## Poverty and Social Exclusion in India

World Bank Publications Despite India's record of rapid economic growth and poverty reduction over recent decades, rising inequality in the country has been a subject of concern among policy makers, academics, and activists alike. Poverty and Social Exclusion in India focuses on social exclusion, which has its roots in India's historical divisions along lines of caste, tribe, and the excluded sex, that is, women. These inequalities are more structural in nature and have kept entire groups trapped, unable to take advantage of opportunities that economic growth offers. Culturally rooted systems perpetuate inequality, and, rather than a culture of poverty that afflicts disadvantaged groups, it is, in fact, these inequality traps that prevent these groups from breaking out. Combining rigorous quantitative research with a discussion of these underlying processes, this book finds that exclusion can be explained by inequality in opportunities, inequality in access to markets, and inequality in voice and agency. This report will be of interest to policy makers, development practitioners, social scientists, and academics working to foster equality in India.

## Caribbean Sociology

### Introductory Readings

Markus Wiener Pub A significant body of Caribbean sociological literature is either scattered, difficult to access, or out of print. This publication addresses this problem by bringing the literature together in a single volume. This comprehensive collection is divided into twelve sections, beginning with a general introduction that reviews Caribbean sociological development. The subsequent sections explore the themes of Caribbean social theory, social stratification, ethnicity, culture and identities, women and gender, education, and modernization, as well as emerging topics of discussion, namely domestic violence, child and sexual abuse, labor market conditions, population and demographic change and indigenous African-derived religions. Christine Barrow is a lecturer in sociology at the University of the West Indies in Barbados. Rhoda Reddock, University of the West Indies, is head of the Center for Gender and Development Studies in St. Augustine, Trinidad.

### Encyclopedia of White-Collar and Corporate Crime

SAGE Publications Since the first edition of the Encyclopedia of White Collar and Corporate Crime was produced in 2004, the number and severity of these crimes have risen to the level of calamity, so much so that many experts attribute the near-Depression of 2008 to white-collar malfeasance, namely crimes of greed and excess by bankers and financial institutions. Whether the perpetrators were prosecuted or not, white-collar and corporate crime came near to collapsing the U.S. economy. In the 7 years since the first edition was produced we have also seen the largest Ponzi scheme in history (Maddoff), an ecological disaster caused by British Petroleum and its subcontractors (Gulf Oil Spill), and U.S. Defense Department contractors operating like vigilantes in Iraq (Blackwater). White-collar criminals have been busy, and the Second Edition of this encyclopedia captures what has been going on in the news and behind the scenes with new articles and updates to past articles.

## Sociologies of New Zealand

Springer This book provides the first comprehensive analysis of the various sociologies of New Zealand from the late 19th century to the present day. Opening with previously undocumented insights into the history of proto-sociology in New Zealand, the book then explores the parallel stories of the discipline both as a mainstream subject in Sociology departments and as a more diffuse 'sociology' within other university units. The rise and fall of departments, specialties and research networks is plotted and the ways in which external and internal factors have shaped these is explained. Different generations of sociologists, including many immigrants, are each shown to have left their unique mark on New Zealand sociology. The author demonstrates that the rising interest in topics specific to New Zealand has been accompanied by increasing capacities to contribute to world sociology. This book will have inter-disciplinary appeal across the social sciences and provides a valuable study of the development of sociology in a semi-peripheral country.

### A Treatise in the Sociology of Knowledge

Open Road Media The classic work that redefined the sociology of knowledge and has inspired a generation of philosophers and thinkers In this seminal book, Peter L. Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society. Unlike earlier theorists and philosophers, Berger and Luckmann go beyond intellectual history and focus on commonsense, everyday knowledge—the proverbs, morals, values, and beliefs shared among ordinary people. When first published in 1966, this systematic, theoretical treatise introduced the term social construction, effectively creating a new thought and transforming Western philosophy.

### Politics In Northern Ireland

Routledge Despite the staggering number of books related to the Northern Ireland political arena, most of the literature concentrates on only a few dimensions of the conflict and especially on constitutional policy and the on-going search for a resolution of the antagonisms. This original textbook, the first of its kind, serves as a comprehensive examination of the subject by exploring these topics and other important dimensions of politics which have been overlooked and undervalued. Politics in Northern Ireland is written by a team of distinguished academics, drawn from both within and outside Northern Ireland. It adopts the analytic tools of political science and brings a comparative perspective to bear on the politics of Northern Ireland. Early chapters examine the historic sources of conflict, analyze the period since the outbreak of the modern troubles, and discuss the differences between the communities. The book then examines the nature of parties, elections, and elective assemblies, before focusing on policy matters, such as fair employment, policing, and gender. In the concluding chapter, contributors consider relations with the Republic of Ireland and discuss events as current as today's headlines, including the historic breakthrough in negotiations, the referendums, and the Assembly elections. The result is a well-rounded core text designed for the classroom, as well as for those interested in learning more about different facets of politics in Northern Ireland.

### World Anthropologies

### Disciplinary Transformations within Systems of Power

Routledge Since its inception, anthropology's authority has been based on the assumption that it is a unified discipline emanating from the West. In an age of heightened globalization, anthropologists have failed to discuss consistently the current status of their practice and its mutations across the globe. World Anthropologies is the first book to provoke this conversation from various regions of the world in order to assess the diversity of relations between regional or national anthropologies and a contested, power-laden Western discourse. Can a planetary anthropology cope with both the 'provincial cosmopolitanism' of alternative anthropologies and the 'metropolitan provincialism' of hegemonic schools? How might the resulting 'world anthropologies' challenge the current panorama in which certain allegedly national anthropological traditions have more paradigmatic weight - and hence more power - than others? Critically examining the international dissemination of anthropology within and across national power fields, contributors address these questions and provide the outline for a veritable world anthropologies project.

### The Politics of Race

Routledge This volume, first published in 1975, is concerned with the politics of race relations; it is divided into theoretical, empirical and methodological studies together with an extensive bibliography. A key theme in this volume is to show how the study of race relations can advance beyond traditional micro-level analysis. In the opening paper Axford and Brier, concerned about the neglect of macro-level analysis, stress the need for conceptual frameworks which would help us to understand the place of racial conflict in the British political system. They suggest that elite political groups, otherwise in conflict, have by tacit consensus eliminated race from the national political agenda.
