Even those who accept that humans can reach beyond the conventional five senses typically think of psychics as "special" or "gifted" with unusual abilities. But David Morehouse teaches otherwise—all human beings, including you, have the innate capacity for remote viewing. David Morehouse was trained by the U.S. government in remote viewing—an exact scientific protocol for tapping the human power to gather information across space and time. In this comprehensive manual, he has taken his military training as an "operational" remote viewer and turned it into a step-by-step training system—one that teaches any serious reader how to unlock their natural abilities and become more than the physical world allows. Remote Viewing includes more than just a method for gathering information. It is a transformational tool instilling within you the absolute and irrefutable evidence that you are more than human—that you are extraordinarily human. As you gain experience and confidence as a viewer, you will tap into the collective unconscious that connects you to everything and everyone in the universe. Through David Morehouse's training, you will learn to touch the infinite source of life and knowledge that spiritual masters throughout human history have sought. David Morehouse's superiors in the DIA/CIA called him "the most exceptional candidate ever to have grasped this difficult intelligence collection methodology." What sets him apart as a teacher is his unparalleled ability to present the complexities of remote viewing in an accessible, logical, and artful manner. As more than 23,000 students have already discovered, David Morehouse has set a new and brilliant standard for teaching the scientific protocol of remote viewing. "You have the ability to do this," Morehouse says. "Something extraordinary is absolutely possible in your life." Now for the first time, he brings you his method for taking your first step into your ultimate potential in a single volume: *Remote Viewing: The Complete User's Manual for Coordinate Remote Viewing*, which also include a cool-down audio track. David Morehouse has found that this psychoacoustic "pink noise" track is especially effective for helping us enter the brainwave state of relaxed awareness needed for remote viewing. *Marine Instruction Manual for Bendix Remote Controls Operation, Use, Installation of Hydraulic Operation of Throttle, Electric Operation of Throttle, Electro-vacuum Gear Shift, Vacuum Operation of Throttle Governors Engineering Psychology and Cognitive Ergonomics. You're not on your feet all day and you do no heavy lifting. You have escaped from the brutal nature of most human labor. And yet at the end of the day you feel exhausted. You have vague aches and pains that you are embarrassed to mention to your doctor. If you do, the doctor gives you some equally vague advice: take it easy; don't push yourself; get more rest. If that doesn't work, maybe you're a whiner, a hypochondriac. Or maybe you're being attacked by your possessions. Perhaps you've been making do with a worn-out old mattress in the bedroom, an office chair that won't let you sit up straight, and a computer screen that you struggle to read with your bifocals. You bought a desk and a file cabinet whose colors complement each other perfectly, but you had no idea how downright irritating ordinary furniture can get if the only choice you bother with is matching style and color. Somewhere in this world is a reading light, chair, bed, perhaps even a keyboard and desk, built just for you. This book will show you how to find them.
