Rural Education In Urbanized Nations

Issues And Innovations

Routledge *A reversal in rural-to-urban migration patterns is creating increasing interest in the quality of education in rural areas and in techniques for meeting educational needs in sparsely populated regions. Wholesale urbanization of rural schools generally is rejected as a potential solution: it is logistically inefficient; centralization and standardization are met with growing resistance; and conventional solutions to educational problems produce uneven results when applied to rural areas. This book addresses the broad spectrum of rural education issues within OECD member countries. The authors identify innovative programs, policies, and strategies and point toward the more promising paths for rural school improvement. They also issue warnings about some of the blind alleys and dead ends that can be encountered. The major topics covered include delivery systems, in-school innovations, support mechanisms, and community-school linkages.*

Reinforcement Learning, second edition

An Introduction

MIT Press *The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more*

mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

The Political Economy of Smog in Southern California

Routledge *This study, first published in 1990, explores the ways in which institutions can succeed or fail at environmental improvement. The author first takes a look at the nature of environmental politics and the history of air pollution control in Southern California. He then develops a political economic model that asks the question: what effect have the dramatic changes that have occurred throughout the history of air pollution control in Southern California had on air quality? Jeffrey Fawcett uses the information gathered to both evaluate the relationship between air quality and institutional change; and to evaluate how political economists explain how state environmental institutions work. This title will be of interest to students of environmental economics and policy.*

The Kingdom and the Power

Behind the Scenes at The New York Times: The Institution That Influences the World

Random House *“Beautifully documented . . . no less than a landmark in the field of writing and journalism.”—The Nation “Fascinating . . . Seldom has anyone been so successful in making a newspaper come alive as a human institution.”—The New York Times In this century and the last, most of history's important news stories have been broken to a waiting nation by The New York Times. In The Kingdom and the Power, former Times correspondent and bestselling author Gay Talese lays bare the secret internal intrigues at the daily, revealing the stories behind the personalities, rivalries, and scopes at the most influential paper in the world. In gripping detail, Talese examines the private and public lives of the famed Ochs family, along with their direct descendants, the Sulzbergers, and their hobnobbing with presidents, kings, ambassadors, and cabinet members; the vicious struggles for power and control at the paper; and the amazing story of how a bankrupt newspaper turned itself around and grew to Olympian heights. Regarded as a classic piece of journalism, The Kingdom and the Power is as gripping as a work of fiction and as relevant as today's headlines. Praise for The Kingdom and the Power “I know of no book about a great institution which is so detailed, so intensely personalized, or so dramatized as this volume about The New York Times.”—The Christian Science Monitor “A serious and important account of one of the few genuinely powerful institutions in our society.”—The New Leader “A superb study of people and power.”—Women's Wear Daily*
