference on Recent Advances in Mathematical Biology, Analysis and Applications (ICMBAA-2015) held during 4–6 June 2015 in Aligarh, India. A focal theme of the conference was the application of mathematics to the biological sciences and on current research in areas of theoretical mathematical analysis that can be used as sophisticated tools for the study of scientific problems. The conference provided researchers, academicians and engineers with a platform that encouraged them to exchange their innovative ideas in mathematical analysis and its applications as well as to form interdisciplinary collaborations. The content of the book is divided into three parts: Part I contains contributions from participants whose topics are related to nonlinear dynamics and its applications in biological sciences. Part II has contributions which concern topics on nonlinear analysis and its applications to a variety of problems in science, engineering and industry. Part III consists of contributions dealing with some problems in applied analysis.
