Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Management of Obstructive Sleep Apnea An Evidence-Based, Multidisciplinary Textbook Springer Nature This book provides comprehensive information on the etiology, pathophysiology, medical implications, diagnosis, and surgical and nonsurgical treatment of obstructive sleep apnea (OSA). Divided into five parts, the book begins with principles and fundamentals of OSA and its diagnostic considerations. Subsequent parts then address non-surgical management, surgical management, and maxillomandibular advancements for OSA. Chapters seek to approach this common disorder from the viewpoint of multiple specialties, thereby promoting the development of a broad strategy for the evaluation and management of OSA patients that draws on each of them. An invaluable reference, Management of Obstructive Sleep Apnea: An Evidence-Based, Multidisciplinary Textbook meets the needs of advanced dental and medical students, orthodontic, maxillofacial, ENT, neurology, and plastic surgery residents, and sleep medicine and pulmonary physicians. Advances in Biomedicine Springer This book gathers multidisciplinary articles that present advances of our understanding of diseases and the effective treatment of patients. The authors share recent clinical and experimental research findings, highlighting poorly understood areas with uncertain treatment outcomes, such as giant-cell bone tumors and their propensity to metastasize to the lungs; subterranean rehabilitation in pulmonary disorders; male reproductive hormone regulation during physical exercise in hyperbaric, hyperoxic environments, like underwater diving; and amelioration of cognitive decline owing to increased cerebral blood transit time after internal carotid artery stenting. Other topics include new concepts and innovations in the treatment of diabetes in pregnancy, and leg ulcers in chronic venous insufficiency, as well as molecular research on the toxic effects of oxidative stress, impaired cell autophagy, and experimental conditions resembling air pollution. Featuring the latest interdisciplinary advances in biomedicine, this book is a valuable resource for medical professionals, both academics and practitioners, and all allied health-care workers. A Purrfect Match Dreamspinner Press When a bad day at work culminates in losing out on a promotion, Jim Sanders shifts into his animal form to let off steam. Then his bad day turns into a bad night-while prowling his Atlantic City neighborhood as a large gray house cat, he's caught in a torrential downpour. What little luck he has washes down the gutter when his new boss, Andrew Wright, catches him taking shelter on his porch, brings him inside, and starts calling him Mr. Frosty. As a feline, Jim becomes the inadvertent confessor for his boss's lonely son, Tony, a victim of schoolyard bullying. As a human, he feels drawn to Andrew, a man he wanted to resent. Finding love was never part of Jim's plan for the future-not with his bizarre secret-yet suddenly he finds himself navigating that minefield anyway. But not everything is easy, especially for an interracial gay couple dealing with prejudice in the workplace, at Tony's school, and even within their own

families. Warehousing in the Global Supply Chain Advanced Models, Tools and Applications for Storage Systems Springer Science & Business Media With increased globalization and offshore sourcing, global supply chain management is becoming an important issue for many businesses as it involves a company's worldwide interests and suppliers rather than simply a local or national orientation. The storage systems significantly affect the level of quality of products, the customer's service level, and the global logistic cost. The mission of warehousing systems design, control and optimization is to effectively ship products in the right place, at the right time, and in the right quantity (i.e. in any configuration) without any damages or alterations, and minimizing costs. Warehousing in the Global Supply Chain presents and discusses a set of models, tools and real applications, including a few case studies rarely presented with a sufficient detail by other literature, to illustrate the main challenges in warehousing activities. This includes all warehouse operations (from receiving to shipping), problems and issues (e.g. storage allocation, assignment, layout, vehicle routing) for industrial and service systems as parts of global supply chains. Advanced and effective solving methods are also illustrated and the discussed case studies help the reader to quickly

apply the proposed models and techniques/algorithms. Warehousing in the Global Supply Chain is useful to managers and practitioners of industry and service sectors for the determination and modeling of the critical issues concerning warehousing systems planning and design. It is a valuable source of information for engineering students, doctoral and post-doctoral students, and researchers of academic institutions who are searching for advanced modeling approaches and solving techniques to complex logistic decision making problems. Running time: 4 hours. The Three Amigos The Transnational Filmmaking of Guillermo Del Toro, Alejandro González Iñárritu, and Alfonso Cuarón Spanish and Latin-American Filmmakers This is the first academic book dedicated to the filmmaking of the Mexican born directors Guillermo del Toro, Alejandro González Iñárritu, and Alfonso Cuarón. The book examines the career trajectories of the directors and presents a detailed analysis of their most significant films. These include studies on del Toro's Cronos/Chronos, El laberinto del fauno/Pan's Labyrinth, Hellboy II: The Golden Army; Iñárritu's Amores Perros, 21 Grams and Babel; and Cuarón's Sólo con tu pareja/Love in the Time of Hysteria, Y tu mamá también, and Children of Men. All three have worked in diverse industrial contexts, and between them they have made key films that have changed the nature of filmmaking in Mexico, Hollywood blockbusters, US independent films, 'European' art films, and films that defy easy classification. They have had unprecedented international success and have crossed linguistic, national and generic borders, cutting through traditional divisions created by film markets. As a result, this book challenges the ways both markets and critics have created clear-cut distinctions between mainstream commercial and independent art cinema, and the ways they have conceptualised US, Latin American and European cinema as discrete entities. The work of the three directors creates new hybrid formations and makes us rethink ways in which we have understood the auteur label. The main theoretical approaches applied in this book to analyse the directors' working practices and texts centre on new readings of auteurism and transnational film theories. This book will be of interest to undergraduate and postgraduate students of film studies and Hispanic studies, and general cinema enthusiasts who are interested in the films of the three directors. The book uses a combination of sight words and short-vowel words in repetition to build recognition. Original illustrations help guide readers through the text."-- How to Become an Angel McArthur Publishing Enigmatic in character, a guru despite himself, a man of absolute goodness, does Victor Lazarre possess supernatural powers or does he merely know how to listen to others to the extent that it changes the course of their lives? This question will haunt Francois

for years. A budding journalist, Francois lives with two young people, a strange girl named Provencal, and the unpredictable Fred. In twenty years of friendship based on respect and independence, these friends will evolve, sever ties with the past, and sometimes suffer the consequences. Love, violence, shattered utopias, experiences and professional success and disappointment are all part of the baggage that one day Francois finds himself compelled to write down, in a book about Victor Lazarre. Because this morning, before his astounded eyes, Victor flew away...
