BROODSTOCK MANAGEMENT AND EGG AND LARVAL QUALITY

Wiley-Blackwell At present, the supply of eggs and fry is one of the major constraints on future aquaculture development. For the majority of farmed species, production is totally dependent on harvesting of broodstocks or seed from wild populations. At present we know little about the control of reproduction of most farmed finfish nor of the detailed nutrient, metabolic and husbandry requirements of the broodstock or the ways in which they might be managed to optimize seed production and improve the quality of eggs and larvae. Newer technologies such as ploidy and gender manipulation, induced spawning and cryopreservation are coming to the forefront of modern broodstock management and all of these topics are considered, in detail, in this new text. *Broodstock Management and Egg and Larval Quality* has been written as a standard text for commercial practitioners and students of aquaculture, fish biology and fisheries and provides a comprehensive review of current and future methods of broodstock and hatchery management. The range of marine and freshwater tropical and temperate finfish species considered, together with contributions from many of the world's most eminent fish biologists, provide comprehensive and international coverage of this increasingly important area of aquaculture.

HOW RISKY IS IT, REALLY?: WHY OUR FEARS DON'T ALWAYS MATCH THE FACTS

McGraw Hill Professional "Clear, balanced, and lively." -- Steven Pinker, bestselling author of *How the Mind Works* **ARE YOU AFRAID OF THE "RIGHT" RISKS?** Do you worry more about radiation from nuclear power or from the sun? Are you more afraid of getting cancer than heart disease? Are you safer talking on your cell phone or using a hands-free device when you drive? Do you think global warming is a serious threat to your health? **GET THE FACTS BEHIND YOUR FEARS—AND DISCOVER . . . HOW RISKY IS IT, REALLY?** International risk expert David Ropeik takes an in-depth look at our perceptions of risk and explains the hidden factors that make us unnecessarily afraid of relatively small threats and not afraid enough of some really big ones. Understanding how we perceive risk is the first step toward making wiser and healthier choices for ourselves as individuals and for society as a whole. **TEST YOUR OWN "RISK RESPONSE" IN DOZENS OF SELF-QUIZZES!**

STRUCK BY LIGHTNING

THE CURIOUS WORLD OF PROBABILITIES

National Academies Press From terrorist attacks to big money jackpots, *Struck by Lightning* deconstructs the odds and oddities of chance, examining both the relevant and irreverent role of randomness in our everyday lives. Human beings have long been both fascinated and appalled by randomness. On the one hand, we love the thrill of a surprise party, the unpredictability of a budding romance, or the freedom of not knowing what tomorrow will bring. We are inexplicably delighted by strange coincidences and striking similarities. But we also hate uncertainty's dark side. From cancer to SARS, diseases strike with no apparent pattern. Terrorists attack, airplanes crash, bridges collapse, and we never know if we'll be that one in a million statistic. We are all constantly faced with situations and choices that involve randomness and uncertainty. A basic understanding of the rules of probability theory, applied to real-life circumstances, can help us to make sense of these situations, to avoid unnecessary fear, to seize the opportunities that randomness presents to us, and to actually enjoy the uncertainties we face. The reality is that when it comes to randomness, you can run, but you can't hide. So many aspects of our lives are governed by events that are simply not in our control. In this entertaining yet sophisticated look at the world of probabilities, author Jeffrey Rosenthal—an improbably talented math professor—explains the mechanics of randomness and teaches us how to develop an informed perspective on probability.

DRAW YOUR WEAPONS

Random House A single book might not change the world. But this utterly original meditation on art and war might transform the way you see the world—and that makes all the difference. “How to live in the face of so much suffering? What difference can one person make in this beautiful, imperfect, and imperiled world?” Through a dazzling combination of memoir, history, reporting, visual culture, literature, and theology, Sarah Sentilles offers an impassioned defense of life lived by peace and principle. It is a literary collage with an urgent hope at its core: that art might offer tools for remaking the world. In *Draw Your Weapons*, Sentilles tells the true stories of Howard, a conscientious objector during World War II, and Miles, a former prison guard at Abu Ghraib, and in the process she challenges conventional thinking about how war is waged, witnessed, and resisted. The pacifist and the soldier both create art in response to war: Howard builds a violin; Miles paints portraits of detainees. With echoes of Susan Sontag and Maggie Nelson, Sentilles investigates images of violence from the era of slavery to the drone age. In doing so, she wrestles with some of our most profound questions: What does it take to inspire compassion? What impact can one person have? How should we respond to violence when it feels like it can’t be stopped? Praise for *Draw Your Weapons* “A collage of death, savagery, torture, and trauma across generations and continents, Sarah Sentilles’s *Draw Your Weapons* is painful to read, hard to put down, and impossible to forget.”—*O: The Oprah Magazine* “In her dynamic, impressionistic (and cleverly titled) book, Sentilles focuses on language and images—particularly photography—and considers what role they play in peace and war. Eschewing a traditional narrative, Sentilles focuses on two men—one a World War II conscience objector who makes violins, and the other an Abu Ghraib prison guard who paints detainee portraits. In brief, delicately layered pieces rather than a narrative, Sentilles has created a collage that explores art, violence, and what it means to live a principled life.”—*The National Book Review* “It’s the kind of book that, after reading just half, you have to stop and catch your breath, because reading it changes you, not just in terms of what you know—it changes the way you think and how you feel—so much so that, halfway in, I wanted to go back and start again because I felt I was already a different person to the person I was when I began.”—*Turnaround*
