While she expects the broody tycoon to be a challenge, she isn't prepared for his dark charm or his price for the sordid details of his past—a price that begins with her spending a week alone with him. Micah may be a loner, but he's not a monk, and there's something about Darcy... He decides that if Darcy wants him to reveal his secrets, she's going to have to reveal a little of herself. The bigger the revelation he offers up, the bigger the cost he'll demand from her—a secret of her own, her wildest fantasies, a kiss. And that's only for starters... But when Darcy reveals a vulnerability Micah never expected, he knows he should get away fast, or be in danger of losing his heart.

According to the founder, all she has to do is find the sanctuary—the same sanctuary she can't remember because Asher erased her memories. Trying to save humanity while navigating Asher's lies is a royal pain. But the more time she and Asher spend together, the harder her soul tries to remind her what else he's made her forget—that he loves her, wants her, needs her. When she's trapped by the wraith king and forced to pick who will stand by her in the coming battle, Addison is faced with an impossible choice: the sentinel she loves who refuses to love her back, or a powerful stranger who insists they're meant to be together. Her decision will decide the fate of humanity, and once decided, can't be undone.

A Million Shades of Gray

Simon and Schuster **A boy and his elephant escape into the jungle when the Viet Cong attack his village immediately after the Vietnam war.**

When Species Meet

U of Minnesota Press **In 2006, about 69 million U.S. households had pets, giving homes to around 73.9 million dogs, 90.5 million cats, and 16.6 million birds, and spending more than 38 billion dollars on companion animals. As never before in history, our pets are truly members of the family. But the notion of "companion species"—knotted from human beings, animals and other organisms, landscapes, and technologies—includes much more than "companion animals." In *When Species Meet*, Donna J. Haraway digs into this larger phenomenon to contemplate the interactions of humans with many kinds of critters, especially with those called domestic. At the heart of the book are her experiences in agility training with her dogs Cayenne and Roland, but Haraway's vision here also encompasses wolves, chickens, cats, baboons, sheep, microorganisms, and whales wearing video cameras. From designer pets to lab animals to trained therapy dogs, she deftly explores philosophical, cultural, and biological aspects of animal-human encounters. In this deeply personal yet intellectually groundbreaking work, Haraway develops the idea of companion species, those who meet and break bread together but not without some indigestion. "A great deal is at stake in such**

meetings,” she writes, “and outcomes are not guaranteed. There is no assured happy or unhappy ending—socially, ecologically, or scientifically. There is only the chance for getting on together with some grace.” Ultimately, she finds that respect, curiosity, and knowledge spring from animal-human associations and work powerfully against ideas about human exceptionalism.
