Society Without God

What the Least Religious Nations Can Tell Us about Contentment

NYU Press Are lawyers, by their very nature, agents of the state, of capital, of institutions of power? Or are there ways in which they can work constructively or transformatively for the disempowered, the working class, the underprivileged? *Lawyers in a Postmodern World* explores how lawyers actively create the forms of power which they and others deploy. Through engaging case studies, the book examines how lawyers work within and for powerful institutions and provides suggestions--both general and practical--for ways in which the practice of law can be made to work with and for the powerless. Individual chapters address such subjects as the contradictions of radical law practice; legal work in South Africa; the economics and politics of negotiating justice; feminist legal scholarship and women's gendered lives; the overlapping worlds of law, business, and politics; theories of legal practice; and how lawyers are constitutive of gender relations. Contributing to the book are Maureen Cain (University of West Indies), Yves Dezalay (Centre National de la Recherche Scientifique, France), Martha Fineman (Columbia University), Sue Lees (University of North London), Doreen McBarnet (Wolfson College, Oxford), Frank Munger (SUNY, Buffalo), Wilfried Scharf (University of Cape Town), Stuart Scheingold (University of Washington), David Sugarman (Lancaster University), and Sally Wheeler (University of Nottingham).

Society without God, Second Edition

What the Least Religious Nations Can Tell Us about Contentment

NYU Press An updated edition showcasing the social health of the least religious nations in the world Religious conservatives around the world often claim that a society without a strong foundation of faith would necessarily be an immoral one, bereft of ethics, values, and meaning. Indeed, the Christian Right in the United States has argued that a

society without God would be hell on earth. In *Society without God, Second Edition* sociologist Phil Zuckerman challenges these claims. Drawing on fieldwork and interviews with more than 150 citizens of Denmark and Sweden, among the least religious countries in the world, he shows that, far from being inhumane, crime-infested, and dysfunctional, highly secular societies are healthier, safer, greener, less violent, and more democratic and egalitarian than highly religious ones. *Society without God* provides a rich portrait of life in a secular society, exploring how a culture without faith copes with death, grapples with the meaning of life, and remains content through everyday ups and downs. This updated edition incorporates new data from recent studies, updated statistics, and a revised Introduction, as well as framing around the now more highly developed field of secular studies. It addresses the dramatic surge of irreligion in the United States and the rise of the “nones,” and adds data on societal health in specific US states, along with fascinating context regarding which are the most religious and which the most secular.

Society Without God

What the Least Religious Nations Can Tell Us about Government

Religion without God

Harvard University Press In his last book, Ronald Dworkin addresses timeless questions: What is religion and what is God's place in it? What are death and immortality? He joins a sense of cosmic mystery and beauty to the claim that value is objective, independent of mind, and immanent in the world. Belief in God is one manifestation of this view, but not the only one.

Living Without God

New Directions for Atheists, Agnostics, Secularists, and the Undecided

ReadHowYouWant.com Ronald Aronson demonstrates that atheism represents much more than what one does not believe: that it is the precondition for a generous humanism. The two closing chapters are models of stoicism at its best." - Christopher Hitchens, author of God Is Not Great.

Living the Secular Life

New Answers to Old Questions

Penguin Books **Over the last 25 years, 'no religion' has become the fastest-growing religion in the Western World. Revealing the inspiring beliefs that empower secular culture - alongside real stories of nonreligious men and women based on extensive in-depth interviews from across the U.S. - Living the Secular Life will be indispensable for millions of secular people. A manifesto for a booming social movement and a revelatory survey of an overlooked community, this book offers essential and long-awaited information for anyone building a life based on his or her own principles**

Good Without God

What a Billion Nonreligious People Do Believe

Harper Collins **An inspiring and provocative exploration of an alternative to traditional religion Questions about the role of God and religion in today's world have never been more relevant or felt more powerfully. Many of us are searching for a place where we can find not only facts and scientific reason but also hope and moral courage. For some, answers are found in the divine. For others, including the New Atheists, religion is an "enemy." But in Good Without God, Greg Epstein presents another, more balanced and inclusive response: Humanism. He highlights humanity's potential for goodness and the ways in which Humanists lead lives of purpose and compassion. Humanism can offer the sense of community we want and often need in good times and bad—and it teaches us that we can lead good and moral lives without the supernatural, without higher powers . . . without God.**

What It Means to Be Moral

Why Religion Is Not Necessary for Living an Ethical Life

Catapult “A thoughtful perspective on humans' capacity for moral behavior.” —Kirkus Reviews “A comprehensive introduction to religious skepticism.” —Publishers Weekly In **What It Means to Be Moral: Why Religion Is Not Necessary for Living an Ethical Life**, Phil Zuckerman argues that morality does not come from God. Rather, it comes from us: our brains, our evolutionary past, our ongoing cultural development, our social experiences, and our ability to reason, reflect, and be sensitive to the suffering of others. By deconstructing religious arguments for God-based morality and guiding readers through the premises and promises of secular morality, Zuckerman argues that the major challenges facing the world today—from global warming and growing inequality to religious support for unethical political policies to gun violence and terrorism—are best approached from a nonreligious ethical framework. In short, we need to look to our fellow humans and within ourselves for moral progress and ethical action. “In this brilliant, provocative, and timely book, Phil Zuckerman breaks down the myth that our morality comes from religion—compellingly making the case that when it comes to the biggest challenges we face today, a secular approach is the only truly moral one.” —Ali A. Rizvi, author of *The Atheist Muslim*

This Life

Secular Faith and Spiritual Freedom

Anchor Hågglund argues that a faith not in God or eternal life, but in the finite, temporal life we lead here on earth is one that gives that life far greater depth of meaning. In contrast to the traditional religious faith in eternity, he proposes a secular faith in the value of living in time. His book provides not only a critique of religious ideals, but also a positive, alternative understanding of the beliefs and values that can motivate us to live lives of meaning in the here and now. -- adapted from jacket

Sense and Goodness Without God

A Defense of Metaphysical Naturalism

AuthorHouse **If God does not exist, then what does? Is there good and evil, and should we care? How do we know what's true anyway? And can we make any sense of this universe, or our own lives? Sense and Goodness answers all these questions in lavish detail, without complex jargon. A complete worldview is presented and defended, covering every subject from knowledge to art, from metaphysics to morality, from theology to politics. Topics include free will, the nature of the universe, the meaning of life, and much more, arguing from scientific evidence that there is only a physical, natural world without gods or spirits, but that we can still live a life of love, meaning, and joy.**

Faith No More

Why People Reject Religion

Oxford University Press **During his 2009 inaugural speech, President Obama described the United States as a nation of "Christians and Muslims, Jews and Hindus--and nonbelievers." It was the first time an American president had acknowledged the existence of this rapidly growing segment of the population in such a public forum. And yet the reasons why more and more people are turning away from religion are still poorly understood. In Faith No More, Phil Zuckerman draws on in-depth interviews with people who have left religion to find out what's really behind the process of losing one's faith. According to a 2008 study, so many Americans claim no religion (15%, up from 8% in 1990) that this category now outranks every other religious group except Catholics and Baptists. Exploring the deeper stories within such survey data, Zuckerman shows that leaving one's faith is a highly personal, complex, and drawn-out process. And he finds that, rather than the cliché of the angry, nihilistic atheist, apostates are life-affirming, courageous, highly intelligent and inquisitive, and deeply moral. Zuckerman predicts that this trend toward nonbelief will likely continue and argues that the sooner we recognize that religion is frequently and freely rejected by all sorts of men and women, the sooner our understanding of the human condition will improve. The first book of its kind, Faith**

No More will appeal to anyone interested in the "New Atheism" and indeed to anyone wishing to more fully understand our changing relationship to religious faith.

Morality Without God?

OUP USA A common refrain against atheism and secular humanism is that without belief in God, "everything is permitted." Walter Sinnott-Armstrong dismantles this argument and argues instead that God is not only not essential to morality, but that our moral behavior should be seen as utterly independent of religion. This short, accessible book is on a major aspect of the arguments against atheism and will interest those intrigued by the "new atheism" (Harris, Dawkins, etc).

Life Without God

A Guide to Fulfillment Without Religion

Publishamerica Incorporated Do you sense that you have a mission in life but are unable to accept the existence of a supreme being? Are you irritated by people who perpetually want to...save you? Are you looking for a philosophy of life that leads to a happy and contented life without faith? In the first part of his book, Dr. Tzannes shows the absurdity of religious dogmas and practices--information you need to face down all those religious zealots and annoying proselytizers. In the second part, he answers questions such as "why are we here?" "what is good or evil?" "how do we find happiness?" etc., proving that happiness and fulfillment in life are easily within reach, with no need for God or organized religions. All ideas are presented through a series of heated, humorous dialogues that need no Ph.D. in philosophy to be enjoyed--just common sense and a freethinking mind.

The Good Atheist

Living a Purpose-Filled Life Without God

Ulysses Press Offers a positive guide to leading a happy, fulfilling and morally focused life through the principles of free thought, rather than following any religious tenets, in a easy-to-follow plan that stresses altruistic living. Original.

Can Man Live Without God

Thomas Nelson In this brilliant and compelling defense of the Christian faith, Ravi Zacharias shows how affirming the reality of God's existence matters urgently in our everyday lives. According to Zacharias, how you answer the questions of God's existence will impact your relationship with others, your commitment to integrity, your attitude toward morality, and your perception of truth.

Religion Without God

Routledge This criticism of theism, especially monotheism, questions the assumption that rejecting God means rejecting religion. Drawing on Western philosophical critiques of religion and non-theistic Eastern religions, Ray Billington shows how a religion without God could work. The concept of religion without God has informed not only the theories of Nietzsche, Kant and Spinoza, but also expressions of belief in Indian and Chinese religions-Hinduism, Theravada Buddhism Zen and Taoism. Concluding with a look at the "the future of faith," this is a wide ranging and lucidly-written look at what it means to "have faith" and how this is distinct from religious belief. Ray Billington is an experienced and respected author on Eastern religion and philosophy. His books include Understanding Eastern Philosophy, Living Philosophy and East of Existentialism, all published by Routledge. He also writes occasional journalism most notably as a contributor to The Guardian's 'Face to Faith' column. An ex-Methodist minister and onetime chaplain with the SAS, he has now retired from his post as Principal Lecturer in Philosophy at the University of the West of England.

Religion for Atheists

A Non-Believer's Guide to the Uses of Religion

Signal From the author of *The Architecture of Happiness*, a deeply moving meditation on how we can still benefit, without believing, from the wisdom, the beauty, and the consolatory power that religion has to offer. Alain de Botton was brought up in a committedly atheistic household, and though he was powerfully swayed by his parents' views, he underwent, in his mid-twenties, a crisis of faithlessness. His feelings of doubt about atheism had their origins in listening to Bach's cantatas, were further developed in the presence of certain Bellini Madonnas, and became overwhelming with an introduction to Zen architecture. However, it was not until his father's death -- buried under a Hebrew headstone in a Jewish cemetery because he had intriguingly omitted to make more secular arrangements -- that Alain began to face the full degree of his ambivalence regarding the views of religion that he had dutifully accepted. Why are we presented with the curious choice between either committing to peculiar concepts about immaterial deities or letting go entirely of a host of consoling, subtle and effective rituals and practices for which there is no equivalent in secular society? Why do we bristle at the mention of the word "morality"? Flee from the idea that art should be uplifting, or have an ethical purpose? Why don't we build temples? What mechanisms do we have for expressing gratitude? The challenge that de Botton addresses in his book: how to separate ideas and practices from the religious institutions that have laid claim to them. In *Religion for Atheists* is an argument to free our soul-related needs from the particular influence of religions, even if it is, paradoxically, the study of religion that will allow us to rediscover and rearticulate those needs.

Anarchy Evolution

Faith, Science, and Bad Religion in a World Without God

Harper Collins “Take one man who rejects authority and religion, and leads a punk band. Take another man who wonders whether vertebrates arose in rivers or in the ocean....Put them together, what do you get? Greg Graffin, and this uniquely fascinating book.” —Jared Diamond, author of *Guns, Germs, and Steel* Anarchy Evolution is a provocative look at the collision between religion and science, by an author with unique authority: UCLA lecturer in Paleontology, and founding member of Bad Religion, Greg Graffin. Alongside science writer Steve Olson (whose *Mapping Human History* was a National Book Award finalist) Graffin delivers a powerful discussion sure to strike a chord with readers of Richard Dawkins’ *The God Delusion* or Christopher Hitchens *God Is Not Great*. Bad Religion die-hards, newer fans won over during the band’s 30th Anniversary Tour, and anyone interested in this increasingly important debate should check out this treatise on science from the god of punk rock.

Religion's Sudden Decline

What's Causing It, and What Comes Next?

Oxford University Press, USA 'Religion's Sudden Decline' provides evidence of a major decline in religion in most of the world, based on surveys of over 100 countries containing 90 percent of the world's population, carried out from 1981 to 2020 - the largest base of empirical evidence ever assembled to analyse mass acceptance or rejection of religion.--

God Is Not Great

How Religion Poisons Everything

McClelland & Stewart Christopher Hitchens, described in the *London Observer* as “one of the most prolific, as well as brilliant, journalists of our time” takes on his biggest subject yet—the increasingly dangerous role of religion in the world. In the tradition of Bertrand Russell’s *Why I Am Not a Christian* and Sam Harris’s recent bestseller, *The End Of*

Faith, Christopher Hitchens makes the ultimate case against religion. With a close and erudite reading of the major religious texts, he documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos. With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope's awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix.

What If I'm an Atheist?

A Teen's Guide to Exploring a Life Without Religion

Simon and Schuster **A guide to atheism and nonbelief shares counsel on the challenges of questioning the views of one's upbringing, establishing beliefs about religion and spirituality, and addressing the practical aspects of managing religious occasions.**

Faith No More

Why People Reject Religion

OUP USA **Faith No More seeks to understand how and why people lose their faith, sever their ties with religious organizations, and experience a secularizing transformation in their own personal lives. Based on in-depth interviews with 75 individuals from a variety of backgrounds and religious traditions, this book offers a rich and colorful exploration of the human journey from religiosity to secularity.**

Religious Commitment and Secular Reason

Cambridge University Press **Many religious people are alarmed about features of the current age--violence in the media, a pervasive hedonism, a marginalization of religion, and widespread abortion. These concerns influence politics, but just as there should be a separation between church and state, so should there be a balance between religious**

commitments and secular arguments calling for social reforms. Robert Audi offers a principle of secular rationale, which does not exclude religious grounds for action but which rules out restricting freedom except on grounds that any rational citizen would accept. This book describes the essential commitments of free democracy, explains how religious and secular moral considerations can be integrated to facilitate cooperation in a world of religious pluralism, and proposes ideals of civic virtue that express the mutual respect on which democracy depends.

Reasonable Atheism

A Moral Case for Respectful Disbelief

The authors make not only a compelling moral case for atheism but also for the value and necessity of mutual respect in a democratic society composed of diverse citizens.

Battling the Gods

Atheism in the Ancient World

Vintage How new is atheism? Although adherents and opponents alike today present it as an invention of the European Enlightenment, when the forces of science and secularism broadly challenged those of faith, disbelief in the gods, in fact, originated in a far more remote past. In *Battling the Gods*, Tim Whitmarsh journeys into the ancient Mediterranean, a world almost unimaginably different from our own, to recover the stories and voices of those who first refused the divinities. Homer's epic poems of human striving, journeying, and passion were ancient Greece's only "sacred texts," but no ancient Greek thought twice about questioning or mocking his stories of the gods. Priests were functionaries rather than sources of moral or cosmological wisdom. The absence of centralized religious authority made for an extraordinary variety of perspectives on sacred matters, from the devotional to the atheos, or "godless." Whitmarsh explores this kaleidoscopic range of ideas about the gods, focusing on the colorful individuals who challenged their existence. Among these were some of the greatest ancient poets and philosophers and writers, as well as the less well known: Diagoras of Melos, perhaps the first self-professed atheist; Democritus, the first

materialist; Socrates, executed for rejecting the gods of the Athenian state; Epicurus and his followers, who thought gods could not intervene in human affairs; the brilliantly mischievous satirist Lucian of Samosata. Before the revolutions of late antiquity, which saw the scriptural religions of Christianity and Islam enforced by imperial might, there were few constraints on belief. Everything changed, however, in the millennium between the appearance of the Homeric poems and Christianity's establishment as Rome's state religion in the fourth century AD. As successive Greco-Roman empires grew in size and complexity, and power was increasingly concentrated in central capitals, states sought to impose collective religious adherence, first to cults devoted to individual rulers, and ultimately to monotheism. In this new world, there was no room for outright disbelief: the label "atheist" was used now to demonize anyone who merely disagreed with the orthodoxy—and so it would remain for centuries. As the twenty-first century shapes up into a time of mass information, but also, paradoxically, of collective amnesia concerning the tangled histories of religions, Whitmarsh provides a bracing antidote to our assumptions about the roots of freethinking. By shining a light on atheism's first thousand years, *Battling the Gods* offers a timely reminder that nonbelief has a wealth of tradition of its own, and, indeed, its own heroes.

Without God

Science, Belief, Morality, and the Meaning of Life

Independently Published **Without God**, how can we have hope or make sense of such a broken world? Skeptics believe we don't need God to understand reality, and that science and reason hold the keys to building a better world. Faith is blind, and there is no credible evidence for God's existence--especially the God of the Bible. Science and religious belief are incompatible, and God is no longer relevant to our modern world. By engaging with popular atheists and skeptics, both new and old, as well as many of Christianity's most brilliant writers, pastor and author Zachary Broom writes of how God is just as relevant to understanding the world as He's ever been. Not only is there powerful evidence for God's existence, but without Him, we cannot make sense of human experience. If there is no God, most of what we intuitively believe about reality cannot be trusted, as God is the source of all meaning, rationality, truth, beauty, and goodness. Instead of setting out to "prove" God's existence, Broom carefully and seriously engages skeptic's doubts, relying on philosophy, science, literature, reasoning, and real-life conversations, challenging readers to believe the

better worldview--the worldview that best explains reality as we know it.

The New Atheism

10 Arguments That Don't Hold Water

Lion Books Recently, the "new" atheists have been putting out books, articles, bus ads, and TV programs in attempts to sway people to their cause. Through these tactics they've managed to gain a large amount of public attention and media exposure but do their arguments really hold water? Using the analogy put forward by esteemed philosopher Anthony Flew, Michael Poole examines the new atheists' use of the "10 leaky buckets" tactic of argumentation presenting readers with a sum of arguments that are each individually defective, as though the cumulative effect should be persuasive. This closer look at the facts reveals that the buckets are, indeed, leaky.

Christianity Without God

Bridget Williams Books Does the failure of the conventional idea of God spell the end of the Christian tradition? Or does it simply mean the end of conventional Christian doctrine? Christianity without God affirms the latter, treating Christian culture as a living and evolving stream. In this cogently argued book, Lloyd Geering brings the resources of his deep scholarship to look at what the world really needs from contemporary religion. His inspiration is the cultivation of the wisdom of Christianity, not a dependence on beliefs about a supernatural saviour.

The Nonreligious

Understanding Secular People and Societies

Oxford University Press 'The Nonreligious' provides a comprehensive and empirically-grounded account of what we know about the growing numbers of people who are non-religious.

The Rage Against God

[A&C Black](#) In a fascinating account, Peter Hitchens describes his autobiographical and spiritual journey from atheism to faith in God through the power of reasoning.

God Is Not One

[ReadHowYouWant.com](#) fascinating guide to religion and its place in the world today. In *God Is Not One*, bestselling author Stephen Prothero makes a fresh and provocative argument that, contrary to popular understanding, all religions are not simply "different paths to the same God." Instead, he shows that the differences between the major religions are far greater than we think: they each ask different questions, tackle different problems, and aim at different goals. *God Is Not One* highlights the unique aspects of the world's major religions, with chapters on Islam, Christianity, Confucianism, Hinduism, Buddhism, Yoruba religion, Judaism, Daoism and atheism. Lucid and compelling, *God Is Not One* offers a new understanding of religion for the twenty-first century.

Without God

Michel Houellebecq and Materialist Horror

[Penn State Press](#) Michel Houellebecq is France's most famous and controversial living novelist. Since his first novel in 1994, Houellebecq's work has been called pornographic, racist, sexist, Islamophobic, and vulgar. His caricature appeared on the cover of the French satirical weekly *Charlie Hebdo* on January 7, 2015, the day that Islamist militants killed twelve people in an attack on their offices and also the day that his most recent novel, *Soumission*—the story of France in 2022 under a Muslim president—appeared in bookstores. *Without God* uses religion as a lens to examine how Houellebecq gives voice to the underside of the progressive ethos that has animated French and Western social, political, and religious thought since the 1960s. Focusing on Houellebecq's complicated relationship with religion, Louis Betty shows that the novelist, who is at best agnostic, "is a deeply and unavoidably religious writer." In exploring the religious, theological, and philosophical aspects of Houellebecq's work, Betty situates the author within

the broader context of a French and Anglo-American history of ideas—ideas such as utopian socialism, the sociology of secularization, and quantum physics. Materialism, Betty contends, is the true destroyer of human intimacy and spirituality in Houellebecq's work; the prevailing worldview it conveys is one of nihilism and hedonism in a postmodern, post-Christian Europe. In Betty's analysis, "materialist horror" emerges as a philosophical and aesthetic concept that describes and amplifies contemporary moral and social decadence in Houellebecq's fiction.

The God Delusion. 10th Anniversary Edition

Random House **The God Delusion** caused a sensation when it was published in 2006. Within weeks it became the most hotly debated topic, with Dawkins himself branded as either saint or sinner for presenting his hard-hitting, impassioned rebuttal of religion of all types. His argument could hardly be more topical. While Europe is becoming increasingly secularized, the rise of religious fundamentalism, whether in the Middle East or Middle America, is dramatically and dangerously dividing opinion around the world. In America, and elsewhere, a vigorous dispute between 'intelligent design' and Darwinism is seriously undermining and restricting the teaching of science. In many countries religious dogma from medieval times still serves to abuse basic human rights such as women's and gay rights. And all from a belief in a God whose existence lacks evidence of any kind. Dawkins attacks God in all his forms. He eviscerates the major arguments for religion and demonstrates the supreme improbability of a supreme being. He shows how religion fuels war, foments bigotry and abuses children. **The God Delusion** is a brilliantly argued, fascinating polemic that will be required reading for anyone interested in this most emotional and important subject.

Reasonable Faith

Christian Truth and Apologetics

Crossway **This updated edition by one of the world's leading apologists presents a systematic, positive case for Christianity that reflects the latest work in the contemporary hard sciences and humanities. Brilliant and accessible.**

Faith and Reason

Clarendon Press Richard Swinburne presents a new edition of the final volume of his acclaimed trilogy on philosophical theology. **Faith and Reason** is a self-standing examination of the implications for religious faith of Swinburne's famous arguments about the coherence of theism and the existence of God. By practising a particular religion, a person seeks to achieve some or all of three goals - that he worships and obeys God, gains salvation for himself, and helps others to attain their salvation. But not all religions commend worship, and different religions have different conceptions of salvation. Faced with these differences, Richard Swinburne argues that we should practice that religion which has the best goals and is more probably true than the creeds of other religions. He proposes criteria by which to determine the probabilities of different religious creeds, and he argues that, while requiring total commitment, faith does not demand fully convinced belief. While maintaining the same structure and conclusions as the original classic, this second edition has been substantially rewritten, both in order to relate its ideas more closely to those of classical theologians and philosophers and to respond to more recent views. In particular he discusses, and ultimately rejects, the view of Alvin Plantinga that the 'warrant' of a belief depends on the process which produced it, and John Hick's contention that all religions offer valid paths to salvation.

Relax, It's Just God

How and Why to Talk to Kids About Religion When You're Not Religious

SCB Distributors Gold-medal winner of a Next Generation Book Award, silver-medal winner of the Independent Publishers Book Award. As featured on the PBS NewsHour "A gem of a book." — LIBRARY JOURNAL (STARRED REVIEW) A step-by-step guide to raising confident, open-minded kids in an age of religious intolerance. Relax, It's Just God offers parents fresh, practical and honest ways to address issues of God and faith with children while promoting curiosity and kindness, and successfully fending off indoctrination. A rapidly growing demographic cohort in America, secular

parents are at the forefront of a major and unprecedented cultural shift. Unable to fall back on what they were taught as children, many of these parents are struggling, or simply failing, to address issues of God, religion and faith with their children in ways that promote honesty, curiosity, kindness and independence. The author sifts through hard data, including the results of a survey of 1,000 nonreligious parents, and delivers gentle but straightforward advice to both non-believers and open-minded believers. With a thoughtful voice infused with humor, Russell seamlessly merges scientific thought, scholarly research and everyday experience with respect for a full range of ways to view the world. "Relax, It's Just God" goes beyond the numbers to assist parents (and grandparents) who may be struggling to find the right time place, tone and language with which to talk about God, spirituality and organized religion. It encourages parents to promote religious literacy and understanding and to support kids as they explore religion on their own -- ensuring that each child makes up his or her own mind about what to believe (or not believe) and extends love and respect to those who may not agree with them. Subjects covered include: • Talking openly about our beliefs without indoctrinating kids • Making religious literacy fun and engaging • Talking about death without the comforts of heaven • Navigating religious differences with extended family members • What to do when kids get threatened with hell

A Utopia Like Any Other

Inside the Swedish Model

Luath Press Ltd Does a utopia really exist within northern Europe? Do we have anything to learn from it if it does? And what makes a nation worthy of admiration, anyway? Since the '30s, when the world was wowed by the Stockholm Exhibition, to most people Sweden has meant clean lines, good public housing, and a Social Democratic government. More recently the Swedes have been lauded for their environmental credentials, their aspirational free schools, and their hardy economy. But what's the truth of the Swedish model? Is modern Sweden really that much better than rest of Europe? In this insightful exploration of where Sweden has been, where it's going, and what the rest of us can learn from its journey, journalist Dominic Hinde explores the truth behind the myth of a Swedish Utopia. In his quest for answers he travels the length of the country and further, enjoying July sunshine on the island of Gotland with the cream of Swedish politics for 'Almedalan Week', venturing into the Arctic Circle to visit a town about to be swallowed up by the very mine it exists to serve, and even taking a trip to Shanghai to take in the suburban Chinese

interpretation of Scandinavia, 'Sweden Town', a Nordic city in miniature in the smog of China's largest city.

Atheism Kills

The Dangers of a World Without God - and Cause for Hope

Bookbaby In *Atheism Kills*, Barak Lurie exposes the horrors of a world without God. Contrary to the mantra we've heard time and time again that religion is responsible for more deaths than anything else, it is in fact the absence of God which has killed--in obscene numbers. Ever since atheism first assumed government control in the French Revolution, it has done nothing but kill. Atheism has killed through its many deputies: progressivism, eugenics, fascism, and communism. Lurie shows that it was the godlessness in each of these ideologies that killed hundreds of millions. But atheism doesn't just kill lives. It kills purpose, free will, beauty, compassion, a sense of the past and future, creativity, and freedom itself. Atheism offers only the horrors of chaos and totalitarianism. The world misplaces its focus on Radical Islam as the greatest threat to civilization. As horrible as it is, it is doing nothing and having no sense of self which are the true enemies. It was our will to fight and sense of mission that overcame fascism and communism. We must have these to keep Radical Islam at bay, too. This is why we must resist the growth of atheism. It was God that gave us our freedom. It was God who gave our sense of purpose that created civilization. Take those away, and there is nothing to fight for. In this way, Lurie shows that the lack of belief in God is our greatest danger. How does he know? Because like a hurricane, godlessness has only known how to destroy everything in its path. It has never created. Like there will always be fires, there will always be enemies that seek to destroy our civilization. But if we don't have fire stations with crew, and protocol in each city to deal with fires, those fires will consume us. Likewise, how we prepare ourselves to deal with horrific ideologies will be what saves us. That preparation can only come with our embrace of the centrality of God.

A World Without God

Good Press "A World Without God" by Annie Besant. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.
