### Sustainability and Resilience Planning for Local Governments

### The Quadruple Bottom Line Strategy

*Springer* This book details a process of creating a long-term sustainability and resilience plan for local governments to use in designing and implementing sustainability and resilience-related policies, initiatives, and programs. It offers guidance and methods in applying sustainability and resilience strategies to attain the prosperity of organizations and communities. The recommendations in this book are based on the author's years of experience in directing applied resilience and sustainability planning for a local government, and years of research covering diverse aspects of sustainability and resilience from climate change, climate preparedness and readiness, quadruple bottom line strategy, greenhouse gas emission reduction policies, climate adaptation and mitigation to sustainable energy policies and initiatives. Chapter one defines terms related to sustainability and resilience and addresses how the topics reshape local governments and communities. Chapter two maps out the sustainability and resilience process for organizations and communities, determining the appropriate steps to be taken at each level of sustainability and resilience planning. Chapter three identifies community and organizational level engagement, with internal and external stakeholders, including designs necessary throughout these processes. Chapter four contains measuring, tracking, monitoring and reporting methods using the quadruple bottom line strategy, and developing a sustainability and resilience progress report to ensure accountability, transparency, and good governance. Then, chapter five details the implementation of a sustainability and resilience plan once it is established, describing potential programs and initiatives to achieve sustainable and resilient communities. Chapter six describes the intersection between sustainability and resilience, and chapter seven examines the tools and resources available to create a practical sustainability and resilience plan. Chapter eight concludes the text by addressing the future of sustainability and resilience, and complexities of the modern dynamics of the interconnected systems in cities, counties, and organizations, and recommends how local government administrators in their planning methods and strategies must consider these challenges.

### East Asian Visions

## Perspectives on Economic Development

*World Bank Publications* Despite the diversity in income levels, languages, culture, resource endowments, and political systems, the countries of East Asia are more integrated now than they have ever been. Goods, money, and ideas are being traded across the region. East Asia is redefining itself from a collection of disparate nations that looked mainly to markets in the west, to a more self-reliant, innovative, and networked region. Countries in this region are strengthening ties with each other and seeking more strategic partnerships with the rest of the world. 'East Asian Visions' is a collection of essays that convey, firsthand, how some of the most influential thinkers in East Asia view these challenges. The writers are eminent policy makers, statesmen, and scholars. They write about how competition with the west has bred success; how crises in the region have provoked introspection; and how the rise of China is catalyzing change.

## Church, State, and Society

## An Introduction to Catholic Social Doctrine

*Catholic University of America Press + ORM* How can the Catholic faith help not only Catholics, but all people, build a just and flourishing society? The Catholic Church contributes first and foremost to the common good by forming the consciences of the faithful. Faith helps reason achieve an understanding of the common good and guides individuals in living justly and harmoniously. In this book, J. Brian Benestad provides a detailed, accessible introduction to Catholic social doctrine (CSD), the Church's teachings on the human person, the family, society, political life, charity, justice, and social justice. Church, State, and Society explains the nuanced understanding of human dignity and the common good found in the Catholic intellectual tradition. It makes the case that liberal-arts education is an essential part of the common good because it helps people understand their dignity and all that justice requires. The author shows the influence of ancient and modern political philosophy and examines St. Augustine, St. Thomas Aquinas, papal social encyclicals, Vatican Council II, and postconciliar magisterial teaching. Benestad highlights the teachings of popes John Paul II and Benedict XVI that the attainment of the common good depends on the practice of the virtues by citizens and leaders alike. In addition to discussing the tension between CSD and liberal democracy, the book takes an in-depth look at: -Key themes of social life: the dignity of the human person, human rights, natural law, and the common good -Three principal mediating institutions of civil society: family, Church, and Catholic university -The economy, work, poverty, immigration, and the environment -The international community and just war principles "Excellent . . . The best treatment of Catholic Social Doctrine as a whole and a precious reminder of the intrinsically problematic character of modern democracy." —Perspectives on Political Science

## The Infinite Desire for Growth

*Princeton University Press* "Leading economist Daniel Cohen provides a whirlwind tour of the history of economic growth, from the early days of civilization to modern times, underscoring what is so unsettling today. The new digital economy is establishing a "zero-cost" production model, inexpensive software is taking over basic tasks, and years of exploiting the natural world have begun to backfire with deadly consequences. Working hard no longer guarantees social inclusion or income. Drawing on economics, anthropology, and psychology, and thinkers ranging from Rousseau to Keynes and Easterlin, Cohen examines how a future less dependent on material gain might be considered and, how, in a culture of competition, individual desires might be better attuned to the greater needs of society."--Publisher's description.

## Living Beyond the "End of the World"

## A Spirituality of Hope

*Orbis Books*

### The Silence of the Rational Center

*Basic Books* What has happened to American foreign policy? Stefan Halper and Jonathan Clarke argue that the members of what used to be called the foreign policy establishment are no longer doing the job of keeping our foreign policy informed and rational. Instead, hungry to coin the next Big Idea, they are in the business of advancing simplistic, glib mythologies. The result is that Americans are often presented with a fantasy world of nightmare scenarios rather than with explanations that lead to rational choices. Taking to task such well-known figures as Samuel Huntington, Noam Chomsky, and Jeffrey Sachs, Halper and Clarke argue for a revival of integrity within our foreign policy elite so that America's standing in the world can be restored. A book that pulls no punches, *The Silence of the Rational Center* is both a penetrating diagnosis and a stirring call to reform in what is possibly the most important area of American political life.

### Management of Soil Problems

*Springer* Soils are neither good nor bad, but some have inherent or acquired characteristics that may or may not suit our intended use. Unsuitable characteristics are considered to be soil problems, soil constraints or soil limitations. Only twelve percent of global land is right for agricultural production without much limitation. Some soils have severe limitations for crop production. These soils are so called 'problem soils'. Many of them do not have enough fertility to be productive; some are arid and saline; some are very sandy and dry; and some are wet and waterlogged for most of the growing season. The global demand for food, wood, fuel, fiber, medicine and other plant products for the 7.2 billion current world population has created such an immense pressure on global soil resources that even the most fertile soils are losing their productive capacity. We are being compelled to bring more and more unsuitable or marginally suitable soils under cultivation. Unless innovative and integrated soil, crop and environmental management practices are adopted for their improvement and sustainable use, further degradation is inevitable. This book, *Management of Soil Problems*, identifies the problems and discusses management options in a smooth and reader-friendly style. It will be useful for students and professionals of soil science, agriculture, forestry, geography and environmental sciences.

## Rescuing the Planet

### Protecting Half the Land to Heal the Earth

*Knopf* An urgent, resounding call to protect 50 percent of the earth's land by 2050—thereby saving millions of its species—and a candid assessment of the health of our planet and our role in conserving it, from the award-winning author of *The Experience of Place* and veteran New Yorker staff writer. "An upbeat and engaging account of the remarkable progress being made to preserve vast wild spaces for animals to roam." —*The Wall Street Journal* Beginning in the vast North American Boreal Forest that stretches through Canada, and roving across the continent, from the Northern Sierra to Alabama's Paint Rock Forest, from the Appalachian Trail to a ranch in Mexico, Tony Hiss sets out on a journey to take stock of the "superorganism" that is the earth: its land, its elements, its plants and animals, its greatest threats—and what we can do to keep it, and ourselves, alive. Hiss not only invites us to understand the scope and gravity of the problems we face, but also makes the case for why protecting half the land is the way to fix those problems. He highlights the important work of the many groups already involved in this fight, such as the Indigenous Leadership Initiative, the Yellowstone to Yukon Conservation Initiative, and the global animal tracking project ICARUS. And he introduces us to the engineers, geologists, biologists, botanists, oceanographers, ecologists, and other "Half Earthers" like Hiss himself who are allied in their dedication to the unifying, essential cause of saving our own planet from ourselves. Tender, impassioned, curious, and above all else inspiring, *Rescuing the Planet* is a work that promises to make all of us better citizens of the earth.

### World on the Edge

### How to Prevent Environmental and Economic Collapse

*Routledge* In this urgent time, *World on the Edge* calls out the pivotal environmental issues and how to solve them now. We are in a race between political and natural tipping points. Can we raise water productivity fast enough to halt the depletion of aquifers and avoid water-driven food shortages? Can we cope with peak water and peak oil at the same time? These are some of the issues Lester R. Brown skilfully distills in *World on the Edge*. Bringing decades of research and analysis into play, he provides the responses needed to reclaim our future.

## Globalisation and Advertising in Emerging Economies

### Brazil, Russia, India and China

*Routledge* **Brazil, Russia, India and China** are four of the largest and most dynamic contemporary emerging economies in the world. Strong economic growth in each of these economies has been accompanied by the expansion of the advertising and consumer goods sectors. Using a series of country studies, this book explores the dynamics of global capitalism from the perspective of global advertising. The book highlights the on-going expansion of advertising and consumerism against the wider socio-economic, political and cultural contexts. It provides fresh insights about contemporary global priorities, and argues that advertising plays a key role linking culture and the economy. By presenting individual case studies of advertising campaigns, it offers examples of the globalisation of specific brands. Environmental implications of the expansion of advertising and its role in stimulating consumerism are explored in the context of the four emerging economies. The book compares and contrasts the individual country profiles, and makes an assessment of the validity of the argument regarding their projected importance and the likelihood of their future dominance of the global economy.

The relationships between flows of goods, services and materials in these case studies offer valuable insights. The book provides a much needed quality control on the information used in deliberative processes about policy and planning activities. This innovative book will be of interest to researchers, students and practitioners in the fields of sustainability science, international development, industrial ecology, sustainable resource management, geography and ecological economics.

## Shaping Our World

### Engineering Education for the 21st Century

*John Wiley & Sons* A look at engineering education today— with an eye to tomorrow Engineering education is in flux. While it is increasingly important that engineers be innovative, entrepreneurial, collaborative, and able to work globally, there are virtually no programs that prepare students to meet these new challenges. **Shaping Our World: Engineering Education for the 21st Century** seeks to fill this void, exploring revolutionary approaches to the current engineering curriculum that will bring it fully up to date and prepare the next generation of would-be engineers for real and lasting professional success. Comprised of fourteen chapters written by respected experts on engineering education, the book is divided into three parts that address the need for change in the way engineering is taught; specific innovations that have been tested, why they matter, and how they can be more broadly instituted; and the implications for further changes. Designed to aid engineering departments in their transition towards new modes of learning and leadership in engineering education, the book describes how to put into practice educational programs that are aligned with upcoming changes, such as those proposed in the NAE's Engineer of 2020 reports. Addressing the need to change engineering education to meet the demands of the 21st century head on, **Shaping Our World** condenses current discussions, research, and trials regarding new methods into specific, actionable calls for change.
