Harley-Davidson

Design and Development

Thunder Bay Press (CA) No other motorcycle can match the style, looks, or sound of these polished chrome masterpieces with their famous, rumbling V-twin engines. This book celebrates the best of Harley-Davidson's magnificent heritage, detailing more than 50 machines, built over nearly a century of manufacturing. All the most famous production models are included, from the Silent Gray Fellow of 1911, right up to today's motorcycles, with their Twin Cam 88 engines. Stunning photography highlights every aspect of each motorcycle with superb double-page pictures and close-up detail shots. The book fully explains the most important parts of each machine and explores the fascinating history that makes each bike so special. Comprehensive specifications cover all the machines' technical aspects.

Harley-Davidson Sportster Performance Handbook

Motorbooks International For Harley-Davidson aficionados, the very name Sportster conjures an image of a fire-breathing mechanical beast scorching the world's tarmac image the Sportster itself often does not live up to. Straight from the factory, in its standard form, the Sportster routinely proves an entry-level motorcycle providing a relatively tame ride. This book aims to change all that and

to show every Sportster rider how to free the beast in his or her bike. With expert, detailed advice on the proper mechanical massaging and plenty of helpful diagrams and photos this updated, third edition of Buzz Buzzelli's best-selling handbook shows how the Sportster can be transformed into the superbike of old. Including a history of the Sportster from its birth in 1957 to the recent introduction of a new engine (only the third in its long life), this book has everything it takes to open up the gates of hell and give the Sportster its head.

How to Tune and Modify Motorcycle Engine Management Systems

MotorBooks International From electronic ignition to electronic fuel injection, slipper clutches to traction control, today's motorcycles are made up of much more than an engine, frame, and two wheels. And, just as the bikes themselves have changed, so have the tools with which we tune them. How to Tune and Modify Motorcycle Engine Management Systems addresses all of a modern motorcycle's

engine-control systems and tells you how to get the most out of today's bikes. Topics covered include: How fuel injection works Aftermarket fuel injection systems Open-loop and closed-loop EFI systems Fuel injection products and services Tuning and troubleshooting Getting more power from your motorcycle engine Diagnostic tools Electronic throttle control (ETC) Knock control systems Modern fuels Interactive computer-controlled exhaust systems

Universal Joint and Driveshaft Design Manual

SAE International This publication presents information on technological developments regarding universal joints, including details on design and application practices which have proven to be successful. Engineers, designers, students and others associated with drivetrain engineering will benefit from the Universal Joint and Driveshaft Design Manual's descriptions of the latest technologies practiced in the power transmission field. Design guidelines which assist in the establishment of new designs, improve existing designs, or solve specific problems are explained. Subjects covered include: All power transmitting mechanisms classified as universal joints, both the constant and nonconstant velocity types; the most commonly used driveshaft arrangements that couple universal joints to other driveshaft and drivetrain components; Applications requiring the transmission of power from the power source to a drivetrain member; Drivetrain disturbances; Analytical procedures for design analysis, evaluation and application. Numerous references, appendices and a complete bibliography supplement this single-source reference to the area of universal joints and driveshafts.

Triumph Twenty-One to Daytona

The C Class 350cc and 500cc Twins

Crowood Press UK The Triumph 350cc and 500cc unit-construction twins were called the 'C' Series, and were made between 1957 and 1974. The range started with the 350cc 'Twenty-one' - a sedate touring bike with full enclosure in the form of the famous Triumph 'Bathtub' - went through such famous names as the Speed Twin, Tiger 100 and Trophy, and ended with the rip-roaring Daytona and the off-road Adventurer. This book deals with the whole range, giving the history of all the models, and also describes the restoration of a 1969 Trophy T100C.
