## **HOW PEOPLE LEARN II**

---

---

## **LEARNERS, CONTEXTS, AND CULTURES**

---

*National Academies Press* There are many reasons to be curious about the way people learn, and the past several decades

have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

## FRANCOIS OZON

---

*University of Illinois Press* In just over a decade, François Ozon has earned an international reputation as a successful and provocative filmmaker. A student of Eric Rohmer and Jean Douchet at the prestigious Fémis, Ozon made a number of critically acclaimed shorts in the 1990s and released his first feature film *Sitcom* in 1998. Two additional shorts and eleven feature films have followed, including international successes *8 femmes* and *Swimming Pool* and more recent releases such as *Angel*, *Ricky*, and *Le refuge*. Ozon's originality lies in his filmmaking style, which draws on familiar cinematic traditions (the crime thriller, the musical, the psychological drama, the comedy, the period piece) but simultaneously mixes these recognizable genres and renders them unfamiliar. Despite tremendous diversity in cinematic choices, Ozon's oeuvre is surprisingly consistent in its desire to blur the traditional frontiers between the masculine and the feminine, gay and straight, reality and fantasy, auteur and commercial cinema. Thibaut Schilt provides an overview of François Ozon's career to date, highlighting the director's unrestrained, voracious cinephilia, his recurrent collaborations with women screenwriters and actresses, and the trademarks of his cinema including music, dance, and the clothes that accompany these now typically Ozonian episodes. Schilt contextualizes Ozon's filmmaking within the larger fields of French filmmaking and international queer cinema, and he discusses several major themes running through Ozon's work, including obsessions with inadequate fathers, various types of mourning,

and a recurring taste for "the foreign." The volume also includes an insightful interview with the director.

To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. **TRANSFORMING THE WORKFORCE FOR CHILDREN BIRTH THROUGH AGE 8**

---

---

**A UNIFYING FOUNDATION**

---

*National Academies Press* **Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various**

practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. **Transforming the Workforce for Children Birth Through Age 8** explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. **Transforming the Workforce for Children Birth Through Age 8** offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

## **PSYCHOLOGICAL TESTING IN THE SERVICE OF DISABILITY DETERMINATION**

---

*National Academies Press* The United States Social Security Administration (SSA) administers two disability programs: Social Security Disability Insurance (SSDI), for disabled individuals, and their dependent family members, who have worked and contributed to the Social Security trust funds, and Supplemental Security Income (SSSI), which is a means-tested program based on income and financial assets for adults aged 65 years or older and disabled adults and children. Both programs require that claimants have a disability and meet specific medical criteria in order to qualify for benefits. SSA establishes the presence of a medically-determined impairment in individuals with mental disorders other than intellectual disability through the use of standard diagnostic criteria, which include symptoms and signs. These impairments are established largely on reports of signs and symptoms of impairment and functional limitation. Psychological Testing in the Service of Disability Determination considers the use of psychological tests in evaluating disability claims submitted to the SSA. This report critically reviews selected psychological tests, including symptom validity tests, that could contribute to SSA disability determinations. The report discusses the possible uses of such tests and their contribution to disability determinations. Psychological Testing in the Service of Disability Determination discusses testing norms, qualifications for administration of tests, administration of tests, and reporting results. The recommendations of this report will help SSA improve the consistency and accuracy of disability determination in certain cases.
