FIRE SMART HOME HANDBOOK

PREPARING FOR AND SURVIVING THE THREAT OF WILDFIRE

Rowman & Littlefield As climate change continues to wreak havoc on the environment, devastating wildfires, both natural and manmade, are increasing. The figure for average acres burned has increased from almost 2 million acres in 1992 to nearly 7 million in 2012, which set a new record with an average of 165 acres burned per fire. Things are heating up, but global warming isn't the only problem. Budgets for fire suppression have been slashed severely. The number of air tankers has decreased from 44 in 2002 to just 9 in 2012, which means fast attacks on fledgling fires will grow more difficult in the future. If you live in a wildland-urban interface, the zone between unoccupied and developed land, sooner or later fire will happen. Fortunately you can prepare for the worst, and it doesn't have to cost a fortune. This highly detailed and practical reference guide will help you live more safely in the red zone and save you time and money along the way, providing multiple methods of risk mitigation along with the financial level of each action. Effectively prepping your land can even enhance the scenery and increase the value of your home. Learn how wildfires begin and behave, how to evaluate your property, what essential tools you'll need and what they will cost, how to prepare your land and home--including tips on how to avoid insurance nightmares--when to stay and fight, when it's time to evacuate, how to clean up after a fire event, and more. Even if you live in the middle of a suburb, the information on how fires start and spread and how to deal with insurance claims will prove enlightening and helpful. No one can guarantee that your house or land will survive if a major conflagration erupts, but you can greatly improve your odds with this book and a little preparation.

INSTANT MILLIONAIRES

THE SECRETS OF OVERNIGHT SUCCESS

Harriman House Limited In this book you will meet three dozen impatient people. They weren't satisfied with the slow, plodding, money-saving route to financial security, the safe route that most of us feel stuck with. They wanted instant wealth - and they got it. As Max Gunther points out, our folklore frowns on the idea of quick money. Our cultural heroes have generally been plodders, as in the fable about the race between a tortoise and a hare. "In the fable, the hare loses. The stories in this book are not fables. They are true. In these stories, the hares win." They are a richly varied lot, these happy hares. Gunther opens with a few dazzling millionaire legends, such as the man who invented Monopoly. You'll then meet such fascinating characters as: - Sam Wyly, who made it in the computer industry -

Harvey Shuster, who beat the stock market - Dan Renn, who grew rapidly rich by applying salesmanship to another man's idea - Howard Brown, who deliberately decided to be rich and became a multi-millionaire within three years. - A group of men who made fast fortunes on fads such as the Hula Hoop and the Frisbee. - Jean Nidetch, who organised the fabulously successful Weight Watchers These stores illustrate that the dream of quick money isn't such a ridiculous dream after all. Maybe you've been harboring this kind of dream yourself. You've squelched the dream because you've been brainwashed by too many stories about tortoises beating hares. Everybody tells you your dream is laughable, impractical. All right, get ready for a revelation. Read this delightful collection of tales about hares who won. When you've read them, maybe you'll decide to run with them.

WARAWIRI

LIFE CONSISTS OF ENDLESS BACK AND FORTH JOURNEYS IN TIME

Xlibris Corporation It is meant literally! Join the group of five who get lost in a Warawiri, back-and-forth time travel journey into the Middle Age kingdom of Demak Jepara, in the island of Java in the sixteenth-century CE, and explore the amazing experiences of five hundred years ago in a mystical tropical kingdom. An East Timorese businessman, a Japanese stockbroker, a German music anthropologist, and a young Javanese executive lady are in the possession of heirlooms of the Middle Age Javanese kingdom, and they are transported by the mystical powers five centuries back because the heirlooms need to be spiritually cleansed. The president of the United States was also among the victims of the time travel into the past. And if you do not possess any ancient heirlooms, then just join the ninety-thousand spectator crowds on the soccer championship in the Jakarta Senayan gigantic stadium, who are also transported like a giant flying saucer five centuries into the past. The only way to rescue the victims back into the present is by holding a mystical ceremony from eight skyscrapers rooftops surrounding the stadium by eight spiritual masters forming the Mandala star configurations, playing the sacred Javanese gending symphony, the Harmony of Spirit in the Sky, led by their leader from the location of the lost stadium, using a slate board as his iPad. The events are all covered by Matra TV, a private TV broadcast company. A colorful laser light show in the sky from the skyscrapers rooftops, a rumor of an affair involving the president of the United States and the Javanese executive, and an exotic, mystical witchcraft ceremony and village life in remote jungle of Borneo add to your colorful journey into the past.
