## Your Walk Walks and Your Talk Talks

Christian Faith Publishing, Inc. Making decisions at any age is not always an easy feat. When you are walking with the Lord Jesus Christ, it makes sense to pray and do the next right thing. As life moves at ninety miles an hour, moving with the flow can set you up to make split-second decisions. Taking what we think is the easy way is often the hardest of all. We are told in 1 Peter 5:7 to cast all our cares on Him because He cares for us. Taking the Jesus way out is always the best way. It may not be the easy that we are looking for, but it will not leave the collateral damage that our way leaves behind. The roads that we walk down in life are covered with attractive billboards drawing us to off-ramps that will lead us to destruction. It is so important to keep our eyes fixed on Jesus Christ as we walk life's highways and byways so we are not lured into the craziness that the world has to offer. Taking life one moment at a time is actually a doable thing. Life moves in seconds, not days. Don't let one trial take you down. Romans 8:13 says that we are more than conquerors, and thankfully, God is a god of do-overs!

## Radio Frequency and Microwave Electronics Illustrated

Prentice Hall Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.
