PARENTOLOGY

EVERYTHING YOU WANTED TO KNOW ABOUT THE SCIENCE OF RAISING CHILDREN BUT WERE TOO EXHAUSTED TO ASK

Simon and Schuster An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

THE FUTURE FOR INVESTORS

WHY THE TRIED AND THE TRUE TRIUMPHS OVER THE BOLD AND THE NEW

Currency The new paradigm for investing and building wealth in the twenty-first century. The Future for Investors reveals new strategies that take advantage of the dramatic changes and opportunities that will appear in world markets. Jeremy Siegel, one of the world's top investing experts, has taken a long, hard, and in-depth look at the market and the stocks that investors should acquire to build long-term wealth. His surprising finding is that the new technologies, expanding industries, and fast-growing countries that stockholders relentlessly seek in the market often lead to poor returns. In fact, growth itself can be an investment trap, luring investors into overpriced stocks and overly competitive industries. The Future for Investors shatters conventional wisdom and provides a framework for picking stocks that will be long-term winners. While technological innovation spurs economic growth, it has not been kind to investors. Instead, companies that have marketed tried-and-true products for decades in slow-growth or even declining industries have superior returns to firms that develop "the bold and the new." Industry sectors many regard as dinosaurs—railroads and oil companies, for example—have actually beat the market. Professor Siegel presents these strategies within the context of the coming shift in global economic power and the demographic age wave that will sweep the United States, Europe, and Japan. Contrary to the popular belief that these economic and demographic trends doom investors to poor returns, Professor Siegel explains the True New Economy and how to take advantage of the coming surge in invention, discovery, and economic growth. The faster the world changes, the more important it is for investors to heed the lessons of the past and find the tried-and-true companies that can help you beat the market and prosper in the years ahead.

PEARSON FLEXTTEXT, MICROECONOMICS

Pearson FlexText ...setting you up for success in school and at work The study of economics requires a different style of thinking from what you may encounter in other courses. Economists make extensive use of assumptions to break down complex problems into simple, analytically manageable parts. Our experience has taught us that what first-year economics students want most from a FlexText is help in mastering course material to do well on examinations. We have developed this FlexText to respond specifically to that demand.
