Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, his crooked grin made you smile. Without warning the heavy door would swing open and the waiters would come outside to join him. They were dressed in pajamas or prison garb, with hats and horns, and were there to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chummy, exchanging stories they had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line of people varied in age. They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you might see a "Balls for the Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be. **Car PC Hacks Tips & Tools for Geeking Your Ride** "O'Reilly Media, Inc." Literally. In Things Go Flying, Harold Walker is desperately average and listless at mid-life, stemming in part from the abrupt death of his one-time best friend, Tom. Harold's wife Audrey, an increasingly frustrated housewife and mother to their two teenage sons, is a control freak silently harbouring an explosive secret. Things go flying in the Walker household when Harold's long-deceased mother comes back to haunt them. He finds he has her gift for opening the door to the past-and if there was ever a gift he wanted to return, it's this one! Audrey is similarly terrified-how is she to safeguard her secret now? If she can't control this world, how is she to control the next one? And how will she protect her good china? Harold, who has made a practice of avoiding things all his life, must confront two problems-how to find meaning in this life, and how to come to grips with the mostly terrifying idea that life just might go on forever! **Life Is Bless and Love Is Bliss An Ode to Life and Love** Partridge Publishing 'Life is bless and love is bliss', is an ode; an ode to life and love. It is a compilation of poetry. Each poetry shares a story; a story that will make you laugh, a story that will make you feel and a story that will make you think. If the entire collection of poems are read together it explains a tale; the tale of human life. The author has divided life as a human into various forms; 'The crawler, the learner, the explorer, the first seeker, the lover, the solitude dreamer, the runner, the second seeker, the third seeker, the second crawler and the sleeper.' The curtains are finally drawn with the sleeper.From crawler to second crawler the humans are offered choices; the choices are love. Every form in life seeks the very love and if it is found there is serenity. The poetry under each form expalins love that one spreads and seeks in each form. The final form, 'the sleeper' where the soulless lays down explains that life and its purpose is very simple. The purpose is love and survive. **Susceptibility in Development Micropolitics of Local Development in India and Indonesia** Susceptibility in Development offers a novel approach to understanding power in development through theories of affect and emotion. Development agents - people tasked with designing or delivering development - are susceptible to being affected in ways that may derail or threaten their "senseof self". This susceptibility is in direct relation to the capacity of others to engender feelings in development agents: an overlooked form of power. Susceptibility in Development proposes a new analytical framework to enable new readings of power relations and their consequences for development.Susceptibility in Development offers a comparative ethnography of two types of local development agents: volunteers in a community development program in Medan,

Indonesia, and women municipal councillors in Dehradun, India. Ethnographic accounts that are attentive to the emotions and affects engendered in encounters between individuals provide a fresh reading of the relations shaping local development. Local development agents may be more "susceptible" than workers and volunteers from the global North, yet the capacity/susceptibility to affect/be affected orders relations and shapes outcomes of development more broadly. In theorising from the local, Susceptibility in Development offers fresh insights into power dynamics in development.

Legal Aspects of Privately Financed Infrastructure Projects (PFIPs) in China The Case for International Standards *Springer Nature* This book discusses the reform and improvement of Chinese legislation on Privately Financed Infrastructure Projects (PFIPs), the goal being to help its implementation in China satisfy international standards. In this regard, current Chinese laws are found to be insufficient when it comes to reducing risks to PFIPs, due to certain shortcomings. Therefore, the corresponding legislation must be reformed and improved. The Legislative Guide and Model Provisions drafted by UNCITRAL are discussed as the international standards that can effectively guide this reform; other countries' laws on PFIPs provide supplementary reference material. Given the rapid rise in the use of PFIPs in China, this book offers a strong theoretical basis for improving Chinese legislation. It also provides general suggestions that can be applied to the reform of laws on PFIPs in any country.

Sustainable Economic Development Challenges, Policies, and Reforms *MDPI* This book is a pivotal publication that addresses the contemporary challenges of globalization and elaborate policy responses to environmental pollution, climate change, economic disruptions, poverty, hunger, and other threats to sustainable economic development. Many parts of the world, territories, and societies are now changing at an unprecedented pace in ways that fundamentally affect the markets, people, the environment, and biodiversity. Such changes are primarily driven by rapid social and economic developments, economic disparities between countries, the internationalization of production and value chains, and industrialization. Increasingly frequently, business interests are interfering with sustainable development goals. The issue is how to converge the economic benefits with the urgent need for establishing resilient production chains, social networks, sustainably-operating markets, and environmental protection. This publication highlights the need for the balanced economic development and comprehensive coverage of many sustainability-business areas. Economic, production, financial, and social factors of sustainability are discussed by over 90 contributors representing 40 universities and research institutions from seven countries. Their findings are translated into workable approaches and policies for the benefit of the global economy, people, and the environment.
