### **PEACE, SECURITY AND POST-CONFLICT RECONSTRUCTION IN THE GREAT LAKES REGION OF AFRICA**

---

**African Books Collective** The Great Lakes region of Africa is characterized by protest politics, partial democratization, political illegitimacy and unstable economic growth. Many of the countries that are members of the International Conference on the Great Lakes Region (ICGLR) which are: Burundi, Angola, Central African Republic, Democratic Republic of the Congo, Republic of the Congo, Kenya, Uganda, Rwanda, Sudan, South Sudan, Tanzania, and Zambia, have experienced political violence and bloodshed at one time or another. While a few states have been advancing electoral democracy, environmental protection and peaceful state building, the overall intensity of violence in the region has led to civil wars, invasion, genocide, dictatorships, political instability, and underdevelopment. Efforts to establish sustainable peace, meaningful socio-economic development and participatory democracy have not been quite successful. Using various methodologies and paradigms, this book interrogates the complexity of the causes of these conflicts; and examines their impact and implications for socio-economic development of the region. The non-consensual actions related to these conflicts and imperatives of power struggles supported by the agents of savage capitalism have paralysed efforts toward progress. The book therefore recommends new policy frameworks within regionalist lenses and neo-realist politics to bring about sustainable peace in the region.

### **ECONOMIC GROWTH AND THE MIDDLE CLASS IN AN ECONOMY IN TRANSITION**

---

#### **THE CASE OF RUSSIA**

---

Springer This book studies the evolution of the middle class in Russia after the fall of the Soviet Union. Using data from the RLMS (Russian Longitudinal Monitoring Survey), the volume covers the period of transition (1991-2008) during which many fundamental economic reforms were implemented. The first part of the book is devoted to a discussion of the concept of middle class and a description of the economic situation in Russia during the transition period. Particular attention is given to variations in the distribution of Russian incomes and the estimated importance of the middle class. The second part of the book focuses on the link between the middle class and income bipolarization. The third and last section of the book uses the semiparametric "mixture model" to discover how many different groups may be derived from the income distribution in Russia, as well as what the main socio-economic and demographic characteristics of those groups are. The mobility of households into and out of the middle class during the transition

period is also studied in hopes of determining the factors that contribute to such mobility. Using rigorous empirical methods, this volume sheds light on a relatively unstudied economic group and provides insight for countries which are about to enter a transition period. As such, this book will be of great interest to researchers in economics and inequality as well as professionals and practitioners working with international organizations.

## **SELECTED WORKS OF E. L. LEHMANN**

---

Springer Science & Business Media These volumes present a selection of Erich L. Lehmann's monumental contributions to Statistics. These works are multifaceted. His early work included fundamental contributions to hypothesis testing, theory of point estimation, and more generally to decision theory. His work in Nonparametric Statistics was groundbreaking. His fundamental contributions in this area include results that came to assuage the anxiety of statisticians that were skeptical of nonparametric methodologies, and his work on concepts of dependence has created a large literature. The two volumes are divided into chapters of related works. Invited contributors have critiqued the papers in each chapter, and the reprinted group of papers follows each commentary. A complete bibliography that contains links to recorded talks by Erich Lehmann - and which are freely accessible to the public - and a list of Ph.D.

students are also included. These volumes belong in every statistician's personal collection and are a required holding for any institutional library.

## **ADVANCING WOMEN IN SCIENCE**

---

---

## **AN INTERNATIONAL PERSPECTIVE**

---

Springer Many countries have implemented policies to increase the number and quality of scientific researchers as a means to foster innovation and spur economic development and progress. To that end, grounded in a view of women as a rich, yet underutilized knowledge and labor resource, a great deal of recent attention has focused on encouraging women to pursue education and careers in science — even in countries with longstanding dominant patriarchal regimes. Yet, overall, science remains an area in which girls and women are persistently disadvantaged. This book addresses that situation. It bridges the gap between individual- and societal-level perspectives on women in science in a search for systematic solutions to the challenge of building an inclusive and productive scientific workforce capable of creating the innovation needed for economic growth and societal wellbeing. This book examines both the role of gender as an organizing principle of social life and the relative position of women scientists within national and international labor markets. Weaving together and engaging research on globalization, the social organization of science, and gendered societal relations as key social forces, this book addresses critical issues affecting women's contributions and participation in science. Also, while considering women's representation in science as a whole, examinations of women in the chemical sciences, computing, mathematics and statistics are offered as examples to

provide insights into how differing disciplinary cultures, functional tasks and socio-historical conditions can affect the advancement of women in science relative to important variations in educational and occupational realities. Edited by three social scientists recognized for their expertise in science and technology policy, education, workforce participation, and stratification, this book includes contributions from an intellectually diverse group of international scholars and analysts and features compelling cases and initiatives from around the world, with implications for research, industry practice, education and policy development.

### **ANZAC, THE UNAUTHORISED BIOGRAPHY**

---

NewSouth Raise a glass for an Anzac. Run for an Anzac. Camp under the stars for an Anzac. Is there anything Australians won't do to keep the Anzac legend at the centre of our national story? But standing firm on the other side of the Anzac enthusiasts is a chorus of critics claiming that the appetite for Anzac is militarising our history and indoctrinating our children. So how are we to make sense of this struggle over how we remember the Great War? Anzac, the Unauthorised Biography cuts through the clamour to provide a much-needed historical perspective on the battle over Anzac. It traces how, since 1915, Australia's memory of the Great War has declined and surged, reflecting the varied and complex history of the Australian nation itself. Most importantly, it asks why so many Australians persist with the fiction that the nation was born on 25 April 1915.

### **INCLUSIVE APPROACHES TO PREVENTING VIOLENT CONFLICT**

---

World Bank Publications Violent conflicts today are complex and increasingly protracted, involving more nonstate groups and regional and international actors. It is estimated that by 2030—the horizon set by the international

community for achieving the Sustainable Development Goals—more than half of the world’s poor will be living in countries affected by high levels of violence. Information and communication technology, population movements, and climate change are also creating shared risks that must be managed at both national and international levels. Pathways for Peace is a joint United Nations†World Bank Group study that originates from the conviction that the international community’s attention must urgently be refocused on prevention. A scaled-up system for preventive action would save between US\$5 billion and US\$70 billion per year, which could be reinvested in reducing poverty and improving the well-being of populations. The study aims to improve the way in which domestic development processes interact with security, diplomacy, mediation, and other efforts to prevent conflicts from becoming violent. It stresses the importance of grievances related to exclusion—from access to power, natural resources, security and justice, for example—that are at the root of many violent conflicts today. Based on a review of cases in which prevention has been successful, the study makes recommendations for countries facing emerging risks of violent conflict as well as for the international community. Development policies and programs must be a core part of preventive efforts; when risks are high or building up, inclusive solutions through dialogue, adapted macroeconomic policies, institutional reform, and redistributive policies are required. Inclusion is key, and preventive action needs to adopt a more people-centered approach that includes mainstreaming citizen engagement. Enhancing the participation of women and youth in decision making is fundamental to sustaining peace, as well as long-term policies to address the aspirations of women and young people.
