## Challenges in Language Testing Around the World

### Insights for language test users

Springer Nature This book combines insights from language assessment literacy and critical language testing through critical analyses and research about challenges in language assessment around the world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers-in-training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real-world language use.

## The Routledge Handbook of English Language Education in Bangladesh

Routledge This Handbook is a comprehensive overview of English language education in Bangladesh. Presenting descriptive, theoretical, and empirical chapters as well as case studies, this Handbook, on the one hand, provides a comprehensive view of the English language teaching and learning scenario in Bangladesh, and on the other hand comes up with suggestions for possible decolonisation and de-eliticisation of English in Bangladesh. The Handbook explores a wide range of diverse endogenous and exogenous topics, all related to English language teaching and learning in Bangladesh, and acquaints readers with different perspectives, operating from the macro to the micro levels. The theoretical frameworks used are drawn from applied linguistics, education, sociology, political science, critical geography, cultural studies, psychology, and economics. The chapters examine how much generalisability the theories have for the context of Bangladesh and how the empirical data can be interpreted through different theoretical lenses. There are six sections in the Handbook covering different dynamics of English language education practices in Bangladesh, from history, policy and practice to assessment, pedagogy and identity. It is an invaluable reference source for students, researchers, and policy makers interested in English language, ELT, TESOL, and applied linguistics.
