## Parentology

## Everything You Wanted to Know about the Science of Raising Children but Were Too Exhausted to Ask

*Simon and Schuster* An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If

you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

## Stress Management Through Ancient Wisdom and Modern Science

*Excel Books India* To craft **Stress Management Through Ancient Wisdom and Modern Science**, Dr Umesh Sharma searched the world's spiritual and scientific literature to present us with his groundbreaking Kosha Model of Stress Management, unveiling ancient spiritual wisdom concealed for ages in the Vedas and Upanishads. The model takes us on a voyage of self-discovery and represents the best, most effective strategies for managing stress, the modern killer, shifting the paradigm away from its narrow western focus. The koshas are layers of spiritual selves within us, hurdles that come between us and realization of true and lasting happiness. Peeling away these five layers brings awareness, eventually enabling us to reach the innermost core our true self. Dr Sharma also explains why Adi Shankaracharya was stress free; why CEOs and their executives are usually

so stressed out; why most people are unhappy most of the time; where Osama will strike next; loving, laughing and learning in the family; why our work is our joy; symbolism of the ten Avatars of Vishnu and how they help us to attain bliss; yoga for executives; and daily mental diet for a stress free life. This amazing book not only gives a unique recipe for personal happiness, achievement and inner peace, but is also a treasure of quotations and insights that combat stress and even evoke humour, the best medicine.
