## Understanding the Educational and Career Pathways of Engineers

National Academies Press Engineering skills and knowledge are foundational to technological innovation and development that drive long-term economic growth and help solve societal challenges. Therefore, to ensure national competitiveness and quality of life it is important to understand and to continuously adapt and improve the educational and career pathways of engineers in the United States. To gather this understanding it is necessary to study the people with the engineering skills and knowledge as well as the evolving system of institutions, policies, markets, people, and other resources that together prepare, deploy, and replenish the nation's engineering workforce. This report explores the characteristics and career choices of engineering graduates, particularly those with a BS or MS degree, who constitute the vast majority of degreed engineers, as well as the characteristics of those with non-engineering degrees who are employed as engineers in the United States. It provides insight into their educational and career pathways and related decision making, the forces that influence their decisions, and the implications for major elements of engineering education-to-workforce pathways.

## 2016 GUIDELINES FOR INVESTIGATING GEOLOGIC HAZARDS AND PREPARING ENGINEERING-GEOLOGY REPORTS, WITH A SUGGESTED APPROACH TO GEOLOGIC-HAZARD ORDINANCES IN UTAH

Utah Geological Survey The purpose of these guidelines for investigating geologic hazards and preparing engineering-geology reports, is to provide recommendations for appropriate, minimum investigative techniques, standards, and report content to ensure adequate geologic site characterization and geologic-hazard investigations to protect public safety and facilitate risk reduction. Such investigations provide important information on site geologic conditions that may affect or be affected by development, as well as the type and severity of geologic hazards at a site, and recommend solutions to mitigate the effects and the cost of the hazards, both at the time of construction and over the life of the development. The accompanying suggested approach to geologic-hazard ordinances and school-site investigation

guidelines are intended as an aid for land-use planning and regulation by local Utah jurisdictions and school districts, respectively. Geologic hazards that are not accounted for in project planning and design often result in additional unforeseen construction and/or future maintenance costs, and possible injury or death.

You're Hired! Job Search Strategies That Work helps you understand the psychology of job-searching and sets you up for envisioning your success. Resumes... It is often said that "resumes are your ticket to job searching success." Resumes are still the not so secret weapon to landing a job. You won't win a lottery if you don't have a ticket and you are unlikely to be invited for a job interview if you don't have a dynamic, effective resume that features you as the solution to a problem. Your resume is your ticket that leads to being invited for an interview where you can expand upon your value. An effective, eye-catching resume will get you an interview. We show you how to craft and fine-tune a magnetic resume that will attract an employer's attention. Are you networking? Many job search industry professionals say that networking is the single most effective strategy for landing your next job. You may think you don't know anyone who can help you with your job search. But you know more people than you think,

and they are willing to help you. However, you need to reach out and connect with them first. "It's not who you know... it's who knows you know..." You're Hired! Job Search Strategies That Work provides you with proven tactics to leverage your references to help nail the job for you. Job Interviewing... While looking for a new job and going through hiring interviews can be exciting for some people, for many of us it can be a stressful experience. Is the thought of a job interview keeping you awake at night? You're Hired! Job Search Strategies That Work systematically builds your skills to excel at interview questions and help you sleep at night. From our experience, one of the biggest problems job seekers often face is they feel they are coming from an inferior position and they don't have a lot of personal power. The belief being that the Employer has the superior position and has all the power. Sound familiar? Yes, they have the job and they have the power to give you the job ... or not. What you may not realize is many Hiring Managers are under similar pressures as you, the job seeker. They are accountable to their superiors should the person they hire not work out. They have the pressure of finding the right candidate for the vacancy they need to fill. You're Hired! Job Search Strategies That Work levels the playing field between you and the employer. Your task is to become the only choice. The right choice!
