THE NEW TREK PROGRAMME GUIDE

THE NEXT GENERATION & EARLY DEEP SPACE NINE EPISODE BY EPISODE

[Gateway](#) STAR TREK is one of the world's most popular and enduring science fiction franchises, spanning decades' worth of TV, film, comics, books and more. This book - originally published just as DEEP SPACE NINE was first being produced - analyses the rebirth and renaissance of the series in the nineteen eighties and nineties. Along with masses of factual information - plot synopses, cast and crew and, uniquely, British transmission dates - this Programme Guide casts a gently critical eye over the series' continuity (and lack of it) and lingers over the moments of humour (intentional and otherwise). In sum, this is a light-hearted, detailed and affectionate overview of the revitalised version of the classic STAR TREK. Please note that it has not been updated since its original publication.

PENETRATING BARS THROUGH MASKS OF COSMIC DUST

THE HUBBLE TUNING FORK STRIKES A NEW NOTE

[Springer Science & Business Media](#) **THE EDITORS: DAVID L. BLOCK AND KENNETH C. FREEMAN (SOC CO-CHAIRS), IVANIO PUERARI, ROBERT GROESS AND LIZ K. BLOCK 1.** Harvard College Observatory, 1958 The past century has truly brought about an explosive period of growth and discovery for the physical sciences as a whole, and for astronomy in particular. Galaxy morphology has reached a renaissance . . . The year: 1958. The date: October 1. The venue: Harvard College Observatory. The lecturer: Walter Baade. With amazing foresight, Baade penned these words: "Young stars, supergiants and so on, make a terrific splash - lots of light. The total mass of these can be very small compared to the total mass of the system". Dr Layzer then asked the key question: ". . . the discussion raises the point of what this classification would look like if you were to ignore completely all the Population I, and just focus attention on the Population II . . ." We stand on the shoulders of giants. The great observer E. E. Barnard, in his pioneering efforts to photograph the Milky Way, devoted the major part of his life to identifying and numbering dusty "holes" and dust lanes in our Milky Way. No one could have dreamt that the pervasiveness of these cosmic dust masks (not only in our Galaxy but also in galaxies at high redshift) is so great, that their "penetration" is truly one of the pioneering challenges from both space-borne telescopes and from the ground.

HANDBOOK OF INDUSTRIAL INKJET PRINTING

A FULL SYSTEM APPROACH

[John Wiley & Sons](#) Unique in its integration of individual topics to achieve a full-system approach, this book addresses all the aspects essential for industrial inkjet printing. After an introduction listing the industrial printing techniques available, the text goes on to discuss individual topics, such as ink, printheads and substrates, followed by metrology techniques that are required for reliable systems. Three iteration cycles are then described, including the adaptation of the ink to the printhead, the optimization of the ink to the substrate and the integration of machine manufacturing, monitoring, and data handling, among others. Finally, the book summarizes a number of case studies and success stories from selected areas, including graphics, printed electronics, and 3D printing as well a list of ink suppliers, printhead manufacturers and integrators. Practical hints are included throughout for a direct hands-on experience. Invaluable for industrial users and academics, whether ink developers or mechanical engineers, and working in areas ranging from metrology to intellectual property.

SO LONG, AND THANKS FOR ALL THE FISH

[Del Rey](#) Now celebrating the 42nd anniversary of The Hitchhiker's Guide to the Galaxy, soon to be a Hulu original series! "A madcap adventure . . . Adams's writing teeters on the fringe of inspired lunacy."—United Press International Back on Earth with nothing more to show for his long, strange trip through time and space than a ratty towel and a plastic shopping bag, Arthur Dent is ready to believe that the past eight years were all just a figment of his stressed-out imagination. But a gift-wrapped fishbowl with a cryptic inscription, the mysterious disappearance of Earth's dolphins, and the discovery of his battered copy of The Hitchhiker's Guide to the Galaxy all conspire to give Arthur the sneaking suspicion

that something otherworldly is indeed going on. God only knows what it all means. Fortunately, He left behind a Final Message of explanation. But since it's light-years away from Earth, on a star surrounded by souvenir booths, finding out what it is will mean hitching a ride to the far reaches of space aboard a UFO with a giant robot. What else is new? "The most ridiculously exaggerated situation comedy known to created beings . . . Adams is irresistible."—The Boston Globe

THE SUN CREATION THEORY PRESENTS THE CREATION OF THE UNIVERSE

Strategic Book Publishing & Rights Agency "THE SUN CREATION THEORY presents the Creation of the Universe" will introduce a new and alternative scientific view for the genesis of the Universe, which is currently stated as the "Big Bang Theory" with its fiery explosion of a primordial atom. Instead, the Sun Creation Theory depicts that the beginning of the cosmos was achieved with the creation of the absolute First Sun of the Universe. This is considered the most important event of all time, from which all else will follow. Also presented is a totally new concept that Suns birth Suns, Suns birth Planets, and Planets birth Moons, all accomplished in a very natural sequence of events. The long debated "accretion theory" for these formations can now be set aside. At last a logical explanation can be given as to why all Planets are beholding to their Parent Sun, and why Moons are beholding to their Parent Planet. Finally, the author states that while studying the subject of LIGHT as it pertains to radiation from the trillions upon trillions of Suns in the Universe: "It is my belief that I may have inadvertently stumbled onto the cause of Dark Matter in the Universe." A totally new theory is being outlined which is the first of its kind. It will require much new thinking by the scientific community before a decision can be made as to its merits. This is the way of science.

THE UBIQUITOUS MECHANISM ACCELERATING COSMIC RAYS AT ALL THE ENERGIES

Società Editrice Esculapio The mechanism accelerating Cosmic rays in the milky way galaxy and galaxy clusters is identified and described. The acceleration of Cosmic rays is a purely electrostatic process which operate up to the maximum energies of 1023 ev in galaxy clusters. Galactic Cosmic rays are accelerated in a pervasive electrostatic field active in the whole galaxy except in restricted regions shielded by Interstellar and stellar plasma as, for instance, the region occupied by the Solar system. It is proved that the Energy spectrum of the Cosmic radiation in the milky way galaxy, in the region where the Solar system resides, has a constant Spectral index comprised between 2.64-2.68 and the maximum energies of galactic protons are 3.0×10^{19} ev. The agreement of these results with the experimental data is discussed in detail and highlighted. The various physical processes that maintain the stability of the electrostatic structure in the milky way galaxy are the same that generate the galactic magnetic field. Accordingly, the intensity, orientation and direction of the galactic magnetic field are evaluated. The results of the calculation are compared with the observation data, optical and mostly radio astronomi data. The accord of the intensity, orientation and direction of the observed magnetic field with calculation is excellent.
