Sound & Vision

America's Game

Anchor It's difficult to imagine today—when the Super Bowl has virtually become a national holiday and the National Football League is the country's dominant sports entity—but pro football was once a ramshackle afterthought on the margins of the American sports landscape. In the span of a single generation in postwar America, the game charted an extraordinary rise in popularity, becoming a smartly managed, keenly marketed sports entertainment colossus whose action is ideally suited to television and whose sensibilities perfectly fit the modern age. America's Game traces pro football's grand transformation, from the World War II years, when the NFL was fighting for its very existence, to the turbulent 1980s and 1990s, when labor disputes and off-field scandals shook the game to its core, and up to the sport's present-day preeminence. A thoroughly entertaining account of the entire universe of professional football, from locker room to boardroom, from playing field to press box, this is an essential book for any fan of America's favorite sport.

The Secret of Life

Cosmic Rays and Radiations of Living Beings

Ravenio Books More confiding than Faraday, Lakhovsky has told me the gist of his ideas on radiations and their effects on living beings. He thought, and rightly, that his ideas could not shock an experimenter who, for the past thirty-five years, had studied the effects of the full range of Hertzian waves on animals and microbes. In scientific research it is advisable to encourage what appears to be the most daring ideas. I have lived in the intimacy of two great men: Claude Bernard and Brown-Sequard, who revelled in new ideas. And it did not pay them too badly! The phenomena of resonance have long been familiar to physiologists. We all know the acoustic resonators of the organ of Corti, the optic resonators of the retina since the famous researches of Helmholtz. And still more familiar to us, the biological resonators of Charles Henry. Lopicque, Latzareff and myself have invoked on several occasions the phenomena of cellular resonance in order to explain the action of nervous influences or other physical agents in living beings. That space is full of forces which are unknown to us, and that living beings emit radiations or effluvia of which we are not aware, but whose significance has attracted the attention of certain observers, are facts that I have long since accepted. Anything is possible. But one must not accept anything except that which can be experimentally proved. The ideas of an insane person differ from the conceptions of a genius mainly because experiment invalidates the former and confirms the latter. Lakhovsky, encouraged by his own researches and the practical results he has obtained, is particularly anxious that his theories should rouse interest and stimulate experimental work among independent investigators. Lakhovsky's theories constitute what Claude Bernard called "working hypotheses." In the "Secret of Life" Lakhovsky confines himself to the study of electromagnetic waves, deeply penetrating waves and unknown waves. There are certainly many more processes of energy transmission besides those revealed to us by Newton and Fresnel. It is in the study of human beings that the chances of discovering such processes are most promising. Therefore, let us experiment by using the methods of physicists and chemists, and let us aim at discovering the special detector mentioned in the conclusion of this work.

Millionaire by Thirty

The Quickest Path to Early Financial Independence

Business Plus Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

United States Naval Aviation, 1919Ð1941

Aircraft, Airships and Ships Between the Wars

McFarland Within six months of the devastating attack on Pearl Harbor, the U.S. Navy had checked the Japanese military advance in the Pacific to the extent that the United States could return to its original "Defeat Germany First" strategy. That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1,000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation. This thorough study, with detailed drawings and photographs, explains and illustrates the trial and error process which went into developing the aircraft, airships and ships of the interwar period. The critical factors that shaped Naval Aviation after World War I—naval treaties, fleet tactics, government programs, leadership and organization, as well as the emergence of Marine Corps and Coast Guard aviation—are discussed in depth.

The Gospel & the Zodiac

The Secret Truth About Jesus

ABRAMS "Darlison elucidates the zodiac's significant place in the Gospels, most specifically in the Book of Mark . . . An intriguing leap into faith" (Kirkus Reviews). For millennia the world has been driven by the differences between the great patriarchal religions. Western civilization—or Christendom, as it was once called—received its values and its confidence from a belief in God, the Father, and Jesus, his only son. But what if this conviction were founded on an error? Who is the man in the factually inconsistent Gospel stories? And who is the man who makes a brief appearance carrying a jar of water? This extraordinary study by a Unitarian minister suggests that Jesus never existed historically; he was simply a representation of an astrological theology—a representation, simply put, of the zodiac sign of Aquarius. In *The Gospel & the Zodiac*, Rev. Bill Darlison demonstrates that all the other signs are present too, in perfect zodiacal order. The Gospel story is not the product of historians or eyewitnesses, but an older, mystical text produced by an ancient, esoteric school as a guide to the Age of Pisces. Every bit as revelatory and controversial as it sounds, *The Gospel & the Zodiac* will shake up the religious status quo, and in doing so, provide both a new look at a religious icon and a deeper understanding of the faith that binds millions together. "Darlison begins by looking at different scholarly approaches to the gospels, then outlines his astrological interpretation logically and lucidly, matching the zodiacal signs to the narrative of

Mark.” —Fortean Times

Janey the Vet

Saving Sri Lanka's Street Dogs

Michael O'Mara Books 'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle
In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when

she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.
