Teaching Writing

Heinemann Educational Books **"Writing allows each of us to live with that special wide-awakeness that comes from knowing that our lives and our ideas are worth writing about." -Lucy Calkins** *Teaching Writing* is Lucy Calkins at her best—a distillation of the work that's placed Lucy and her colleagues at the forefront of the teaching of writing for over thirty years. This book promises to inspire teachers to teach with renewed passion and power and to invigorate the entire school day. This is a book for readers who want an introduction to the writing workshop, and for those who've lived and breathed this work for decades. Although Lucy addresses the familiar topics—the writing process, conferring, kinds of writing, and writing assessment—she helps us see those topics with new eyes. She clears away the debris to show us the teeny details, and she shows us the majesty and meaning, too, in these simple yet powerful teaching acts. Brain Words

How the Science of Reading Informs Teaching

"Gentry and Ouellette are cannonballing into the reading research pool, they're making waves, and these waves are moving the field of reading forward." --From the foreword by Mark Weakland, *Super Spellers* The past two decades have brought giant leaps in our understanding of how the brain works. But these discoveries--and all their exciting implications--have yet to make their way into most classrooms. With the concise and readable *BrainWords*, you will learn how children's brains develop as they become readers and discover ways you can take concrete steps to promote this critical developmental passage. Introducing their original, research-based framework of "brain words"--dictionaries in the brain where students store and automatically access sounds, spellings, and meanings--the authors offer a wealth of information that will transform your thinking and practice: Up-to-date knowledge about reading and neurological circuitry, including evidence that spelling is at the core of the reading brain Tools to recognize what works, what doesn't, and why Practical classroom activities for daily teaching and student assessment Insights about what brain research tells us about whole language and phonics-first movements Deepened understanding of dyslexia through the enhanced lens of brain science With the insights and strategies of *BrainWords*, you can meet your students where they are and ensure that more of them read well, think well, and write well.

The Chenango County Farm and Home Bureau News

Resisting the Kinder-Race

Restoring Joy to Early Learning

Teachers College Press "This book explores how the current process of schooling that frames public education through economic rather than democratic terms is fundamentally flawed, why it must change, and how all members and participants within the early childhood and elementary school communities must be a part of the reform process. The work is based on the author's recent studies of stakeholders' in the changed kindergarten as well as earlier studies examining the impact of reforms on classrooms, pre and in-service teachers, students, families, administrators, teacher educators, and other education stakeholders. By examining these issues empirically, practically, and theoretically, the author illuminates the complexity of what is currently occurring in kindergarten and other early childhood classrooms across the U.S. Then, Brown skillfully puts forward ideas for change that are practical and achievable in developing systems of schooling that can educate, foster, and sustain a democratic society"--
