FRAMING AVICENNA'S SCIENCE OF THE SOUL

Walter de Gruyter GmbH & Co KG This book offers for the first time a comprehensive study of the reception and reworking of the Peripatetic theory of the soul in the Kitāb al-Nafs (Book of the Soul) by Avicenna (d. 1037). This study seeks to frame Avicenna's science of the soul (or psychology) by focusing on three key concepts: subject, definition, and activity. The examination of these concepts will disclose the twofold consideration of the soul in Avicenna's psychology. Besides the 'general approach' to the soul of sublunary living beings, which is the formal principle of the body, Avicenna's psychology also exhibits a 'specific orientation' towards the soul in itself, i.e. the human rational soul that, considered in isolation from the body, is a self-subsistent substance, identical with the theoretical intellect and capable of surviving severance from the body. These two investigations demonstrate the coexistence in Avicenna's psychology of a more specific and less physical science (psychologia specialis) within a more general and overall physical one (psychologia generalis).

COLONIZING RUSSIA'S PROMISED LAND

ORTHODOXY AND COMMUNITY ON THE SIBERIAN STEPPE

University of Toronto Press The movement of millions of settlers to Siberia in the late nineteenth and early twentieth centuries marked one of the most ambitious undertakings pursued by the tsarist state. Colonizing Russia's Promised Land examines how Russian Orthodoxy acted as a basic building block for constructing Russian settler communities in current-day southern Siberia and northern Kazakhstan. Russian state officials aspired to lay claim to land that was politically under their authority, but remained culturally unfamiliar. By exploring the formation and evolution of Omsk diocese – a settlement mission – Colonizing Russia's Promised Land reveals how the migration of settlers expanded the role of Orthodoxy as a cultural force in transforming Russia's imperial periphery by "russifying" the land and marginalizing the Indigenous Kazakh population. In the first study exploring the role of Orthodoxy in settler colonialism, Aileen Friesen shows how settlers, clergymen, and state officials viewed the recreation of Orthodox parish life as practised in European Russia as fundamental to the establishment of settler communities, and to the success of colonization. Friesen uniquely gives peasant settlers a voice in this discussion, as they expressed their religious aspirations and fears to priests and tsarist officials. Despite this agreement, tensions existed not only among settlers, but also within the Orthodox Church as these groups struggled to define what constituted the Russian Orthodox faith and culture.

THE WORLD CHRONICLE OF GUILLAUME DE NANGIS

A MANUSCRIPT'S JOURNEY FROM SAINT-DENIS TO ST. PANCRAS

Walter de Gruyter GmbH & Co KG The core of this book is the life story of a manuscript codex, British Library Royal MS 13 E IV: the Latin Chronicle (from the Creation to 1300) of Guillaume de Nangis, copied in the abbey library of St-Denis-en-France. The authors shed new light on the production process, identifying the illuminator of the Royal MS and naming the scribe. Detailed evidence links the codex to important events in history, such as the Council of Constance, and famous actors like Jean de France, duc de Berry, Sigismund of Luxembourg, Thomas Howard, duke of Norfolk, and Henry VIII, to name a few. The authors show how it traveled from one capital to the other, narrating the entire life and interesting times of this codex. Another dimension of this study accounts for all twenty-two copies of the Chronicle, now scattered in nine cities from London to Vienna, placing each one in a scrupulously drawn stemma codicum and sketching its history.

THE BOOK OF L

Springer Science & Business Media This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A.

Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

DISCOURSE IN TRANSLATION

Routledge This book explores the discourse in and of translation within and across cultures and languages. From the macro aspects of translation as an inter-cultural project to actual analysis of textual ingredients that contribute to translation and interpreting as discourse, the ten chapters represent different explorations of 'global' theories of discourse and translation. Offering interrogations of theories and practices within different sociocultural environments and traditions (Eastern and Western), *Discourse in Translation* considers a plethora of domains, including historiography, ethics, technical and legal discourse, subtitling, and the politics of media translation as representation. This is key reading for all those working on translation and discourse within translation studies and linguistics.

AN URBAN FANTASY NOVEL

SM Reine There's something in the earth deep below Elise Kavanagh's territory. A shadow is falling upon local demons to devour their flesh and harvest their souls. And it's coming for Elise next. The Union has an easy way out. They want to send Elise into hiding again with her former partner, James Faulkner. All she has to do is surrender the territory and trust that they can protect the ethereal ruins, the dark gate, and the city she's come to know as home. Greater powers have other plans for Elise and her fabled power as Godslayer—plans that mean surrendering her life and blood to the most powerful demon alive. But if she descends, there's no turning back. Once she gazes into the abyss, it will gaze back into her...and Elise will be damned forever.

OUTBACK DUSK

Dusk features some of the most masculine, perfectly and naturally built, handsome and sensual naked men within a stunning array of hauntingly beautiful and raw outback settings. Paul Freeman has established himself at the pinnacle of his craft, not only as a photographer, but as a visual poet and artist eulogizing as he captures the spirit of the rugged yet sensitive Australian male in all his physical glory. His genius is to find the right men to photograph and then tell an enthralling story with his vision from behind the camera. From the quality of the compositions and the lighting through to the texture of the outback locations, these are some of the most perfectly executed and delightful photographs in any collection, and set a tone of sophistication so rarely achieved in books of the male nude.

FRED THE CLOWN

Fantagraphics Books The signature creation of cartoonist Roger Langridge, Fred the Clown is the thinking man's idiot. Fred has an eye for the ladies, as well as several other organs, but the only part of themselves they're willing to share with him is a carefully placed kneecap. Fred the Clown's misadventures are a curious balance of bleakness and joyful absurdism; the universe may dump on Fred from a great height, but he never gives up. More often than not, they involve the pursuit of a lady—any lady will do, it seems, but bearded ladies are at the top of the list. Disappointment seems inevitable, and it usually is; yet, almost despite himself, Langridge will occasionally give Fred a happy ending out of nowhere... p.1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 13.9px Arial; color: #424242}

F*CKING HISTORY

111 LESSONS YOU SHOULD HAVE LEARNED IN SCHOOL

Penguin History that doesn't suck: Smart, crude, and hilariously relevant to modern life. Those who don't know history are doomed to repeat it. Too bad it's usually boring as sh*t. Enter The Captain, the ultimate storyteller who brings history to life (and to your life) in this hilarious, intelligent, brutally honest, and crude compendium to events that happened before any of us were born. The entries in this compulsively readable book bridge past and present with topics like getting ghosted, handling haters, and why dog owners rule (sorry, cat people). Along the way you'll get a glimpse of Edith Wharton's sex life, dating rituals in Ancient Greece, catfishing in 500 BC, medieval flirting techniques, and squad goals from Catherine the Great. You'll learn why losing yourself in a relationship will make you crazy--like Joanna of Castile, who went from accomplished badass to Joanna the Mad after obsessing over a guy known as Philip the Handsome. You'll discover how Resting Bitch Face has been embraced throughout history (so wear it proudly). And you'll see why it's never a good idea to f*ck with powerful women--from pirate queens to diehard suffragettes to Cleo-f*cking-patra. People in the past were just like us--so learn from life's losers and emulate the badasses. The Captain shows you how.

THE ISLAMIC LAW MAXIMS

AN INTRODUCTION TO CHEMOINFORMATICS

Springer This book aims to provide an introduction to the major techniques of chemoinformatics. It is the first text written specifically for this field. The first part of the book deals with the representation of 2D and 3D molecular structures, the calculation of molecular descriptors and the construction of mathematical models. The second part describes other important topics including molecular similarity and diversity, the analysis of large data sets, virtual screening, and library design. Simple illustrative examples are used throughout to illustrate key concepts, supplemented with case studies from the literature.

DOUBT IN ISLAMIC LAW

Cambridge University Press This book considers the rarely studied but pervasive concepts of doubt that medieval Muslim jurists used to resolve problematic criminal cases.

AVICENNA'S METAPHYSICS IN CONTEXT

Cornell University Press The eleventh-century philosopher and physician Abu Ali ibn Sina (d. A.D. 1037) was known in the West by his Latinized name Avicenna. An analysis of the sources and evolution of Avicenna's metaphysics, this book focuses on the answers he and his predecessors gave to two fundamental pairs of questions: what is the soul and how does it cause the body; and what is God and how does He cause the world? To respond to these challenges, Avicenna invented new concepts and distinctions and reinterpreted old ones. The author concludes that Avicenna's innovations are a turning point in the history of metaphysics. Avicenna's metaphysics is the culmination of a period of synthesis during which philosophers fused together a Neoplatonic project (reconciling Plato with Aristotle) with a Peripatetic project (reconciling Aristotle with himself). Avicenna also stands at the beginning of a period during which philosophers sought to integrate the Arabic version of the earlier synthesis with Islamic doctrinal theology (kalam). Avicenna's metaphysics significantly influenced European scholastic thought, but it had an even more profound impact on Islamic intellectual history—the philosophical problems and opportunities associated with the Avicennian synthesis continued to be debated up to the end of the nineteenth century.

DEVELOPMENT THROUGH THE LIFESPAN

Pearson College Division Laura Berk's Development Through the Lifespan is relied upon in classrooms worldwide for its clear, engaging writing style, exceptional multicultural and cross-cultural focus, cutting-edge consideration of the interrelationships between heredity and environment, rich examples, and long-standing commitment to presenting the most up-to-date scholarship. This new edition continues to offer students research-based practical applications that they can relate to their personal and professional lives. Laura Berk, renowned professor and researcher, has revised the text with new pedagogy, a heightened emphasis on the interplay between heredity and environment, and an enhanced focus on many social policy issues, while emphasizing the lifespan perspective throughout. The latest theories and findings in the field are made accessible to students in a manageable and relevant way. Berk's signature storytelling style invites students to actively learn beside the text's "characters." Students are provided with an especially clear and coherent understanding of the sequence and underlying processes of human development, emphasizing the interrelatedness of all domains-physical, cognitive, emotional, social-throughout the text narrative and in special features. Berk also helps students connect their learning to their personal and professional areas of interest. Her voice comes through when speaking directly about issues students will face in their future pursuits as parents, educators, health care providers, social workers, and researchers. As members of a global and diverse human community, students are called to intelligently approach the responsibility of understanding and responding to the needs and concerns of both young and old. While carefully considering the complexities of human development, Berk presents classic and emerging theories in an especially clear, engaging writing style, with a multitude of research-based, real-world, cross-cultural, and multicultural examples. Strengthening the connections among developmental domains and of theory and research with applications, this edition's extensive revision brings forth the most recent scholarship, representing the changing field of human development. TAMING THE WILD FIELD

COLONIZATION AND EMPIRE ON THE RUSSIAN STEPPE

Cornell University Press Stretching from the tributaries of the Danube to the Urals and from the Russian forests to the Black and Caspian seas, the vast European steppe has for centuries played very different roles in the Russian imagination. To the Grand Princes of Kiev and Muscovy, it was the "wild field," a region inhabited by nomadic Turko-Mongolic peoples who repeatedly threatened the fragile Slavic settlements to the north. For the emperors and empresses of imperial Russia, it was a land of boundless economic promise and a marker of national cultural prowess. By the mid-nineteenth century the steppe, once so alien and threatening, had emerged as an essential, if complicated, symbol of Russia itself. Traversing a thousand years of the region's history, Willard Sunderland recounts the complex process of Russian expansion and colonization, stressing the way outsider settlement at once created the steppe as a region of empire and was itself constantly changing. The story is populated by a colorful array of administrators, Cossack adventurers, Orthodox missionaries, geographers, foreign entrepreneurs, peasants, and (by the late nineteenth century) tourists and conservationists. Sunderland's approach to history is comparative throughout, and his comparisons of the steppe with the North American case are especially telling. Taming the Wild Field eloquently expresses concern with the fate of the world's great grasslands, and the book ends at the beginning of the twentieth century with the initiation of a conservation movement in Russia by those appalled at the high environmental cost of expansion.

THE RECEPTION OF ARISTOTLE'S METAPHYSICS IN AVICENNA'S KITĀB AL-ŠIFĀ'

A MILESTONE OF WESTERN METAPHYSICAL THOUGHT

BRILL The systematic comparison of Avicenna's *Ilāhiyyāt* of the *Šifā'* with Aristotle's *Metaphysics*, accomplished for the first time in the present volume, provides a detailed account of Avicenna's reworking of the epistemological profile and contents of the *Metaphysics* and a comprehensive investigation of this latter's transmission in pre-Avicennian Greek and Arabic philosophy.

STORIES OF SEXUALITY, FAITH AND MIGRATION

NYU Press A glimpse into the lives of LGBTQ migrants in Johannesburg, in their own words *Seeking Sanctuary* brings together poignant life stories from fourteen lesbian, gay, bisexual and transgender (LGBT) migrants, refugees and asylum seekers living in Johannesburg, South Africa. The stories, diverse in scope, chronicle each narrator's arduous journey to South Africa, and their corresponding movement towards self-love and self-acceptance. The narrators reveal their personal battles to reconcile their faith with their sexuality and gender identity, often in the face of violent persecution, and how they have carved out spaces of hope and belonging in their new home country. In these intimate testimonies, the narrators' resilience in the midst of uncertain futures reveal the myriad ways in which LGBT Africans push back against unjust and unequal systems. *Seeking Sanctuary* makes a critical intervention by showing the complex interplay between homophobia and xenophobia in South Africa, and of the state of sexual orientation and gender identity (SOGI) rights in Africa. By shedding light on the fraught connections between sexuality, faith and migration, this ground-breaking project also provides a model for religious communities who are working towards justice, diversity and inclusion.

WHERE TWO WORLDS MET

THE RUSSIAN STATE AND THE KALMYK NOMADS, 1600-1771

Cornell University Press During the seventeenth and eighteenth centuries the expanding Russian empire was embroiled in a dramatic confrontation with the nomadic people known as the Kalmyks who had moved westward from Inner Asia onto the vast Caspian and Volga steppes. Drawing on an unparalleled body of Russian and Turkish sources—including chronicles, epics, travelogues, and previously unstudied Ottoman archival materials—Michael Khodarkovsky offers a fresh interpretation of this long and destructive conflict, which ended with the unruly frontier becoming another province of the Russian empire. Khodarkovsky first sketches a cultural anthropology of the Kalmyk tribes, focusing on the assumptions they brought to the interactions with one another and with the sedentary cultures they encountered. In light of this portrait of Kalmyk culture and internal politics, Khodarkovsky rereads from the Kalmyk point of view the Russian history of disputes between the two peoples. Whenever possible, he compares Ottoman accounts of these events with the Russian sources on which earlier interpretations have been based. Khodarkovsky's analysis deepens our understanding of the history of Russian expansion and establishes a new paradigm for future study of the interaction between the Russians and the non-Russian peoples of Central Asia and Transcaucasia.

Among the material provided is information on testing and fault finding on PCs.

THE CHANGE PROCESS IN PSYCHOTHERAPY DURING TROUBLING TIMES

Routledge *The Change Process in Psychotherapy During Troubling Times* invites readers to consider what it is psychotherapists do that leads to change. The book highlights different theoretical approaches, questions old paradigms, and illustrates the change process when working with people facing a range of life challenges such as the survivors of childhood trauma, refugees, and people dealing with traumatic loss. Moving between consideration of micro-moments when working with individual clients and bigger questions about how to promote change in the face of current world problems, it addresses issues that touch us all. At the same time, the book acknowledges the unprecedented challenges in today's world such as the pace of change, the thousands of displaced people who seek refuge in other countries, the illness and loss caused by the coronavirus pandemic, and the impact of climate change on lifestyles and the environment. The book presents a topical consideration of the relevance of therapeutic assumptions, theories, and practices to current global crises. With the breadth of presenting issues considered and the examples of a variety of creative approaches supporting change, the book will be useful to psychotherapists in practice and in training working in a range of settings with different populations. It will also be of interest to others working in the helping professions.
