Popular Photography **Veja Bats in the Anthropocene: Conservation of Bats in a Changing World Springer** This book focuses on central themes related to the conservation of bats. It details their response to land-use change and management practices, intensified urbanization and roost disturbance and loss. Increasing interactions between humans and bats as a result of hunting, disease relationships, occupation of human dwellings, and conflict over fruit crops are explored in depth. Finally, contributors highlight the roles that taxonomy, conservation networks and conservation psychology have to play in conserving this imperilled but vital taxon. With over 1300 species, bats are the second largest order of mammals, yet as the Anthropocene dawns, bat populations around the world are in decline. Greater understanding of the anthropogenic drivers of this decline and exploration of possible mitigation measures are urgently needed if we are to retain global bat diversity in the coming decades. This book brings together teams of international experts to provide a global review of current understanding and recommend directions for future research and mitigation. **Veja Rio Digital Evolution Game Is Life The Game is Life - Book 6** Ten years have passed on Tygon since the Virtual Prophet woke the Dreamers. Games of life and death continue and the stakes for winning - or

losing - promise to affect the inhabitants across three realities. Radar Instruction Manual Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. This volume distills the core principles, methods, and vision of the approach. Each Functional Analytic Psychotherapy (FAP) principle is presented in terms of its intended purpose and is clearly linked to the underlying theory, thus providing clinicians with a straightforward guide for when and how to apply each technique. FAP embraces awareness, courage, and love as integral to the treatment process. Part I of this volume reviews the history of FAP and the basic behavioral principles on which it is based. Part II provides an easy to use step-by-step guide to the application of FAP techniques. FAP is an approach undergoing a renaissance, and this volume uniquely summarizes the full history, theory, and techniques of FAP, resulting in a handbook perfect for clinicians and graduate students with or without a behavioural background. Thermosense XXXI The Judgment of Paris The Revolutionary Decade That Gave the World Impressionism Anchor Canada The fascinating new book by the author of Brunelleschi's Dome and Michelangelo and the Pope's Ceiling: a saga of artistic rivalry and cultural upheaval in the decade leading to the birth of Impressionism. If there were two men who were absolutely central to artistic life in France in the second half of the nineteenth century, they were Edouard Manet and Ernest Meissonier. While the former has been labelled the "Father of Impressionism" and is today a household name, the latter has sunk into obscurity. It is difficult now to believe that in 1864, when this story begins, it was Meissonier who was considered the greatest French artist alive and who received astronomical sums for his work, while Manet was derided for his messy paintings of ordinary people and had great difficulty getting any of his work accepted at the all-important annual Paris Salon. Manet and Meissonier were the Mozart and Salieri of their day, one a dangerous challenge to the establishment, the other beloved by rulers and the public alike for his painstakingly meticulous oil paintings of historical subjects. Out of the fascinating story of their

parallel careers, Ross King creates a lens through which to view the political tensions that dogged Louis-Napoleon during the Second Empire, his ignominious downfall, and the bloody Paris Commune of 1871. At the same time, King paints a wonderfully detailed and vivid portrait of life in an era of radical social change: on the streets of Paris, at the new seaside resorts of Boulogne and Trouville, and at the race courses and picnic spots where the new bourgeoisie relaxed. When Manet painted *Dejeuner sur l'herbe* or *Olympia*, he shocked not only with his casual brushstrokes (described by some as applied by a 'floor mop') but with his subject matter: top-hatted white-collar workers (and their mistresses) were not considered suitable subjects for 'Art'. Ross King shows how, benign as they might seem today, these paintings changed the course of history. The struggle between Meissonier and Manet to see their paintings achieve pride of place at the Salon was not just about artistic competitiveness, it was about how to see the world. Full of fantastic tidbits of information (such as the use of carrier pigeons and hot-air balloons during the siege of Paris), and a colourful cast of characters that includes Baudelaire, Courbet, and Zola, with walk-on parts for Monet, Renoir, Degas, and Cezanne, *The Judgment of Paris* casts new light on the birth of Impressionism and takes us to the heart of a time in which the modern French identity was being forged.

Prairie Ghost Pronghorn and Human Interaction in Early America University Press of Colorado A Wildlife Management Institute Book In this lavishly illustrated volume Richard E. McCabe, Bart W. O'Gara and Henry M. Reeves explore the fascinating relationship of pronghorn with people in early America, from prehistoric evidence through the Battle of Little Bighorn in 1876. The only one of fourteen pronghorn-like genera to survive the great extinction brought on by human migration into North America, the pronghorn has a long and unique history of interaction with humans on the continent, a history that until now has largely remained unwritten. With nearly 150 black-and-white photographs, 16 pages of color illustrations, plus original artwork by Daniel P. Metz, *Prairie Ghost: Pronghorn and Human Interaction in Early America* tells the intriguing story of humans and these elusive big game mammals in an informative and entertaining fashion that will appeal to historians, biologists, sportsmen and the general reader alike. Winner of the Wildlife Society's Outstanding Book Award for 2005

Using Science to Improve the BLM Wild Horse and Burro Program A Way Forward National Academies Press Using Science to Improve the BLM Wild Horse and Burro Program: A Way Forward reviews the science that underpins the Bureau of Land Management's oversight of free-ranging horses and burros on federal public lands in the western United States, concluding that constructive changes could be implemented. The Wild Horse and Burro Program has not used scientifically rigorous methods to estimate the population sizes of horses and burros, to model the effects of management actions on the animals, or to assess the availability and use of forage on rangelands. Evidence suggests that horse populations are growing by 15 to 20 percent each year, a level that is unsustainable for maintaining healthy

horse populations as well as healthy ecosystems. Promising fertility-control methods are available to help limit this population growth, however. In addition, science-based methods exist for improving population estimates, predicting the effects of management practices in order to maintain genetically diverse, healthy populations, and estimating the productivity of rangelands. Greater transparency in how science-based methods are used to inform management decisions may help increase public confidence in the Wild Horse and Burro Program.

Four Farces Hal Leonard Corporation Wild plots and quicksilver wit characterize the plays of Georges Feydeau. Called the greatest master of French comedy since Moliere by admirers such as Kenneth Tynan, Feydeau reflects the lusty tradition of the French bedroom farce as well as the tough exorbitant humor later to find full expression in the theater of the absurd. The plays offered in this volume represent the major stages of Feydeau's career. The one-act *Woed and Viewed* was his first comedy, written in 1880. On the *Marry-go-Wrong* shows Feydeau on the way to becoming a master of mad imbroglia, a talent that he demonstrates in *Not by Bed Alone*. *Going to Pot* is a one-act play of conjugal strife of the emotional intensity that marked his work toward the end of his career.

History of Pictures ABRAMS A compact edition of Hockney and Gayford's brilliantly original book, with updated material and brand-new pieces of art

Informed and energized by a lifetime of painting, drawing, and making images with cameras, David Hockney, in collaboration with art critic Martin Gayford, explores how and why pictures have been made across the millennia. Juxtaposing a rich variety of images--a still from a Disney cartoon with a Japanese woodblock print by Hiroshige, a scene from an Eisenstein film with a Velazquez painting--the authors cross the normal boundaries between high culture and popular entertainment, and argue that film, photography, painting, and drawing are deeply interconnected. Featuring a revised final chapter with some of Hockney's latest works, this new, compact edition of *A History of Pictures* remains a significant contribution to the discussion of how artists represent reality.

A Bigger Message Conversations with David Hockney This new edition includes a revised introduction and five new chapters which cover Hockney's production since 2011, including preparations for the *Bigger Picture* exhibition held at the Royal Academy in 2012 and the making of Hockney's iPad drawings and plans for the show. A difficult period followed the exhibition's huge success, marked first by a stroke, which left Hockney unable to speak for a long period, followed by the vandalism of the artist's Totem tree-trunk, and the tragic suicide of his assistant shortly thereafter. Escaping the gloom, in spring 2013 Hockney moved back to L.A. A few months later, Martin Gayford visited Hockney in the L.A. studio, where the fully-recovered

artist was hard at work on his *Comedie humaine*, a series of full-length portraits painted in the studio. Coetzee, Nadine Gordimer and Ben Okri. **Rule-Governed Behavior Cognition, Contingencies, and Instructional Control** Springer Science & Business Media Animal learning and human learning traditions have been distinguishable within psychology since the start of the discipline and are to this day. The human learning wing was interested in the development of psychological functions in human organisms and proceeded directly to their examination. The animal learning wing was not distinguished by a corresponding interest in animal behavior per se. Rather, the animal learners studied animal behavior in order to identify principles of behavior of relevance to humans as well as other organisms. The two traditions, in other words, did not differ so much on goals as

on strategies. It is not by accident that so many techniques of modern applied psychology have emerged from the animal laboratory. That was one of the ultimate purposes of this work from the very beginning. The envisioned extension to humans was not just technological, however. Many animal researchers, B. F. Skinner most prominently among them, recognized that direct basic research with humans might ultimately be needed in certain areas but that it was wise first to build a strong foundation in the controlled environment of the animal laboratory. In a sense, animal learning was always in part a human research program in development.

Renegade Descent An Intergalactic Space Opera Adventure The Celestial War has arrived. Captain Hughes and his team of rebels have created a shaky alliance with the same government that sought to end them, but even that might not be enough. In order to combat the Celestial threat, Jace will need to convince the Sarkonian Emperor to not only join his cause but lend him the resources he needs to overpower the enemy. The battle for tomorrow will take more than any single empire can manage. Each side will have to learn to work together if they ever hope to overcome their shared enemy, but allies are not easily made from enemies, and not everyone will be as eager to stand side-by-side. With allies like the Union and the Sarkonians, who needs enemies? Experience the continuation of this sprawling galactic tale in the eleventh entry in the **Renegade Star** series. If you're a fan of *Firefly*, *Battlestar Galactica*, or *Indiana Jones*, you'll love this space opera epic.

PLEASE PROVIDE FEEDBACK WITH COMMENTS AND SCORING. Readings for Strategies and Tactics of Behavioral Research Routledge The readings featured in this volume are compiled from the authors' previously published papers and chapters, as well as newly written materials. At a more advanced level, the readings address certain specialized topics. However, these readings are thematically consistent with the chapters in the companion volume, making them especially suitable as supplementary material. Together with its companion volume, it provides an integrated and coherent account of how to study behavior. Most topics treated in traditional research methods texts are covered in detail, with particular reference to behavior as a subject matter. However, the work is distinctive from other texts in that its topics are organized not around inferential statistical methods, but the needs of a behavioral subject matter and the goal of bringing the researcher's behavior under its control. This approach closely integrates each new chapter with previous chapters, and the result is especially intuitive for students.
