### Radical Technologies

#### The Design of Everyday Life

**Verso Books** *A field manual to the technologies that are transforming our lives Everywhere we turn, a startling new device promises to transfigure our lives. But at what cost? In this urgent and revelatory excavation of our Information Age, leading technology thinker Adam Greenfield forces us to reconsider our relationship with the networked objects, services and spaces that define us. It is time to re-evaluate the Silicon Valley consensus determining the future. We already depend on the smartphone to navigate every aspect of our existence. We're told that innovations—from augmented-reality interfaces and virtual assistants to autonomous delivery drones and self-driving cars—will make life easier, more convenient and more productive. 3D printing promises unprecedented control over the form and distribution of matter, while the blockchain stands to revolutionize everything from the recording and exchange of value to the way we organize the mundane realities of the day to day. And, all the while, fiendishly complex algorithms are operating quietly in the background, reshaping the economy, transforming the fundamental terms of our politics and even redefining what it means to be human. Having successfully colonized everyday life, these radical technologies are now conditioning the choices available to us in the years to come. How do they work? What challenges do they present to us, as individuals and societies? Who benefits from their adoption? In answering these questions, Greenfield's timely guide clarifies the scale and nature of the crisis we now confront —and offers ways to reclaim our stake in the future.*

## Auto Repair For Dummies

**John Wiley & Sons** *Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.*

## The North Park Golf Association Rules of Golf

## Systemic Relief for the Common Hacker

Welcome to our world, the world of the ordinary golfer. This book is the first compilation of the Rules of Golf according to the North Park Golf Association. The Rules were found to be necessary for the mental health and sanity of the multitude of golfers all over the world who know, with just a little more time and practice, they could do better both as golfers and as human beings. The sad truth is this: The definition of insanity is playing golf over and over again and expecting a different result. Yet we play. And we pay good money to play. And we gleefully squander any financial windfall on a new set of Pings. And if the new clubs don't result in lower scores, we blame the course, the weather, the gods. Or at least that's what we tell our long-suffering spouses. So the first lesson in golf is to realize that the distance between you and the world's No. 1 golfer is tantamount to the distance between Earth and the Oort Cloud. That distance is not going to be crossed by a human in your lifetime. However, the world's No. 1 golfer is given advantages not available to you and me. This is one of the revelations available in this book, and the reason for the North Park Golf Association Rules of Golf. "We" are the people I've played with for decades, and you'll meet them all at their best and their not-so-best. They will help you understand that the purpose of this book is to make the game more fun and less taxing on the golfer's soul, so enjoy.
