DEVELOPMENTAL BIOLOGY OF NEOPLASTIC GROWTH

Springer Science & Business Media In this book, tumour growth is perceived as a deviation from the normal development of the human organism. The molecular, cellular, and tissue determinants of different tumours are discussed showing that each is a different disease, often corresponding to a particular developmental stage. The natural history of several cancers illustrates how clinical incidence can be just the visible part of the iceberg, while the first changes at the tissue level sometimes occur several years before tumour growth becomes manifest. Several mechanisms are proposed to explain the distribution of cancers during the human life span and the decline of the incidence of cancers during human senescence.

CLUSTERS IN AUTOMOTIVE AND INFORMATION & COMMUNICATION TECHNOLOGY

INNOVATION, MULTINATIONALIZATION AND NETWORKING DYNAMICS

Springer Science & Business Media Information & communication technology (ICT) and the automotive sector are two of the most important industries in the EU and the US. Against this background the intensification of innovation dynamics becomes crucial - and with them the role of regional innovation clusters. The analysis examines seven regions and six EU countries. The focus is on cluster and network dynamics in both industries, as regional ICT clusters are playing an increasingly central role in many European regions. Specialization and structural change in the automotive sector are highlighted, and new strategic approaches for multinational companies and changes in policy options are identified.

BUSINESS SECRETS OF THE TRAPPIST MONKS

ONE CEO'S QUEST FOR MEANING AND AUTHENTICITY

Columbia University Press August Turak is a successful entrepreneur, corporate executive, and award-winning author who attributes much of his success to living and working alongside the Trappist monks of Mepkin Abbey for seventeen years. As a frequent monastic guest, he learned firsthand from the monks as they grew an incredibly successful portfolio of businesses. Service and selflessness are at the heart of the 1,500-year-old monastic tradition's remarkable business success. It is an ancient though immensely relevant economic model that preserves what is positive and productive about capitalism while transcending its ethical limitations and internal contradictions. Combining vivid case studies from his thirty-year business career with intimate portraits of the monks at work, Turak shows how Trappist principles can be successfully applied to a variety of secular business settings and to our personal lives as well. He demonstrates that monks and people like Warren Buffett are wildly successful not despite their high principles but because of them. Turak also introduces other "transformational organizations" that share the crucial monastic business strategies so critical for success.

LIFE IS HARD

MACHISMO, DANGER, AND THE INTIMACY OF POWER IN NICARAGUA

Univ of California Press "Rambo took the barrios by storm: Spanish videotapes of the movie were widely available, and nearly all the boys and young men had seen it, usually on the VCRs of their family's more affluent friends. . . . As one young Sandinista commented, 'Rambo is like the Nicaraguan soldier. He's a superman. And if the United States invades, we'll cut the marines down like Rambo did.' And then he mimicked Rambo's famous war howl and mimed his arc of machine gun fire. We both laughed."—from the book *There is a Nicaragua that Americans have rarely seen or heard about, a nation of jarring political paradoxes and staggering social and cultural flux. In this Nicaragua, the culture of machismo still governs most relationships, insidious racism belies official declarations of ethnic harmony, sexual relationships between men differ starkly from American conceptions of homosexuality, and fascination with all things American is rampant. Roger Lancaster reveals the enduring character of Nicaraguan society as he records the experiences of three families and their community through times of war, hyperinflation, dire shortages, and political turmoil. Life is hard for the inhabitants of working class barrios like Doña Flora, who expects little from men and who has reared her four children with the help of a constant female companion; and life is hard for Miguel, undersized and vulnerable, stigmatized as a cochón—a "faggot"—until he learned to fight back against his brutalizers. Through candid discussions with young and old Nicaraguans, men and women, Lancaster constructs an account of the successes and failures of the 1979 Sandinista Revolution, documenting the effects of war and embargo on the cultural and economic fabric of Nicaraguan society. He tracks the break up of families, surveys informal networks that allow female-headed households to survive, explores the gradual transformation of the culture of machismo, and reveals a world where heroic efforts have been stymied and the best hopes deferred. This vast chronicle is sustained by a rich theoretical interpretation of the meanings of ideology, power, and the family in a revolutionary setting. Played out against a backdrop of political travail and social dislocation, this work is a story of survival and resistance but also of humor and happiness. Roger Lancaster shows us that life is hard, but then too, life goes on.*

BEYOND THE BIG DITCH

POLITICS, ECOLOGY, AND INFRASTRUCTURE AT THE PANAMA CANAL

MIT Press A historical and ethnographic study of the conflict between global transportation and rural development as the two intersect at the Panama Canal. In this innovative book, Ashley Carse traces the water that flows into and out from the Panama Canal to explain how global shipping is entangled with Panama's cultural and physical landscapes. By following container ships as they travel downstream along maritime routes and tracing rivers upstream across the populated watershed that feeds the canal, he explores the politics of environmental management around a waterway that links faraway ports and markets to nearby farms, forests, cities, and rural communities. Carse draws on a wide range of ethnographic and archival material to show the social and ecological implications of transportation across

Panama. The Canal moves ships over an aquatic staircase of locks that demand an enormous amount of fresh water from the surrounding region. Each passing ship drains 52 million gallons out to sea—a volume comparable to the daily water use of half a million Panamanians. Infrastructures like the Panama Canal, Carse argues, do not simply conquer nature; they rework ecologies in ways that serve specific political and economic priorities. Interweaving histories that range from the depopulation of the U.S. Canal Zone a century ago to road construction conflicts and water hyacinth invasions in canal waters, the book illuminates the human and nonhuman actors that have come together at the margins of the famous trade route. 2014 marks the 100th anniversary of the Panama Canal. *Beyond the Big Ditch* calls us to consider how infrastructures are materially embedded in place, producing environments with winners and losers.

SOCIOLOGY FOR PHARMACISTS

It offers an overview of sociology for rather than sociology of pharmacy, and will both inform practitioners and stimulate informed research into the social aspects of pharmacy practice. Key issues covered include: Key sociological concepts and perspectives Contemporary developments in pharmacy practice and pharmacy's professional status A review of research into the way people react to illness and look after their health How and why illness and disease are influenced by gender, ethnicity, and social class Health education and pharmacists' role in promoting health and ensuring appropriate medicine usage Social research methods Pharmacists are frequently

encouraged to broaden their day-to-day practice. STANDARD C++ IOSTREAMS AND LOCALES

ADVANCED PROGRAMMER'S GUIDE AND REFERENCE

Addison-Wesley Professional Standard C++ provides a foundation for creating new, improved, and more powerful C++ components. IOStreams and locales are two such major components for text internationalization. As critical as these two APIs are, however, there are few resources devoted to explaining them. "Standard C++ IOStreams and Locales" fills this informational gap. It provides a comprehensive description of, and reference to, the iostreams and locales classes, showing how to put them to use and offering advanced information on customizing and extending their basic operation. Written by two experts involved with the development of the standard, this book reveals the rationale behind the design of the APIs and points out their potential pitfalls. This book serves as both a guide and a reference to C++ components. Part I explains iostreams, what they are, how they are used, their underlying architectural concepts, and the techniques for extending the iostream framework. Part II introduces internationalization and shows you how to adapt your program to local conventions. Readers seeking an initial overview of the problem domain will find an explanation of what internationalization and localization are, how they are related, and how they differ. With examples, the authors show the differences among cultural conventions, how C++ locales can be used to address such differences, and how locale framework can be extended to handle further, nonstandard cultural conventions. "Standard C++ IOStreams and Locales" Explains formatting and error indication features of iostreams in detail Describes underlying concepts of the iostreams framework Demonstrates implementation of i/o operations for user-defined types Shows techniques for implementing extended stream and stream buffer classes Introduces internationalization Explains how to use standard features for internationalization Demonstrates techniques for implementation of user-defined internationalization services IOStreams and locales serve as a foundation library that provides a number of ready-to-use interfaces, as well as frameworks that can be customized and extended. The class reference to C++ IOStreams and locales completes this comprehensive resource, which belongs in the libraries of all intermediate and advanced C++ programmers.
