Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

THE ALLEGORY OF THE CAVE

Strelbytskyy Multimedia Publishing The Allegory of the Cave, or Plato's Cave, was presented by the Greek philosopher Plato in his work Republic (514a-520a) to compare "the effect of education (παιδεία) and the lack of it on our nature". It is written as a dialogue between Plato's brother Glaucon and his mentor Socrates, narrated by the latter. The allegory is presented after the analogy of the sun (508b-509c) and the analogy of the divided line (509d-511e). All three are characterized in relation to dialectic at the end of Books VII and VIII (531d-534e). Plato has Socrates describe a group of people who have lived chained to the wall of a cave all of their lives, facing a blank wall. The people watch shadows projected on the wall from objects passing in front of a fire behind them, and give names to these shadows. The shadows are the prisoners' reality.

CLINICAL RESEARCH

FROM PROPOSAL TO IMPLEMENTATION

Lippincott Williams & Wilkins "Clinical and translational research is a crucial link to the improvement of clinical care and practice. Many of the elements that are involved--physicians, nurses, pharmacists, laboratory testing, medical records--are also involved in the delivery of care to patients. Yet in the conduct of clinical research, these elements are arrayed in different configurations and constrained by rules and regulations that are distinct from those that guide the practice of medicine. In parallel with these considerations, the conduct of clinical research demands a specific skill set. Specialized tools are required to formulate and design informative clinical trials and to interpret the findings from such experiments"--Provided by publisher.
