STRAY

Andrea K Hösth On her last day of high school, Cassandra Devlin walked out of exams and into a forest. Surrounded by the wrong sort of trees, and animals never featured in any nature documentary, Cass is only sure of one thing: alone, she will be lucky to survive. The sprawl of abandoned blockish buildings Cass discovers offers her only more puzzles. Where are the people? What is the intoxicating mist which drifts off the buildings in the moonlight? And why does she feel like she's being watched? Increasingly unnerved, Cass is overjoyed at the arrival of the formidable Setari. Whisked to a world as technologically advanced as the first was primitive, where nanotech computers are grown inside people's skulls, and few have any interest in venturing outside the enormous whitestone cities, Cass finds herself processed as a 'stray', a refugee displaced by the gates torn between worlds. Struggling with an unfamiliar language and culture, she must adapt to virtual classrooms, friends who can teleport, and the ingrained attitude that strays are backward and slow. Can Cass ever find her way home? And after the people of her new world discover her unexpected value, will they be willing to let her leave? magic, no artefact, no enchanted trinket which can undo the past. But no matter how Medair wishes to hide from the consequences of her failure, there are those who will not allow her the luxury of denying the present. Her war is already lost, but she carries weapons which could change the course of new battles. With the skirmishes of war beginning, and hunters in near pursuit, it is her conscience Medair cannot escape. Whose side should she be on? What is she really running from?

LAB RAT ONE

Andrea K Hösth Can she ever be “Just Cass” again? In the months since Cassandra Devlin walked off Earth onto another planet, she has grappled with everything from making blankets to helping psychics battle the memories of monsters. Not able to find a way home, she has instead gained friends and a purpose. Unfortunately, that purpose brings with it the pressure of being more than a little valuable, and those she has befriended are also her guards, ordered to explore and control her abilities to find out just what it is a touchstone can do. Test subject was not the career path Cass had been planning. With no privacy, too-frequent injuries, and the painful knowledge that she must always be an assignment to her Setari companions, Cass can only wish for some semblance of normality and control. And as her abilities become more and more dangerous, tests and training may be the only thing capable of protecting Cass from herself. STAINED GLASS MONSTERS

Andrea K Hösth Creatures from the Eferum are a world-wide problem: creeping through tears in the fabric of space, they feast on every unprotected human they can find. Tyrland has a solution in the Kellian: faster and stronger than humans, they are Tyrland's clawed, shadowy monster hunters. But no matter how faithfully they serve, or how true their sworn word, they are too different, too separate, to ever be entirely trusted. Rennyn Claire is a complication. Secretive and obscenely powerful, she knows entirely too much about a massive new threat to Tyrland's safety. Worst of all, she is linked to a past that the Kellian would rather forget. All three of these things - monsters, Kellian, and an entirely overpowered mage - are about to land in Kendall Stockton's lap. The last thing Kendall wants is to try to play conscience to someone who can swat her like a bug. But innocent lives are at stake, and no-one else seems willing to ask if what is necessary is the right thing to do. And who, exactly, is the monster? THE TOWERS, THE MOON

Andrea K Hösth France, under the Court of the Moon, is a country of cyclical change, where the true rulers arrive every night to compete among themselves, and humans are backdrop, witnesses, inessential - and yet inextricably intertwined. It is the reign of the Gilded Tower, and fashions are daring. *Two Wings*: Griff Tenning has suffered too much change in the past year, and wishes everything would quiet down for a while - or, better still, would go back to when his parents were alive. But, even so, it's useful that his odd aunt can afford airship tickets to France. On such a quick trip, his hated travel sickness won't be enough to keep him from a chance to stand beneath the impossible Towers of the Moon. *Forfeit*: Forfeit is the newest game of the Court of the Moon, and one seemingly designed for humans to lose. But Arianne Seaforth is willing to pay a great deal to help her oldest friend - and she is learning to extract a price of her own. *Death and the Moon*: Eluned Tenning can barely remember all the names of the vast network of cousins making her sixteenth birthday party so overwhelming. But she has no problems with would-be actor Milo, who is so calmly quiet and friendly. She'd never step on a stage herself, but she's happy to help him rehearse. Note: this book contains three short

stories. "Two Wings" is 7,500 words, "Forfeit" is 20,000 words, and "Death and the Moon" is 2300 words.

VLADIMIR NABOKOV IN CONTEXT

Cambridge University Press Vladimir Nabokov, bilingual writer of dazzling masterpieces, is a phenomenon that both resists and requires contextualization. This book challenges the myth of Nabokov as a sole genius who worked in isolation from his surroundings, as it seeks to anchor his work firmly within the historical, cultural, intellectual and political contexts of the turbulent twentieth century. *Vladimir Nabokov in Context* maps the ever-changing sites, people, cultures and ideologies of his itinerant life which shaped the production and reception of his work. Concise and lively essays by leading scholars reveal a complex relationship of mutual influence between Nabokov's work and his environment. Appealing to a wide community of literary scholars this timely companion to Nabokov's writing offers new insights and approaches to one of the most important, and yet most elusive writers of modern literature.

THE PSYCHOSOCIAL IMPLICATIONS OF DISNEY MOVIES

MDPI In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent

symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

GLOBAL NOMADS

TECHNO AND NEW AGE AS TRANSNATIONAL COUNTERCULTURES IN IBIZA AND GOA

Routledge Global Nomads provides a unique introduction to the globalization of countercultures, a topic largely unknown in and outside academia. Anthony D'Andrea examines the social life of mobile expatriates who live within a global circuit of countercultural practice in paradoxical paradises. Based on nomadic fieldwork across Spain and India, the study analyzes how and why these post-metropolitan subjects reject the homeland in order to shape an alternative lifestyle. They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and spirituality within a cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal regimes that appropriate utopian spaces, practices and imaginaries as commodities for tourism, entertainment and media consumption. In order to understand the paradoxical globalization of countercultures, Global Nomads develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.

HORIZON

Vintage ONE OF THE BEST BOOKS OF THE YEAR: THE NEW YORK TIMES • NPR • THE GUARDIAN From pole to pole and across decades of lived experience, National Book Award-winning author Barry Lopez delivers his most far-ranging, yet personal, work to date. *Horizon* moves indelibly, immersively, through the author's travels to six regions of the world: from Western Oregon to the High Arctic; from the Galápagos to the Kenyan desert; from Botany Bay in Australia to finally, unforgettably, the ice shelves of Antarctica. Along the way, Lopez probes the long history of humanity's thirst for exploration, including the prehistoric peoples who trekked across Skraeling Island in northern Canada, the colonialists who plundered Central Africa, an enlightenment-era Englishman who sailed the Pacific, a Native American emissary who found his way into isolationist Japan, and today's ecotourists in the tropics. And always, throughout his journeys to some of the hottest, coldest, and most desolate places on the globe, Lopez searches for meaning and purpose in a broken world.

IN ARCADIA

Andrea K Höst One does not simply walk onto another planet. At least not without the help of a daughter who has developed unlikely powers, fought an intra-dimensional war, and then arranged for a family relocation to a futuristic clone of Earth. Laura Devlin would gladly have paid any price to have her daughter back, so living in a techno-paradise with spaceship views is merely an added bonus. And a dream come true. But Arcadian paradises do not come without complications. Laura's include a plethora of psychic grandchildren. Interplanetary diplomacy. Her daughter's immense fame. And KOTIS, the military watchdog that seems to consider Laura's entire family government property. Forewarned by her daughter's experiences, Laura had anticipated as many problems as she could, and didn't doubt her ability to cope with the rest. But she had not planned on Gidds Selkie, a military officer 'chipped from flint' and not at all the sort of man lifelong geek Laura had ever imagined would find her interesting. Burned in the past, Laura is

surprised to find herself tempted. Is this a new start to go with a new world? Or a mismatch doomed to failure?

FRICION

AN ETHNOGRAPHY OF GLOBAL CONNECTION

Princeton University Press A wheel turns because of its encounter with the surface of the road; spinning in the air it goes nowhere. Rubbing two sticks together produces heat and light; one stick alone is just a stick. In both cases, it is friction that produces movement, action, effect. Challenging the widespread view that globalization invariably signifies a "clash" of cultures, anthropologist Anna Tsing here develops friction in its place as a metaphor for the diverse and conflicting social interactions that make up our contemporary world. She focuses on one particular "zone of awkward engagement"--the rainforests of Indonesia--where in the 1980s and the 1990s capitalist interests increasingly reshaped the landscape not so much through corporate design as through awkward chains of legal and illegal entrepreneurs that wrested the land from previous claimants, creating resources for distant markets. In response, environmental movements arose to defend the rainforests and the communities of people who live in them. Not confined to a village, a province, or a nation, the social drama of the Indonesian rainforest includes local and national environmentalists, international science, North American investors, advocates for Brazilian rubber tappers, UN funding agencies, mountaineers, village elders, and urban students, among others--all combining in unpredictable, messy misunderstandings, but misunderstandings that sometimes work out. Providing a portfolio of methods to study global interconnections, Tsing shows how curious and creative cultural differences are in the grip of worldly encounter, and how much is overlooked in contemporary theories of the global.

HOW CLIMATE CHANGE COMES TO MATTER

THE COMMUNAL LIFE OF FACTS

Duke University Press During the past decade, skepticism about climate change has frustrated those seeking to engage broad publics and motivate them to take action on the issue. In this innovative ethnography, Candis Callison examines the initiatives of social and professional groups as they encourage diverse American publics to care about climate change. She explores the efforts of

science journalists, scientists who have become expert voices for and about climate change, American evangelicals, Indigenous leaders, and advocates for corporate social responsibility. The disparate efforts of these groups illuminate the challenge of maintaining fidelity to scientific facts while transforming them into ethical and moral calls to action. Callison investigates the different vernaculars through which we understand and articulate our worlds, as well as the nuanced and pluralistic understandings of climate change evident in different forms of advocacy. As she demonstrates, climate change offers an opportunity to look deeply at how issues and problems that begin in a scientific context come to matter to wide publics, and to rethink emerging interactions among different kinds of knowledge and experience, evolving media landscapes, and claims to authority and expertise.

LEARNING COMMUNITIES IN PRACTICE

Springer Science & Business Media Most would agree that a learning community of practice cultivates social and intellectual development in educational settings but what are the other benefits and what does a learning community actually look like in practice? This book explores such questions as: “Are learning communities essential in education?” “How are they designed and developed?” “What difference do they make in learning?” The book contains contributions of educators who share their research and practice in designing and implementing learning communities in school, university, and professional network settings. It presents their experiences, and the “how to” of these educators who are passionate about building and sustaining learning communities to make a real difference for students, teachers, faculty, and communities. Combining scholarly and practitioner research, the book offers practical information to teachers, school and university administrators, teacher educators, and community educators.

PICTURES AND TEARS

A HISTORY OF PEOPLE WHO HAVE CRIED IN FRONT OF PAINTINGS

Routledge Art Does art leave you cold? And is that what it's supposed to do? Or is a painting meant to move you to tears? Hemingway was reduced to tears in the midst of a drinking bout when a painting by James Thurber caught his eye. And what's bad about that? In *Pictures and Tears*, art historian James Elkins tells the story of paintings that have made people cry. Drawing upon anecdotes related to individual works of art, he provides a chronicle of how people have shown emotion before works of art in the past, and a meditation on the curious tearlessness with which most people approach art in the present. Deeply personal, *Pictures and Tears* is a history of emotion and vulnerability, and an inquiry into the nature of art. This book is a rare and invaluable treasure for people who love art. Also includes an 8-page color insert.

GODLESS

THE CHURCH OF LIBERALISM

Crown Forum From the conservative spokesperson and author of *Slander and How to Talk to a Liberal* comes an all new, timely, and thought-provoking study of American politics and religion that looks at the Left's attacks on the Judeo-Christian tradition. Reprint. 300,000 first printing.

COMPLEX BATTLESPACES

THE LAW OF ARMED CONFLICT AND THE DYNAMICS OF MODERN WARFARE

Oxford University Press The conduct of warfare is constantly shaped by new forces that create complexities in the battlespace for military operations. As the nature of how and where wars are fought changes, new challenges to the application of the extant body of international law that regulates armed conflicts arise. This inaugural volume of the Lieber Studies Series seeks to address several issues in the confluence of law and armed conflict, with the primary goal of providing the reader with both academic and practitioner perspectives. Featuring chapters from world class scholars, policymakers and other government officials; military and civilian legal practitioners; and other thought leaders, together they examine the role of the law of armed conflict in current and future armed conflicts around the world. *Complex Battlespaces* also explores several examples of battlespace dynamics through four "lenses of complexity": complexity in legal regimes, governance, technology, and the urbanization of the battlefield.

CODING FREEDOM

THE ETHICS AND AESTHETICS OF HACKING

Princeton University Press Who are computer hackers? What is free software? And what does the emergence of a community dedicated to the production of free and open source software--and to hacking as a technical, aesthetic, and moral project--reveal about the values of contemporary liberalism? Exploring the rise and political significance of the free and open source software (F/OSS) movement in the United States and Europe, *Coding Freedom* details the ethics behind hackers' devotion to F/OSS, the social codes that guide its production, and the political struggles through which hackers question the scope and direction of copyright and patent law. In telling the story of the F/OSS movement, the book unfolds a broader narrative involving computing, the politics of access, and

intellectual property. E. Gabriella Coleman tracks the ways in which hackers collaborate and examines passionate manifestos, hacker humor, free software project governance, and festive hacker conferences. Looking at the ways that hackers sustain their productive freedom, Coleman shows that these activists, driven by a commitment to their work, reformulate key ideals including free speech, transparency, and meritocracy, and refuse restrictive intellectual protections. Coleman demonstrates how hacking, so often marginalized or misunderstood, sheds light on the continuing relevance of liberalism in online collaboration.

OUR ENEMIES IN BLUE

POLICE AND POWER IN AMERICA

AK Press Let's begin with the basics: violence is an inherent part of policing. The police represent the most direct means by which the state imposes its will on the citizenry. They are armed, trained, and authorized to use force. Like the possibility of arrest, the threat of violence is implicit in every police encounter. Violence, as well as the law, is what they represent. Using media reports alone, the Cato

Institute's last annual study listed nearly seven thousand victims of police "misconduct" in the United States. But such stories of police brutality only scratch the surface of a national epidemic. Every year, tens of thousands are framed, blackmailed, beaten, sexually assaulted, or killed by cops. Hundreds of millions of dollars are spent on civil judgments and settlements annually. Individual lives, families, and communities are destroyed. In this extensively revised and updated edition of his seminal study of policing in the United States, Kristian Williams shows that police brutality isn't an anomaly, but is built into the very meaning of law enforcement in the United States. From antebellum slave patrols to today's unarmed youth being gunned down in the streets, "peace keepers" have always used force to shape behavior, repress dissent, and defend the powerful. *Our Enemies in Blue* is a well-researched page-turner that both makes historical sense of this legalized social pathology and maps out possible alternatives.

THE BOOK OF FIRSTS

Andrea K Hösth Three boys, the 'kings' of the school. One cynical newcomer. An outrageous competition. When Mika Niles overhears the details of "The Book of Firsts" she's at first bemused, then scornful, then intrigued. Judging which of three very handsome young men is best at kissing, and...? With no time in her final year for serious attachments, a series of lunchtime trysts is more than tempting - and an opportunity like this might never come her way again. But this light-hearted game is also a scandalous secret, and few can play with fire and walk away unscathed.

FAMILY WARS

STORIES AND INSIGHTS FROM FAMOUS FAMILY BUSINESS FEUDS

Kogan Page Publishers Many of the world's most successful businesses are family owned. With this comes the threat of family bust-ups, sibling rivalry and petty jealousies. *Family Wars* takes you behind the scenes on a rollercoaster ride through the ups and downs of some of the biggest family-run companies in the world, showing how family in-fighting has threatened to bring about their downfall. Whether it's the Redstone's courtroom battles or the feud over Henry Ford's reluctance to let go of the reigns, the book reveals the origins, the extent and the final resolution of some of the most famous family feuds in recent history. Names you'll recognise include: the Gallo Family; the Guinness story; the Pathak family; and the Gucci family. An astonishing exposé of the way families do business and how arguments can threaten to blow a business apart, *Family Wars* also offers valuable advice on how such problems can be contained and solved.

VOLUME 1 - NEW APPROACHES

Studies in Critical Social Sci "In *The Struggle for Development and Democracy* Alessandro Olsaretti argues that we need significantly new theories of development and democracy to answer the problem posed by neoliberalism and the populist backlash, namely, uneven development and divisive politics. This book proposes as a first step a truly multidisciplinary humanist social science, to overcome the flaws of neoliberal economic theories, and to recover a balanced approach to theories and policies alike that is especially needed in the wake of the 9/11 attacks. These led to divisive culture wars, which were compounded by the divisive populist politics. This book begins to sketch such a humanist social science, and applies it to answer one question: who is responsible for neoliberalism and the populist backlash?"--

OPEN ACCESS IN THEORY AND PRACTICE

THE THEORY-PRACTICE RELATIONSHIP AND OPENNESS

Routledge *Open Access in Theory and Practice* investigates the theory-practice relationship in the domain of open access publication and dissemination of research outputs. Drawing on detailed analysis of the literature and current practice in OA, as well as data collected in detailed interviews with practitioners, policymakers, and researchers, the book discusses what constitutes 'theory', and how the role of theory is perceived by both theorists and practitioners. Exploring the ways theory and practice have interacted in the development of OA, the authors discuss what this reveals about the nature of the OA phenomenon itself and the theory-practice

relationship. Open Access in Theory and Practice contributes to a better understanding of OA and, as such, should be of great interest to academics, researchers, and students working in the fields of information science, publishing studies, science communication, higher education policy, business, and economics. The book also makes an important contribution to the debate of the relationship between theory and practice in information science, and more widely across different fields of the social sciences and humanities

THE CAMBRIDGE HISTORY OF SCIENCE FICTION

Cambridge University Press The first science fiction course in the American academy was held in the early 1950s. In the sixty years since, science fiction has become a recognized and established literary genre with a significant and growing body of scholarship. The Cambridge History of Science Fiction is a landmark volume as the first authoritative history of the genre. Over forty contributors with diverse and complementary specialties present a history of science fiction across national and genre boundaries, and trace its intellectual and creative roots in the philosophical and fantastic narratives of the ancient past. Science fiction as a literary genre is the central focus of the volume, but fundamental to its story is its non-literary cultural manifestations and influence. Coverage thus includes transmedia manifestations as an integral part of the genre's history, including not only short stories and novels, but also film, art, architecture, music, comics, and interactive media.
