Black Man in a White Coat

A Doctor's Reflections on Race and Medicine

Macmillan "When Damon Tweedy first enters the halls of Duke University Medical School on a full scholarship, he envisions a bright future where his segregated, working class background will become largely irrelevant. Instead, he finds that he has joined a new world where race is front and center. When one of his first professors mistakes him for a maintenance worker, it is a moment that crystallizes the challenges he will face throughout his early career. Making matters worse, in lecture after lecture the common refrain for numerous diseases resounds: "more common in blacks than whites." [This book] examines the complex ways in which both black doctors and patients must navigate the difficult and often contradictory terrain of race and medicine"--

Reflection and the Stability of Belief

Essays on Descartes, Hume, and Reid

Oxford University Press A unifying theme of Loeb's work is epistemological - that Descartes and Hume advance theories of knowledge that rely on a substantial 'naturalistic' component, adopting one or another member of a cluster of psychological properties of beliefs as the goal of inquiry and the standard for assessing belief-forming mechanisms. Thus Loeb shows a surprising affinity between the epistemologies of the two figures -- surprising because they are often thought of as polar opposites in this respect. Descartes and Hume are unique in that their philosophical texts are accessible beyond just a narrow audience in the history of philosophy; their ideas continue to be a vital part of the field at large. This volume will thus appeal to advanced students and scholars not just in the history of early modern philosophy but in epistemology and other core areas of the discipline.

Review of Progress in Quantitative Nondestructive Evaluation

Volume 14A / 14B

Springer Science & Business Media These Proceedings, consisting of Parts A and B, contain the edited versions of most of the papers presented at the annual Review of Progress in Quantitative Nondestructive Evaluation held at Snowmass Village, Colorado, on July 31 to August 4, 1994. The Review was organized by the Center for NDE at Iowa State University, in cooperation with the Ames Laboratory of the US DOE, the Materials Directorate of the Wright Laboratory, Wright-Patterson Air Force Base, the American Society of Nondestructive Testing, the Department of Energy, the National Institute of Standards and Technology, the Federal Aviation Administration, the National Science Foundation Industry/University Cooperative Research Centers, and the Working Group in Quantitative NDE. This year's Review of Progress in QNDE was attended by approximately 450 participants from the U.S. and many foreign countries who presented over 360 papers. The meeting was divided into 36 sessions, with as many as four sessions running concurrently. The Review covered all phases of NDE research and development from fundamental investigations to engineering applications or inspection systems, and it included many important methods of inspection science from acoustics to x-rays. In the last eight to ten years, the Review has stabilized at about its current size, which most participants seem to agree is large enough to permit a full-scale overview of the latest developments, but still small enough to retain the collegial atmosphere which has marked the Review since its inception.

Meditations on Intention and Being

Daily Reflections on the Path of Yoga, Mindfulness, and Compassion

Anchor Books Yoga has never been more popular. Throughout the United States, people are turning to this ancient practice as a response to the pressures of today's hectic world. In **Meditations on Intention and Being**, acclaimed yoga teacher Rolf Gates draws on twenty years of teaching experience to explore and explain how to take the mindfulness of yoga off the mat and integrate it into every aspect of life. Presented in the form of 365 inspirational daily reflections, Gates helps readers--from experienced yogis to novices seeking a little tranquility--to fundamentally reconsider their relationships with their minds, bodies, and the universe around them through self-reflection. Over the course of seven chapters, he explores Effortlessness, Nonviolence, The Spirit of Practice, Mindfulness, Compassion and Loving-kindness, Equanimity and Joy, and Intention and Being, giving readers the tools they need to effect positive changes in their lives.

Reflection and the College Teacher

A Solution for Higher Education

IAP Higher education is facing many challenges, not least of which is retaining excellent faculty and cultivating their continued professional growth. This book explicitly ties the literature to the practical concerns and recommendations related to applying the reflective process in a college setting. In this way, the theories and empirical findings of the most recent literatures are linked to practical recommendations. The reflective tools described in this book provide an important resource for faculty's reflective practice. Unlike other books on the topic, the model developed and presented in this book allows for the reflective process to validate faculty's previous actions or accomplishments and maintain these practices. In other words, the endpoint of reflective process supports self-satisfaction. Instead of a deficit model, the focus is development. In this comprehensive volume, readers discover the seminal and the recent research in reflective practice drawn from a wide range of sources, including the authors' recent research findings on college teachers' reflection. Altogether, Wlodarsky and Walters systematically address these critical questions: a. What is reflection? b. Of what practical use or benefit does reflection serve? c. How do college teachers model reflection in the workplace? d. What are the steps in the reflective process? e. How can the reflective process be harnessed for program improvement in the college setting and in individual faculty practices? Wlodarsky and Walters understand and address the real needs of college teachers today. They created not only a thorough academic book, but also a compelling, relevant read. Specifically, they designed the chapters to include scenarios—developed from interview transcripts with college teachers. These stories powerfully contextualize the types of problems and tensions which surround the professional work environment of a college campus and the roles of the college teacher.

Reflections on the Principles of Psychology

William James After A Century

Psychology Press This important volume looks back to 1890 and -- 100 years later -- asks some of the same questions William James was asking in his *Principles of Psychology*. In so doing, it reviews our progress toward their solutions. Among the contemporary concerns of 1990 that the editors consider are: the nature of the self and the will, conscious experience, associationism, the basic acts of cognition, and the nature of perception. Their findings: Although the developments in each of these areas during the last 100 years have been monumental, James' views as presented in the *Principles* still remain viable and provocative. To provide a context for understanding James, some chapters are devoted primarily to recent scholarship about James himself -- focusing on the time the *Principles* was written, relevant intellectual influences, and considerations of his understanding of this "new" science of psychology. The balance of this volume is devoted to specific topics of particular interest to James. One critical theme woven into almost every chapter is the tension between the role of experience (or phenomenological data) within a scientific psychology, and the viability of a materialistic (or biologically reductive) account of mental life. Written for professionals, practitioners, and students of psychology -- in all disciplines.

Police on Camera

Surveillance, Privacy, and Accountability

Routledge Police body-worn cameras (BWCs) are at the cutting edge of policing. They have sparked important conversations about the proper role and extent of police in society and about balancing security, oversight, accountability, privacy, and surveillance in our modern world. Police on Camera address the conceptual and empirical evidence surrounding the use of BWCs by police officers in societies around the globe, offering a variety of differing opinions from experts in the field. The book provides the reader with conceptual and empirical analyses of the role and impact of police body-worn cameras in society. These analyses are complimented by invited commentaries designed to open up dialogue and generate debate on these important social issues. The book offers informed, critical commentary to the ongoing debates about the implications that BWCs have for society in various parts of the world, with special attention to issues of police accountability and discretion, privacy, and surveillance. This book is designed to be accessible to a broad audience, and is targeted at scholars and students of surveillance, law and policy, and the police, as well as policymakers and others interested in how surveillance technologies are impacting our modern world and criminal justice institutions.

Is This a Dream?

Reflections on the Awakening Mind

John Hunt Publishing Using the philosophy of non-duality as a framework, Anoop Kumar takes you on an exploration of identity, the core factor that is at the heart of not only spirituality, but also science, philosophy, religion, and every other facet of life, including washing the dishes on Saturday night after the guests leave. But identity isn't only about us. It also influences what we see of the world around us. What is this world, after all? How does it relate to who we are and how we experience the world? As we explore these questions, the falseness of the dichotomy of you and the world around you is exposed. We are now upon a time in which our perspectives on spirituality, science, philosophy, and religion have evolved enough to stand together in the glare of the spotlight as we ask the most practical of questions: What is the common truth among all these? How does it change my life right now? How does it change the world? Is This a Dream? includes a Foreword by Deepak Chopra

Meditations from the Mat
