The Research Interview Reflective Practice and Reflexivity in Research Processes Springer Research and Qualitative Interviews brings into focus the decisions that the interviewer faces by taking a data-led approach in order to open up choices and decisions in the process of planning for, managing, analysing and representing interviews. The chapters concentrate on the real-time, moment-by-moment nature of interview management and interaction. A key feature of the book is the inclusion of reflexive vignettes that foreground the voices and experience of qualitative researchers (both novices and more expert practitioners). The vignettes demonstrate the importance of reflecting on and learning from interactional experience. In addition, the book provides an overview of different types of interviews, commenting on the orientation and make-up of each type. Overall, this book encourages reflective thinking about the use of research interviews. It distinguishes between reflection, reflective practice and reflexivity. All the chapters focus on recurring choices, dilemmas and puzzles; offering advice in opening out and engaging with these aspects of the research interview. Assistive Technology for Cognition A handbook for clinicians and developers Psychology Press Assistive technology for cognition is technology which can be used to enable, enhance, or extend cognitive function. This book systematically examines how cutting-edge digital technologies can assist the cognitive function of people with cognitive impairments, with the potential to revolutionize rehabilitation. Technologies are reviewed which direct attention, remind, recognize, prompt, and generally guide people through activities of daily living. Written by experts in neuropsychology and technology development, Assistive Technology for Cognition provides a comprehensive overview of the efficacy of technologies to assist people with brain impairments. Based on the list provided by the International Classification of Function, each chapter covers a different cognitive function; namely, attention, memory, affect, perception, executive function, language, numeracy, sequencing, and navigation onto which existing and future assistive technologies for cognition are mapped. This structure provides in-depth research in an accessible way, and will allow practitioners to move from an assessment of cognitive deficits to the prescription of an appropriate assistive technology for cognition. The chapters also make suggestions for future developments. Assistive Technology for Cognition will be of great interest to clinicians and researchers working in brain injury rehabilitation, technology developers, and also to students in clinical psychology, neuropsychology, and allied health disciplines. The process involves answering a series of questions, some requiring yes or no responses and others involving extended textual answers. This report describes new features added to the SERA tool, principally the ability for investigators in the field to dictate remarks to a voice recorder for later inclusion in a SERA report. The purpose of voice recording is to reduce the need for the more cumbersome use of a stylus to enter textual responses. Support was added to SERA that accepts text recorded on a Sony IC Voice Recorder and transcribed by the Dragon Naturally Speaking software. Also implemented was a feature that allows users to exclude selected items from an exported SERA report. A final addition to the software allows investigators to review their audio recordings for accuracy in transcription. **SPEAKING WITH STYLE THE COMPLETE GUIDE TO PUBLIC SPEAKING** PHI Learning Pvt.
