### HISTORY OF THE ROLLBAR

---

Cambridge Scholars Publishing **This book describes the century-long emergence and battle to protect drivers and occupants of off-road and on-road vehicles from crush-related injuries from rollovers. Deaths and serious injuries have been associated with vehicle overturns that involve tractors, other motorized machinery, automobiles, and small vehicles. It took more than a century to attend to much of this epidemic of death and disabling injury that resulted from these overturns. This book argues that a key factor in this response was epidemiology that reported rollover-related deaths and engineering revisionism that moved responses from "blame the victim" to rollbars to prevent the deaths.**

### EXCAVATING THE FUTURE IN LOS ANGELES

---

Verso Books **This new edition of the visionary social history of Los Angeles is "as central to the L.A. canon as anything that . . . Joan Didion wrote in the seventies" (New Yorker) No metropolis has been more loved or more hated. To its official boosters, "Los Angeles brings it all together." To detractors, L.A. is a sunlit mortuary where "you can rot without feeling it." To Mike Davis, the author of this fiercely elegant and wide-ranging work of social history, Los Angeles is both utopia and dystopia, a place where the last Joshua trees are being plowed under to make room for model communities in the desert, where the rich have hired their own police to fend off street gangs, as well as armed Beirut militias. In City of Quartz, Davis reconstructs L.A.'s shadow history and dissects its ethereal economy. He tells us who has the power and how they hold on to it. He gives us a city of Dickensian extremes, Pynchonesque conspiracies, and a desperation straight out of Nathaniel West—a city in which we may glimpse our own future mirrored with terrifying clarity. In this new edition, Davis provides a dazzling update on the city's current status.**

### NURSING EDUCATION AND DIGITAL HEALTH STRATEGIES

---

HIMSS Book Series **Nursing and Informatics for the 21st Century Series is a critical resource in chronicling the huge historical shift in nursing linked to the explosion of EHR national and international strategies and health policies around the globe. Each book in the series examines the revolution that has occurred in nursing and explores the role IT continues to play in this transformation, with a thoughtful examination of nursing practice, science and research, and education. This book, Nursing Education and Digital Health Strategies explores the current state of health and healthcare education, as well as the current state of nursing informatics education. These topics include technologies-enabled education for all nurses and interprofessional collaborations from a worldwide perspective. The "New" learning for applied critical thinking will include technology, content, skills versus tools, and the use of "smart" systems for care delivery, the role of critical thinking and uniqueness of nursing care delivery. Further, how these changes are understood as a paradigm shift that needs to be incorporated along with nursing and healthcare education is emphasized. The effects of technology on human behavior are also explored, addressing human-factors interaction, interdependence of human computer interaction and other effects of technology on wellbeing. As part of nursing education, learning from clients/patients to better shape and advance nursing education and scholarship are discussed. Academic-clinical practice partnerships for a digital future, how teams are working together (clinician/teacher) for better healthcare delivery and applied knowledge, including joint appointments (exchange of academia and applied expertise), academic-applied human resources, and interprofessional learning/development are discussed. The book closes by discussing and using case studies to showcase nursing competencies for the next decade, and implications for preparing the healthcare workforce for a digital world, faculty readiness and the interaction with gaming and simulations. Nursing informatics education, including continuing education beyond academia, i.e., informal education, worldwide is described as well as global challenges to support digital world capabilities. Hands-on Experiential Delivery (shifting from lecture-based delivery) - case studies learning-based exemplars are included.**

## THE BLUEPRINT FOR BUILDING A REAL BUSINESS IN THE LAWN CARE AND LANDSCAPING INDUSTRY

---

**AuthorHouse** What is Cracking the Code to Profit? Cracking the Code to Profit is the complete, start to finish blueprint for building a REAL BUSINESS in the lawn care and landscaping industry. The author, Ryan Sciamanna, shares all his knowledge on how he went from a solo operator to six crews in three years. Who is the book for? Cracking the Code to Profit is for anyone thinking about starting a lawn care business to companies trying to break through the \$200k to \$300k gross revenue barrier. If you would like to, but are not already, making \$100k per year as the owner of your lawn care company, you will benefit from reading this book. Why Ryan wrote the book: In 2016 Ryan narrowed his lawn care companies service offering down to lawn mowing and lawn treatments only. Prior to that, his company was a full-service lawn and landscape service provider offering all of the typical services including mulching, pruning, cleanups, leaf removals, hardscapes, landscape design and installation, and snow removal. He made the change in his business model to increase profit margins and reduce the amount of time required of him as the owner of the business. Naturally, he needed to find referral partners for his lawn care customers because they still had other lawn and landscape needs his company no longer performed. He contacted several other lawn and landscape business owners in his area and told them he wanted to send them referrals for the work his company no longer performed and only asked they don't 'steal' his customers for the services they were still providing. After shooting off the first several referrals, Ryan quickly realized that a lot of these companies needed help and until they improved their business operations, referring his clients to them was only making him look bad! He has since stopped referring work with the exception of a couple companies that proved they would provide his customers quality work at fair prices and actually be reliable. Ryan says, "I think most lawn care business owners started their business just like I did...they enjoyed the work and were good at it, so they said, why not work for myself. In the beginning, it usually goes pretty smooth, but as they add more and more customers and eventually need to hire employees, they get in over their heads. I did the same thing, but quickly educated myself on how to run an actual business and not just be self-employed." He organized all of his knowledge into Cracking the Code to Profit in hopes it will save new business owners years of frustration. Ryan read a similar 'book' before he started his business that his father had bought for him online. It was actually just a word document that someone had written on starting a lawn care business and his dad printed it off for him. It cost his father \$79.95 for that! Ryan still has that 'book' and even though it was overpriced, terrible quality and a lot of the information was not good, he still credits that book towards helping him get his business off the ground. What you can expect from Cracking the Code to Profit - How to Start a Lawn Care Business: The book flows in chronological order from starting your business to your exit strategy. Ryan put every detail he could recall from his own experience. You can see the book chapters in the book preview. After each chapter, action steps are included so you know exactly what you need to do. At the end of the book, you will find the resource section for continued learning and execution. You can expect to have a much better understanding of how to start and grow your lawn care business is a healthy, profitable way. Ryan's contact info is also included in the book. He would love to hear from you after you finish it!
