## Rogerian Perspectives

### Collaborative Rhetoric for Oral and Written Communication

[Greenwood Publishing Group](#) **Advancing the application of Carl Rogers' ideas, this book presents new theoretical and practical views of Rogerian influences on rhetorical theory, the teaching of writing, and pragmatic discourse. Practically, the contributors focus on the dynamics of Rogerian communication in real-world contexts, extending Rogers' person-centered principles into classroom interactions, peer response groups, and other collaborations. Theoretically, discussions situate Rogerian principles within the contexts of persuasive and dialogical rhetoric, and of psychoanalytic and philosophical intersubjectivity. Also included are transcripts of an interview with Rogers, and a forum discussion epitomizing Rogerian principles in action.**

Discussions focus on packing in non-Euclidean spaces, problems in the Euclidean plane, general convex bodies, computational complexity of lattice point problem, centrally symmetric convex bodies, reduction theory, and lattices and the space of lattices. The text then examines finite packing and covering and tilings, including plane tilings, monohedral tilings, bin packing, and sausage problems. The manuscript takes a look at valuations and dissections, geometric crystallography, convexity and differential geometry, and convex functions. Topics include differentiability, inequalities, uniqueness theorems for convex hypersurfaces, mixed discriminants and mixed volumes, differential geometric characterization of convexity, reduction of quadratic forms, and finite groups of symmetry operations. ### Using Poetry as and for Inquiry

[Springer](#) This volume offers a novel collection of international works on the use of poetry in inquiry that transcends conventional disciplinary boundaries. The aim is to illustrate an 'aesthetic move' in social sciences and in particular in health and in education. The collection builds a bridge between the Arts and Health and Education by offering innovative exemplars of use of poetry in social science research and in the context of the many varied disciplinary contexts. An exploration of poetry within an international interdisciplinary collection in the context of education, research inquiry and health and social care with university-affiliated authors is offered. Writers include literary poets, academics and researchers in the arts, the humanities, and human and social sciences: an unusual interdisciplinary community. Authors contribute work illustrating how they are finding varied approaches to make use of the resonant power of words through poetry in their investigations. Writers' aims span new ways to help readers resonate and connect with findings; new ways of revealing deep understandings of human experience; new ways of being in dialogue with research findings and new ways of working with people in vulnerable situations to name 'what it is like'. As such, the collection offers examples of the foremost ways seen in the literature for poetry to appear in education, health and caring sciences, anthropology, sociology, psychology, social work and related fields. Most qualitative research texts focus on one discipline; this text will be relevant for many postsecondary programs and courses including in education, health sciences, arts and humanities and social sciences.

### Theoretical Nursing

### Development and Progress

[Lippincott Williams & Wilkins](#) "An additional assumption was that the processes for theory development were new to nursing and hence, nurses in graduate programs learned strategies for advancing knowledge from other disciplines. This assumption was debunked with the knowledge that nurses were always engaged in knowledge development, driven by their experiences in clinical practice. Because of these assumptions, most of the early writing about theory development was about outlining strategies that should be used, rather than strategies that have already been used in the discipline to develop theories. Theorists themselves did not uncover or adequately discuss ways by which they developed their theories, therefore the tendency was to describe processes that were based on theories developed in other disciplines, mainly the physical and social sciences. And an implicit assumption was made that there should be a single strategy for theory development, some claiming to begin the process from practice, and others believing it should be driven by research"--Provided by publisher.

## A Person-Centered Approach and the Rogerian Tradition

### A Handbook

[Adam Quinn](#) **From the Book:** "it is hypothesized that the therapist wants to understand for no other reason but to understand. If the therapist is motivated to understand solely to be a change agent for the client, then the facilitative mechanisms may not be sufficient because a tendency toward unconditional acceptance will not effectively emerge." "the published literature in the 1970s suggests that person-centered therapy (PCT) researchers, rather than pursuing novel avenues of empirical inquiry, devoted substantial time in defending PCT against - what now appear to be - unfounded claims made by a group of social scientists who held significant professional interest in seeing through the dismantling of the person-centered approach." **Book Summary:** This book is about a person-centered approach to counseling and psychotherapy as developed by the psychologist Carl Rogers (1902-1987) and his colleagues. In addition, this book is also intended to be a handbook on the person-centered approach and the Rogerian tradition for use in academic and non-academic settings alike. Each chapter is briefly summarized below. Chapter 1 ("A Person-Centered Approach and the Structure of Scientific Revolutions") examines the trend of scientific inquiry in psychotherapy research, specifically focusing on events and changes that took place beginning in the 1970s and are argued to have substantially influenced the direction of psychotherapy research in the following decades. In particular, these changes are suggested to have been guided by the choices made by a small but influential group of behavior and psychoanalytic-oriented researchers, which arguably led to changes in the scientific methods used to investigate the effectiveness of psychotherapeutic treatments; and, as will be shown in this chapter, led to the decline and disappearance of Carl Rogers's person-centered approach. This chapter suggests that through a method of allegiance-guided scientific inquiry, the Rogerian tradition was systematically dismantled by a group of social scientists that held considerable professional interests to do so. Chapter 2 ("A Person-Centered Approach to Multicultural Counseling Competence") examines current and historical trends in psychotherapy research and practice with racial/ethnic minority populations. Using psychotherapy evidence from both the latter half of the 20th century and the initial decades of the 21st century, cultural adaptations to previously hypothesized person-centered therapy mechanisms of change are proposed. Chapter 3 ("A Person-Centered Approach to the Treatment of Borderline Personality Disorder") addresses psychotherapy with a person described as possessing a borderline personality disorder (BPD). In particular, a selection of mainstream approaches is reviewed to examine unique and universal aspects of current thinking about this treatment population. Following this review, an expanded analysis of person-centered therapy is offered, examining current research evidence and the mechanisms of change hypothesized to occur in the person-centered treatment of BPD. Chapter 4 ("A Person-Centered Approach to the Treatment of Combat Veterans with Posttraumatic Stress Disorder") examines posttraumatic stress disorder through the lens of military combat trauma that results in a breakdown of a combat veteran's sense of self and the world. In the effective treatment of combat-related posttraumatic stress disorder, a therapist must help the veteran reorganize the self-structure that has become incongruent with his or her precombat-trauma self following his or her return home from war. For the therapist to facilitate a veteran's becoming whole, he or she must be genuinely congruent in the relationship.

## Rhetoric: Discovery and Change

[Harcourt College Pub](#)

### Changing the Subject

## A Theory of Rhetorical Empathy

[University Press of Colorado](#) **Changing the Subject** explores ways of engaging across difference. In this first book-length study of the concept of empathy from a rhetorical perspective, Lisa Blankenship frames the classical concept of pathos in new ways and makes a case for rhetorical empathy as a means of ethical rhetorical engagement. The book considers how empathy can be a deliberate, conscious choice to try to understand others through deep listening and how language and other symbol systems play a role in this process that is both cognitive and affective. Departing from agonistic win-or-lose rhetoric in the classical Greek tradition that has so strongly influenced Western thinking, Blankenship proposes that we ourselves are changed ("changing the subject" or the self) when we focus on trying to understand rather than simply changing an Other. This work is informed by her experiences growing up in the conservative South and now working as a professor in New York City, as well as the stories and examples of three people working across profound social, political, class, and gender differences: Jane Addams's activist work on behalf of immigrants and domestic workers in Gilded Age Chicago; the social media advocacy of Brazilian rap star and former maid Joyce Fernandes for domestic worker labor reform; and the online activist work of Justin Lee, a queer Christian who advocates for greater understanding and inclusion of LGBTQ+ people in conservative Christian churches. A much-needed book in the current political climate, *Changing the Subject* charts new theoretical ground and proposes ways of integrating principles of rhetorical empathy in our everyday lives to help fight the temptations of despair and disengagement. The book will appeal to students, scholars, and teachers of rhetoric and composition as well as people outside the academy in search of new ways of engaging across differences.

### Undoing the Silence

### Six Tools for Social Change Writing

**New Village Press Undoing the Silence** offers guidance to help both citizens and professionals influence democratic process through letters, articles, reports and public testimony. Louise Dunlap, PhD, began her career as an activist writing instructor during the Free Speech Movement of the 1960s. She learned that listening and gaining a feel for audience are just as important to social transformation as the outspoken words of student leaders atop police cars. "Free speech is a first step, but real communication matches speech with listening and understanding. That is when thinking shifts and change happens." Dunlap felt compelled to go where the silences were deepest because her work aimed not just at teaching but also at healing both individual voices and an ailing collective voice. Her tales of those adventures and what she knows about the culture of silence -- how gender, race, education, class, and family work to quiet dissent -- are interwoven with practical methods for people to put their most challenging ideas into words. Louise Dunlap gives writing workshops around the country for universities and social justice, environmental, and peace organizations that help reluctant writers get past their internal censors to find their powerful voice. Her insight strengthens strategic thinking and her "You can do it!" approach makes social-action writing achievable for everyone.
