Linux Networking Cookbook

From Asterisk to Zebra with Easy-to-Use Recipes

"O'Reilly Media, Inc." This soup-to-nuts collection of recipes covers everything you need to know to perform your job as a Linux network administrator, whether you're new to the job or have years of experience. With *Linux Networking Cookbook*, you'll dive straight into the gnarly hands-on work of building and maintaining a computer network. Running a network doesn't mean you have all the answers. Networking is a complex subject with reams of reference material that's difficult to keep straight, much less remember. If you want a book that lays out the steps for specific tasks, that clearly explains the commands and configurations, and does not tax your patience with endless ramblings and meanderings into theory and obscure RFCs, this is the book for you. You will find recipes for: Building a gateway, firewall, and wireless access point on a Linux network Building a VoIP server with Asterisk Secure remote administration with SSH Building secure VPNs with OpenVPN, and a Linux PPTP VPN server Single sign-on with Samba for mixed Linux/Windows LANs Centralized network directory with OpenLDAP Network monitoring with Nagios or MRTG Getting acquainted with IPv6 Setting up hands-free networks installations of new systems Linux system administration via serial console And a lot more. Each recipe includes a clear, hands-on solution with tested code, plus a discussion on why it works. When you need to solve a network problem without delay, and don't have the time or patience to comb through reference books or the Web for answers, *Linux Networking Cookbook* gives you exactly what you need.

Practical Teaching in Emergency Medicine

John Wiley & Sons *Emergency medicine attendings who wish to hone their teachingskills can find a number of books on educational strategies writtenby physicians from other disciplines. However, until thepublication of the first edition of this book, they did not haveaccess to a text written by emergency medicine physicians onmethods of teaching that are directly applicable to teaching EM. This book was compiled to meet that need. Following the introductory section, which provides importantbackground information, the book's contents are organizedinto 4 sections that correspond to the core needs and interests ofEM educators: Section 2 focuses on practical and ethicalconsiderations of teaching in the ED; Section 3 provides strategiesfor teaching specific groups of learners; Section 4 looks at theskills that are characteristic of the best EM educators; andSection 5 looks indepthly at specific teaching techniques andstrategies. Now more than ever this book addresses the needs of physicianeducators from all over the world. New chapters discuss lecturingto an international audience; using simulation as a teaching tool;how to make journal club work for you, and other topics that are ofbroad interest to medical educators in this field. In general, each chapter has been updated and reviewed to make surethe content was something that emergency physician educators coulduse in any country . The chapter contributors are widely regarded as leaders in thefield of emergency medicine education and faculty development. Authors were given free rein to develop their chapters and write intheir own style. They were asked to present their personal views onhow to successfully teach the art of emergency medicine, ratherthan review evidence-based guidelines regarding medical education.As a result, most of the chapters have few references. Thisfirst-person approach to a multi-authored textbook yields a compilation that varies in style from chapter to chapter andexposes the reader to a variety of communication techniques.*

Social Forms/Human Capacities (RLE Social Theory)

Essays in Authority and Difference

Routledge This is an exhilarating book, written by one of sociology's most imaginative theorists and critics. Professor Corrigan proceeds by turning old answers into new questions. He draws on a rich tradition of thought from sociology, philosophy, structuralism, post-structuralism, and literary criticism to explore major ongoing problems in everyday life: moral regulation, schooling, the capitalist world economy, intellectuals, and the problem of difference, masculinity. The result is one of the most dazzling contributions to critical sociology published in recent years.

Radar Instruction Manual

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. Self-Tracking

MIT Press What happens when people turn their everyday experience into data: an introduction to the essential ideas and key challenges of self-tracking. People keep track. In the eighteenth century, Benjamin Franklin kept charts of time spent and virtues lived up to. Today, people use technology to self-track: hours slept, steps taken, calories consumed, medications administered. Ninety million wearable sensors were shipped in 2014 to help us gather data about our lives. This book examines how people record, analyze, and reflect on this data, looking at the tools they use and the communities they become part of. Gina Neff and Dawn Nafus describe what happens when people turn their everyday experience—in particular, health and wellness-related experience—into data, and offer an introduction to the essential ideas and key challenges of using these technologies. They consider self-tracking as a social and cultural phenomenon, describing not only the use of data as a kind of mirror of the self but also how this enables people to connect to, and learn from, others. Neff and Nafus consider what's at stake: who wants our data and why; the practices of serious self-tracking enthusiasts; the design of commercial self-tracking technology; and how self-tracking can fill gaps in the healthcare system. Today, no one can lead an entirely untracked life. Neff and Nafus show us how to use data in a way that empowers and educates.

Software Architecture 2

John Wiley & Sons Over the past 20 years, software architectures have significantly contributed to the development of complex and distributed systems. Nowadays, it is recognized that one of the critical problems in the design and development of any complex software system is its architecture, i.e. the organization of its architectural elements. *Software Architecture* presents the software architecture paradigms based on objects, components, services and models, as well as the various architectural techniques and methods, the analysis of architectural qualities, models of representation of architectural templates and styles, their formalization, validation and testing and finally the engineering approach in which these consistent and autonomous elements can be tackled.

Essentials of Contemporary Management

McGraw-Hill Companies Jones and George are dedicated to the challenge of "Making It Real" for students. As a team, they are uniquely qualified to write about the organizational challenges facing today's managers. No other author team in the management discipline matches their combined research and text-writing experience. *Essentials of Management* concisely surveys current management theories and research. Through a variety of real world examples from small, medium, and large companies the reader learns how those ideas are used by practicing managers. The organization of this text follows

the mainstream functional approach of planning, organizing, leading, and controlling; but the content is flexible and encourages instructors to use the organization they are most comfortable with. The themes of diversity, ethics, and information technology are clearly evident through in-text examples, photographs, "unboxed" stories, and the end-of-chapter material - all areas of importance that truly serve to bring to life the workplace realities that today's student will encounter in the course of a career.

Everyday Cruelty

How to Deal with Its Effects Without Denial, Bitterness, Or Despair

CreateSpace Your guide to dealing with something we all experience: Everyday Cruelty Have you ever... - been bullied at school, home, or work? - been driven to the edge by an uncooperative telephone technical support employee? - had a medical appointment that was too short to be useful? - had to fight with an insurance company? Everyday cruelty is everywhere there are people: in stores, on the street, in churches, at home, in doctors' offices, in schools, and at work. We experience the effects of everyday cruelty in our bodies, minds, emotions, spirits, and even in how we act in the world. It is no easy task to live with cruelty in our daily lives without falling into "the big three" of troubling responses: denial, bitterness, and despair. *Everyday Cruelty: How to Deal with Its Effects without Denial, Bitterness, or Despair* guides the reader through the process of understanding how to deal with everyday cruelty while being fully aware of its power. By defining cruelty, examining how it affects us, delving into what makes it so painful, and then offering hundreds of strategies for dealing with it, Helen Kobek offers this promise: You can deal with the effects of everyday cruelty without pretending it is not happening, becoming resentful, or giving up.

In Battle for Peace

The Story of My 83rd Birthday

Oxford University Press W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. One of the most neglected and obscure books by W. E. B. Du Bois, *In Battle for Peace* frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial-he was later acquitted-and faced political persecution for over a decade. Part autobiography and part political statement, *In Battle for Peace* remains today a powerful analysis of race in America. With a series introduction by editor Henry Louis Gates, Jr., and an introduction by Manning Marable, this edition is essential for anyone interested in African American history.
