**Predictions Fail--but Some Don't Penguin** UPDATED FOR 2020 WITH A NEW PREFACE BY NATE SILVER "One of the more momentous books of the decade." —The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the "prediction paradox": The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate Silver's insights are an essential read.

**Samsung Rising The Inside Story of the South Korean Giant That Set Out to Beat Apple and Conquer Tech Currency** An explosive exposé of Samsung that “reads like a dynastic thriller, rolling through three generations of family intrigue, embezzlement, bribery, corruption, prostitution, and other bad behavior” (The Wall Street Journal). **LONGLISTED FOR THE FINANCIAL TIMES AND MCKINSEY BUSINESS BOOK OF THE YEAR AWARD** Based on years of reporting on Samsung for The Economist, The Wall Street Journal, and Time, from his base in South Korea, and his countless sources inside and outside the company, Geoffrey Cain offers a penetrating look behind the curtains of the biggest company nobody in America knows. Seen for decades in tech circles as a fast follower rather than an innovation leader, Samsung today has grown to become a market leader in the United States and around the globe. They have captured one quarter of the smartphone market and have been pushing the envelope on every front. Forty years ago, Samsung was a rickety Korean agricultural conglomerate that produced sugar, paper, and fertilizer, located in a backward country with a third-world economy. With the rise of the PC revolution, though, Chairman Lee Byung-chul began a bold experiment: to make Samsung a major supplier of computer chips. The multimillion-dollar plan was incredibly risky. But Lee, wowed by a young Steve Jobs, who sat down with the chairman to offer his advice, became obsessed with creating a tech empire. And in *Samsung Rising*, we follow Samsung behind the scenes as the company fights its way to the top of tech. It is one of Apple’s chief suppliers of technology critical to the iPhone, and its own Galaxy phone outsells the iPhone. Today, Samsung employs over 300,000 people (compared to Apple’s 80,000 and Google’s 48,000). The company’s revenues have grown more than forty times from that of 1987 and make up more than 20 percent of South Korea’s exports. Yet their disastrous recall of the Galaxy Note 7, with numerous reports of phones spontaneously bursting into flames, reveals the dangers of the company’s headlong attempt to overtake Apple at any cost. A sweeping insider account, *Samsung Rising* shows how a determined and fearless Asian competitor has become a force to be reckoned with.

**World Intellectual Property Indicators 2020 WIPO** This authoritative report analyzes IP activity around the globe. Drawing on 2019 filing, registration and renewals statistics from national and regional IP offices and WIPO, it covers patents, utility models, trademarks, industrial designs, microorganisms, plant variety protection and geographical indications. Re-issued in recognition of the 25th anniversary of the mass suicides at Jonestown, this revised edition of David Chidester’s groundbreaking book features a new prologue that considers the meaning of the tragedy for a post-Waco, post-9/11 world. For Chidester, the murder-suicide of some 900 members of the Peoples Temple in Guyana recalls the American religious commitment to redemptive sacrifice, which for Jim Jones meant saving his followers from the evils of capitalist society. “Jonestown is ancient history,” writes Chidester, but it does provide us with an opportunity “to reflect upon the strangeness of familiar . . . promises of redemption through sacrifice.” His original conclusion that the Peoples Temple was a meaningful religious movement seems all the more prescient and astute today, when fundamentalism has raised the troubling spectre of violence and suicide all over the world. **The Man of My Dreams A Novel Random House** In her acclaimed debut novel, Prep, Curtis Sittenfeld created a touchstone with her pitch-perfect portrayal of adolescence. Her prose is as intensely realistic and compelling as ever in The Man of My Dreams, a disarmingly candid and sympathetic novel about the collision of a young woman’s fantasies of family and love with the challenges and realities of adult life. Hannah Gavener is fourteen in the summer of 1991. In the magazines she reads, celebrities plan elaborate weddings; in Hannah’s own life, her parents’ marriage is crumbling. And somewhere in between these two extremes—just maybe—lie the answers to love’s most bewildering questions. But over the next decade and a half, as she moves from Philadelphia to Boston to Albuquerque, Hannah finds that the questions become more rather than less complicated: At what point can you no longer blame your adult failures on your messed-up childhood? Is settling for someone who’s not your soul mate an act of maturity or an admission of defeat? And if you move to another state for a guy who might not love you back, are you being plucky—or just pathetic? None of the relationships in Hannah’s life are without complications. There’s her father, whose stubbornness Hannah realizes she’s unfortunately inherited; her gorgeous cousin, Fig, whose misbehavior alternately intrigues and irritates Hannah; Henry, whom Hannah first falls for in college, while he’s dating Fig; and the boyfriends who love her more or less than she deserves, who adore her or break her heart. By the time she’s in her late twenties, Hannah has finally figured out what she wants most—but she doesn’t yet know whether she’ll find the courage to go after it. Full of honesty and humor, The Man of My Dreams is an unnervingly insightful and beautifully written examination of the outside forces and personal choices that make us who we are. **Architectural Record The Penguin who Wanted to Fly Scholastic** Flip-Flop sat on his favourite thinking rock and looked up into the sky.
