Crewing to Win

How to be the best crew & a great team

Fernhurst Books Limited The crew of a racing boat is as important as the helmsman - they work as a team to sail as fast as they can. But different members of that team have different roles in the boat. In addition to the obvious roles which belong to the crew - trimming the jib and spinnaker and helping keep the boat upright - the crew can also contribute to tactics, boat tuning, watching the competition and so on. In this book, Olympic gold medallist crew, Saskia Clark, describes all that is needed to become a top-rate crew, or just be a better crew at whatever level you want to compete at. She initially takes you through getting started as a crew and team - choosing a boat and setting your goals. She then turns to the specific crewing skills of hiking, trapezing, tacking, gybing, handling the spinnaker and having good boatspeed on each leg of the course. The focus then turns to racing and particularly the roles of each member of the team, communication, decision making and execution around the race course. Finally, she brings it all together with advice on how you can be the best crew and a great team. Packed with photographs this is the ultimate book for crews whether they are trying to win a championship or just wanting to sail at their local club. If your helm doesn't buy it for you, treat yourself!

Stress-Free Sailing

Single and Short-handed Techniques

Bloomsbury Publishing The vast majority of sailing yacht scenarios comprise a couple sailing the boat together, and needing to carry out all manoeuvres and activities themselves with no help from a back-up crew. Their boat handling, navigation, sail handling, anchoring and mooring skills all have to be carried out both efficiently and effectively, preferably with the minimum of physical effort (to conserve energy). But most sailing technique books assume a crew of 3 or 4, all willing to lend a hand. This book is therefore a first, addressing the most common sailing scenarios that anyone cruising will have to deal with, and providing clever, original, highly effective (and most importantly successfully tried and tested by the author) techniques and solutions for dealing with the huge variety of essential operations on a boat - from sail setting and reefing, to picking up mooring buoys in a variety of wind and tide situations, anchoring, berthing and leaving a pontoon shorthanded, picking up a man overboard, sailing in fog and heavy weather - and even going up the mast. This book will be a godsend to anyone sailing single or shorthanded - including couples with young children who need to be supervised by one parent whilst the other runs the boat. Organised into techniques for different cruising scenarios, the book features step by step sequential photos showing exactly how to approach each situation and carry out the task in hand.
